

WHY WASTE TIME? TURN YOUR LECTURES INTO DISCUSSIONS!

*Eric Mazur
Harvard University*

*Graduate School of Education
Harvard University
7 December 1998*

① Problem

② Cause

③ Remedy

PROBLEM? WHAT PROBLEM?

Traditional science education ineffective...

- lack of understanding
- frustration
- lack of basic knowledge

LACK OF UNDERSTANDING

LACK OF UNDERSTANDING

Well, "hot" is a relative term...

You see, given temperatures rise, regardless of mass.

Yeah, Galileo observed rising temperatures will decrease with the exposure of an endothermic source.

Endothermic?

True transparency will persist until this one irresistible calorie interacts, thus altering the system.

FRUSTRATION

FRUSTRATION

“I took four years of science and four years of math...

A waste of my time,
a waste of the teacher's time,
and a waste of space...

You know,
I took *physics*.
For *what?*”

FRUSTRATION

LACK OF BASIC KNOWLEDGE

① Problem

② Cause

③ Remedy

THE CAUSE

1. Lectures focus on transfer of information...

THE CAUSE

... but the information doesn't sink in!

THE CAUSE

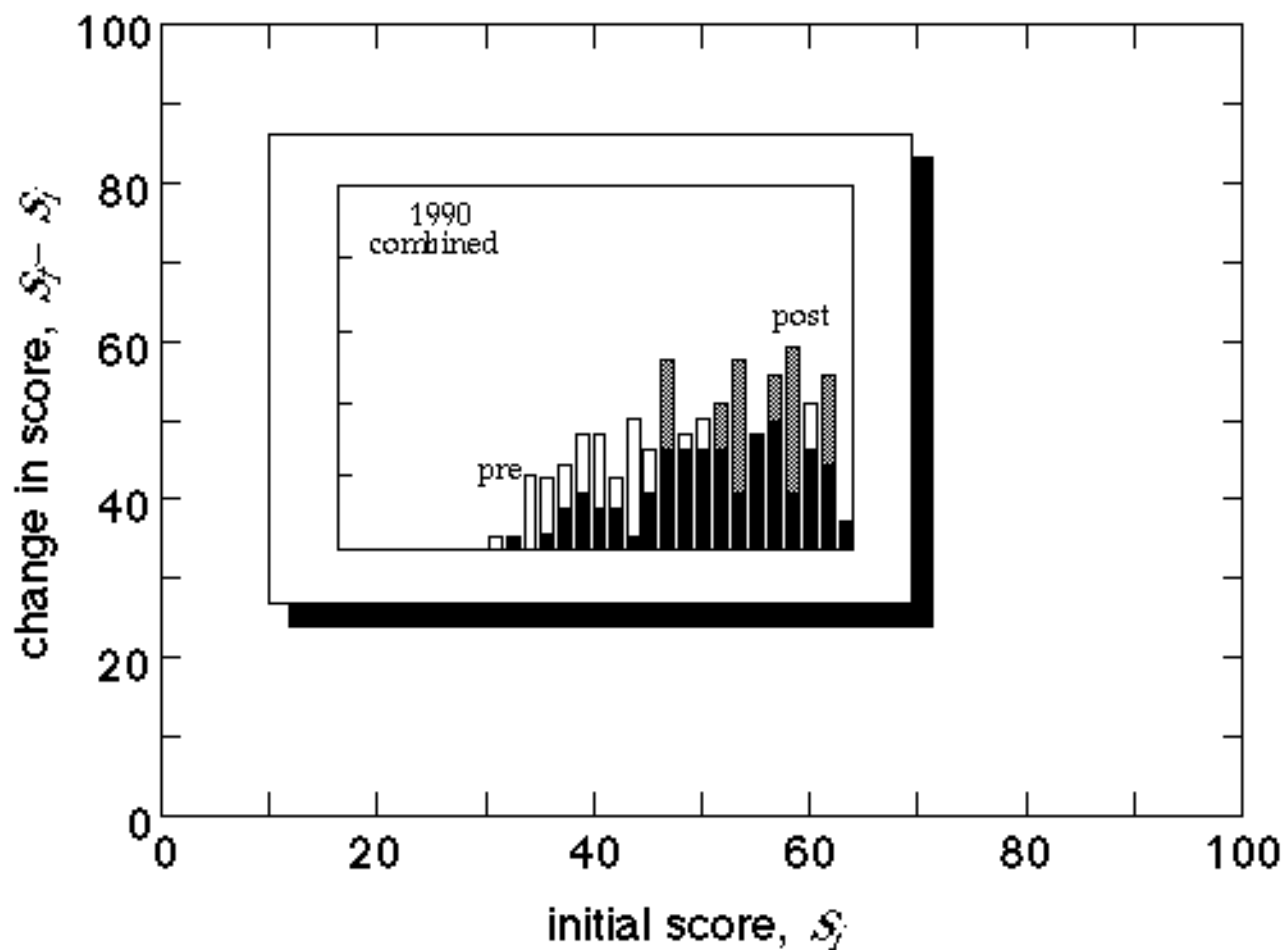

THE CAUSE

THE CAUSE

THE CAUSE

THE CAUSE

THE CAUSE

THE CAUSE

THE CAUSE

THE CAUSE

2. Conventional problems reinforce bad study habits

Calculate:

- (a) the current in the $2\text{-}\Omega$ resistor, and
- (b) the potential difference between points a and b .

THE CAUSE

Are basic principles understood?

When S is closed, what happens to the:

- (a) intensities of A and B ?
- (b) intensity of C ?
- (c) current through battery?
- (d) voltage drop across A , B , and C ?
- (e) total power dissipated?

THE CAUSE

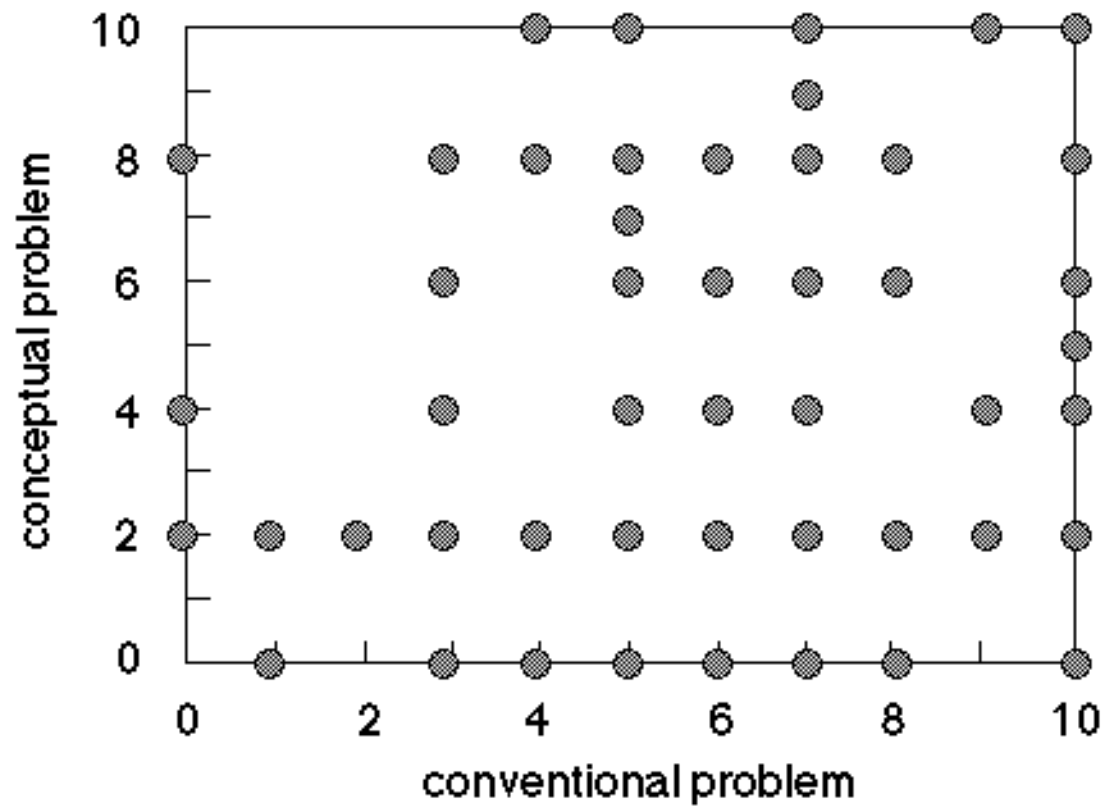

conventional

conceptual

PEER INSTRUCTION

Give students more responsibility for learning!

PEER INSTRUCTION

1. Recognize the inefficacy of the lecture method!

PEER INSTRUCTION

1. Recognize the inefficacy of the lecture method!

PEER INSTRUCTION

2. Move first exposure to material out of classroom

...assign reading!

PEER INSTRUCTION

3. Use class to deepen and broaden understanding

PEER INSTRUCTION

... by transferring some **additional** information ...

PEER INSTRUCTION

... and by giving students opportunities to **think**.

PEER INSTRUCTION

Better yet: **Learn from your students ...**

PEER INSTRUCTION

Better yet: **Learn from your students ...**

PEER INSTRUCTION

Better yet: **Learn from your students ...**

PEER INSTRUCTION

... bring in your Teaching Assistants too...!

PEER INSTRUCTION

Main features:

- Pre-class reading
- In class: depth, not coverage
- ConcepTests

CONCEPTEST

1. Question
2. Thinking
3. Individual answer
4. Peer discussion
5. Group answer
6. Explanation

CONCEPTEST

1. Question
2. Thinking
3. Individual answer
4. Peer discussion
5. Group answer
6. Explanation

CONCEPTS

CONCEPTTEST

Individual answers

CONCEPTTEST

Group answers

CONCEPTTEST

CONCEPTTEST

Students converge on correct answer!

RESULTS

So, better understanding leads to better problem solving ...

RESULTS

So, better understanding leads to better problem solving ...

(but “good” problem solving doesn’t always indicate understanding!)

Students:

- gets them thinking
- helps uncover misunderstandings
- boosts confidence

Faculty:

- change of format, not content
- with existing questions, little effort
- adaptable

ESSENTIAL ELEMENTS

- ① Reading (before class)
- ② Participation (during class)
- ③ Problem-solving (after class)
- ④ Appropriate testing/assessment

STUDENT REACTIONS

WHO BENEFITS?

WHO BENEFITS?

WHO BENEFITS?

WHO BENEFITS?

WHO BENEFITS?

READING

Incentive: Web-based assignment due night before class

- two free-response questions on content
- “What did you find difficult or confusing about the reading?”

Instructor benefit:

- learns what students find difficult
- turn student difficulties into ConcepTests

READING

Quality of reading and assignment matters!

Class	FCI pre	reading	assignment	correct
11a (F96)	0.68	standard	summaries	83%
11a (F97)	0.68			
1a (F98)	0.49			

READING

Quality of reading and assignment matters!

Class	FCI pre	reading	assignment	correct
11a (F96)	0.68	standard	summaries	83%
11a (F97)	0.68	new	summaries	89%
1a (F98)	0.49			

READING

Quality of reading and assignment matters!

Class	FCI pre	reading	assignment	correct
11a (F96)	0.68	standard	summaries	83%
11a (F97)	0.68	new	summaries	89%
1a (F98)	0.49	new	responses	82%

READING

Reading:

- is a valuable skill
- provides multiple exposure
- is self-paced

Textbooks can be edited (but lectures can't)

PROMOTING PARTICIPATION

- Motivate students
- Choose appropriate questions
- Poll students for answers
- Reward participation

CHOOSING GOOD QUESTIONS

- Focus on a key concept
- Engage student interest
 - demonstrations
 - real-life situations
 - magic/intrigue
- Identify student difficulties (research)
 - use optimum (35–65%) range
 - use typical student responses

RESOURCES

Peer Instruction: A User's Manual
Eric Mazur (Prentice Hall, 1997)

<http://galileo.harvard.edu>

POLLING METHODS

Methods:

- show of hands
- flashcards
- classroom network

Trade-offs:

- anonymity
- cost
- complexity and reliability

REWARDING STUDENTS

- Reward participation

credit for reading contingent on participation

conceptual and quantitative questions on exams

- Don't penalize collaboration

noncompetitive grading

promote group work on homework

PROBLEM SOLVING

- Home work
 - mostly quantitative problems
 - 20% of final grade
- Workshops (discussion sections)
 - tutorial worksheets
 - instructor demonstrates one problem
 - group work on difficult homework problems

THE PROBLEM WITH PROBLEMS

On a Saturday afternoon, you pull into a parking lot with unmetered spaces near a shopping area. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces.

THE PROBLEM WITH PROBLEMS

On a Saturday afternoon, you pull into a parking lot with unmetered spaces near a shopping area. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces. On average people shop for about 2 hours.

THE PROBLEM WITH PROBLEMS

On a Saturday afternoon, you pull into a parking lot with unmetered spaces near a shopping area. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces. On average people shop for about 2 hours.

TRADITIONAL VS. PEER INSTRUCTION

COVERAGE

Traditional lecture:

- “covers” a lot
- students retain little

Peer Instruction:

- less material treated in class
(reading & lecture *can* still cover the same)
- students learn more

EFFECTIVE TIME MANAGEMENT

Time allotment:

- “lecturing” 1/3 – 1/2
- ConcepTests (incl. explanations) 1/2 – 2/3

ConcepTest:

10–15 minutes

- Read question 1 minute
- Individual thinking 1 minute
- Discussion (listen, don't talk!) 2–3 minutes
- Explanation as necessary
