

MAKING LECTURES MORE INTERACTIVE: WHY?

**Eric Mazur
Harvard University**

**Introductory Calculus Based Physics Conference
Crystal City, VA, 1 November 2003**

We have a problem

**380,000 students take
introductory physics
each year...**

We have a problem

**about 1% of these get
a bachelor's degree
in physics**

We have a problem

**Of the 4,300 students with
a bachelor's degree
in physics...**

AIP Report R-151.33 (1997)

We have a problem

**about 35% go on to get a graduate
degree in physics...**

We have a problem

**That's one out of every
260 students in our
introductory
courses!**

We have a problem

**What about the
other 259...?**

We have a problem

**What do we know
about these
students?**

We have a problem

Some disturbing symptoms:

- ▶ **frustration**
- ▶ **lack of understanding**
- ▶ **lack of basic knowledge**

We have a problem

Should we worry?

We have a problem

We'd better!

We have a problem

"I took four years of science and four years of math...

**A waste of my time,
a waste of the teacher's time,
and a waste of space...**

**You know,
I took *physics*.**

For *what?*"

Why do we have this problem?

Why do we have this problem?

Lectures focus on transfer of information...

Why do we have this problem?

Conventional problems reinforce bad study habits

Why do we have this problem?

Conventional problems reinforce bad study habits

Why do we have this problem?

Conventional problems reinforce bad study habits

Calculate:

- (a) the current in the $2\text{-}\Omega$ resistor, and
- (b) the potential difference between points P and Q

Why do we have this problem?

Are basic principles understood?

Why do we have this problem?

Are basic principles understood?

When S is closed, what happens to the:

- (a) intensities of A and B ?
- (b) intensity of C ?
- (c) current through battery?
- (d) voltage drop across A , B , and C ?
- (e) total power dissipated?

Why do we have this problem?

conceptual

Why do we have this problem?

conventional

conceptual

Why do we have this problem?

Why do we have this problem?

So what should we do?

Peer Instruction

Help students take more responsibility for learning!

Peer Instruction

Main features:

- ▶ **Pre-class reading**
- ▶ **In class: depth, not coverage**
- ▶ **ConcepTests**

Results

**Better understanding leads to better
problem solving!**

Results

**Better understanding leads to better
problem solving!**

**(but “good” problem solving doesn’t always
indicate understanding!)**

Conclusion

**Let's not forget the base
of the pyramid!**

Conclusion

**Let's give them something
of value!**
