

Assessing science teaching: are we teaching the right thing?

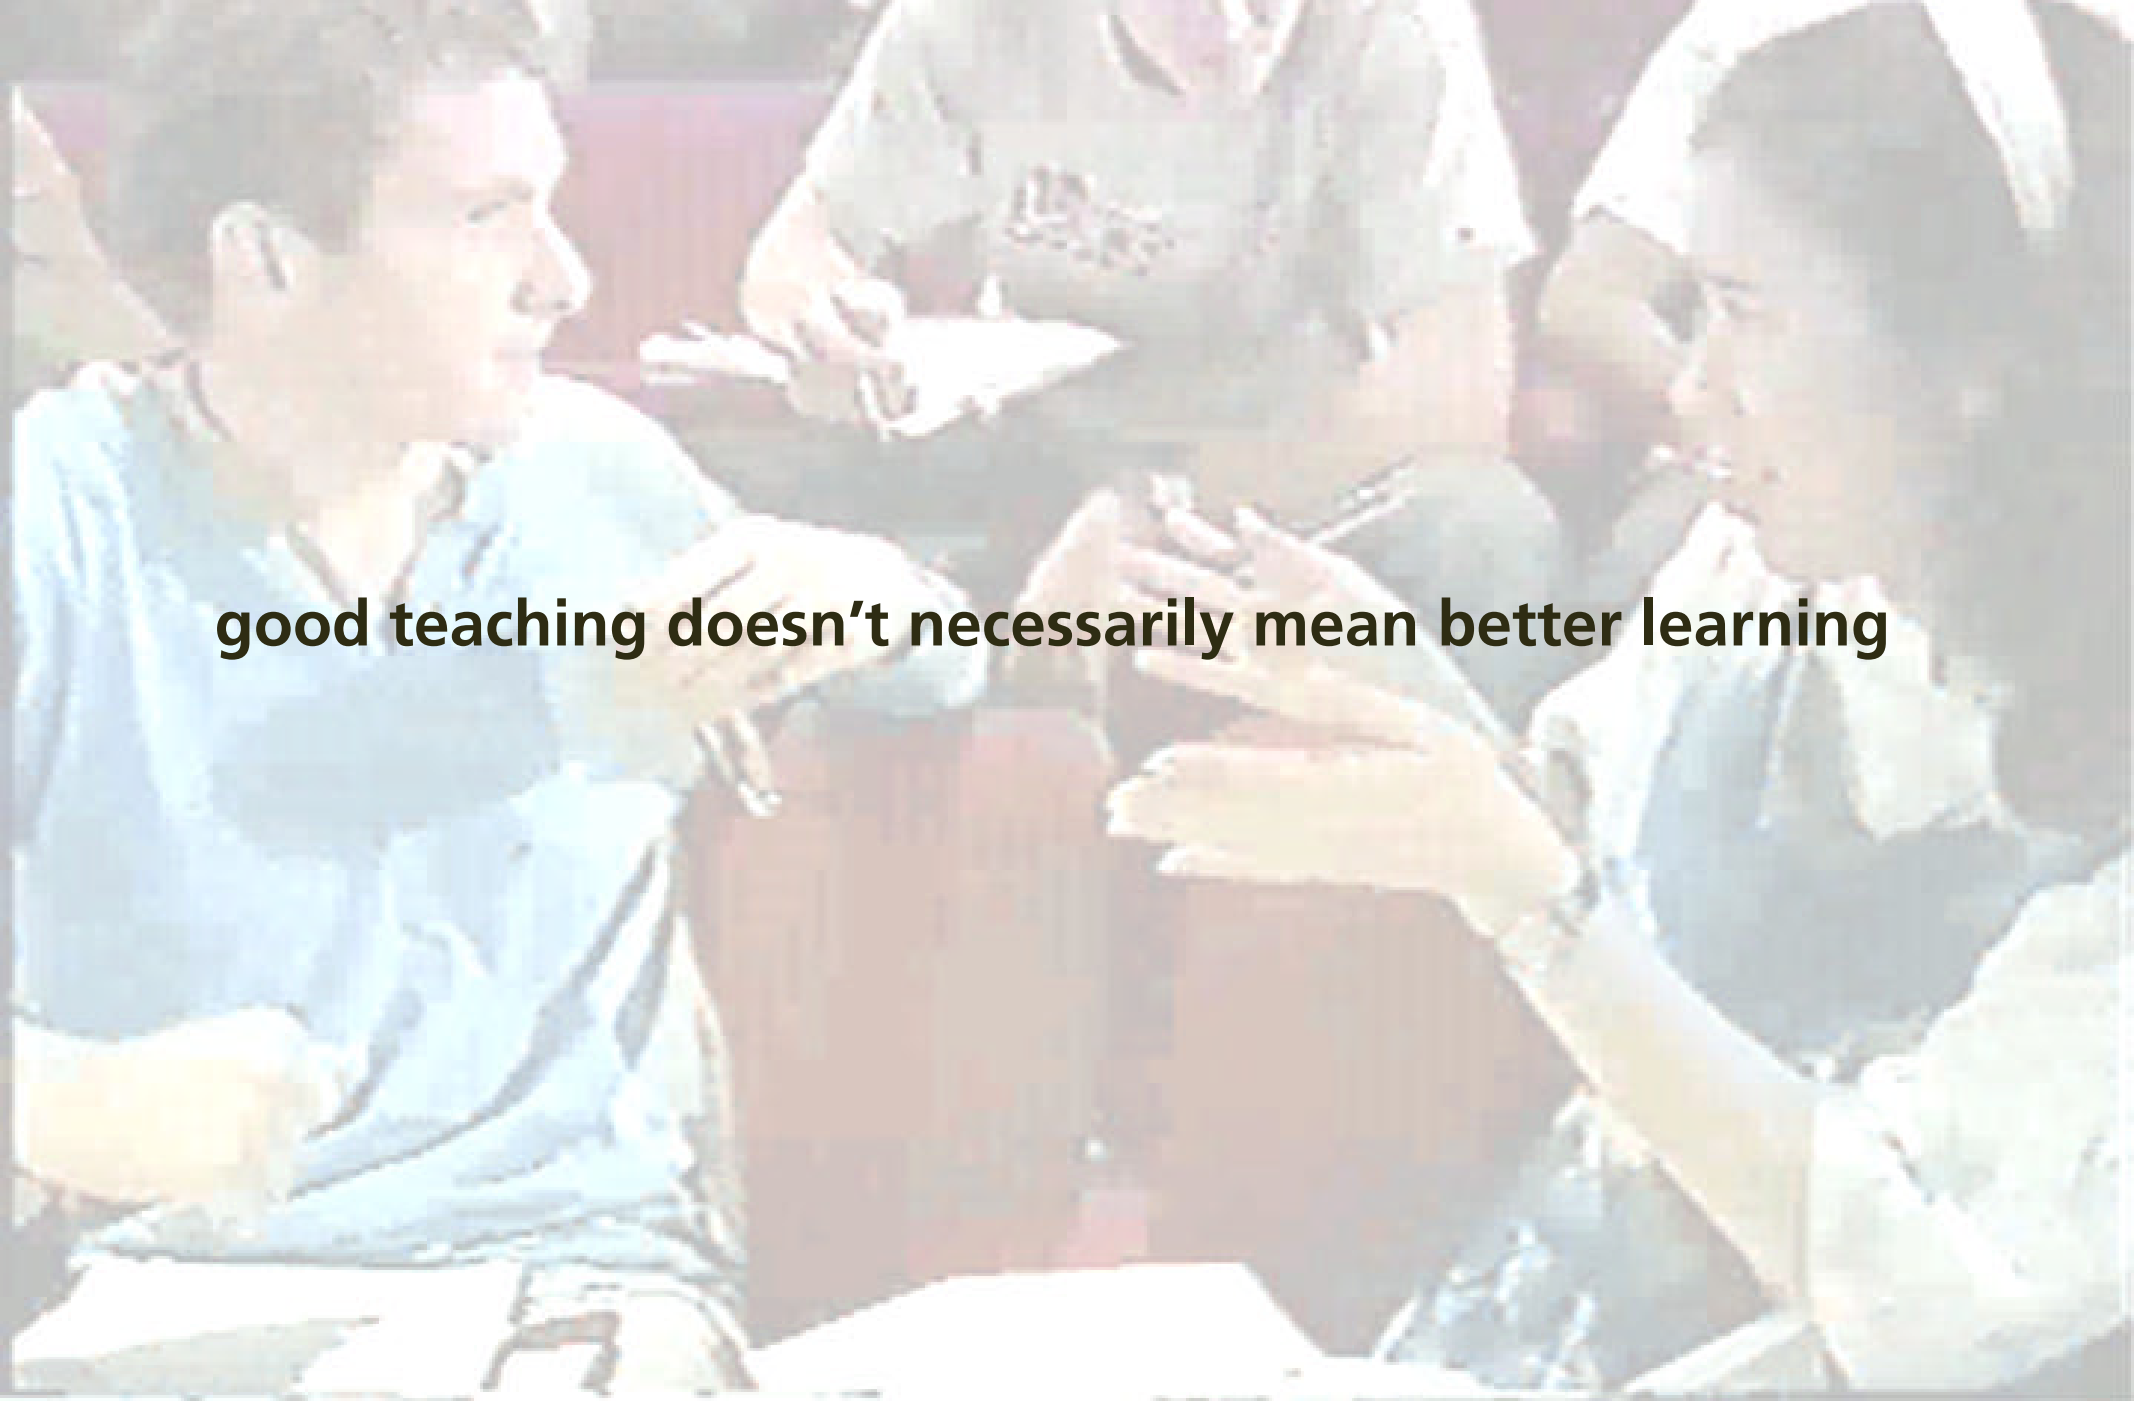

Teaching & Learning Lunch
Amherst College
Amherst, MA, 5 October 2007

My message

good teaching doesn't necessarily mean better learning

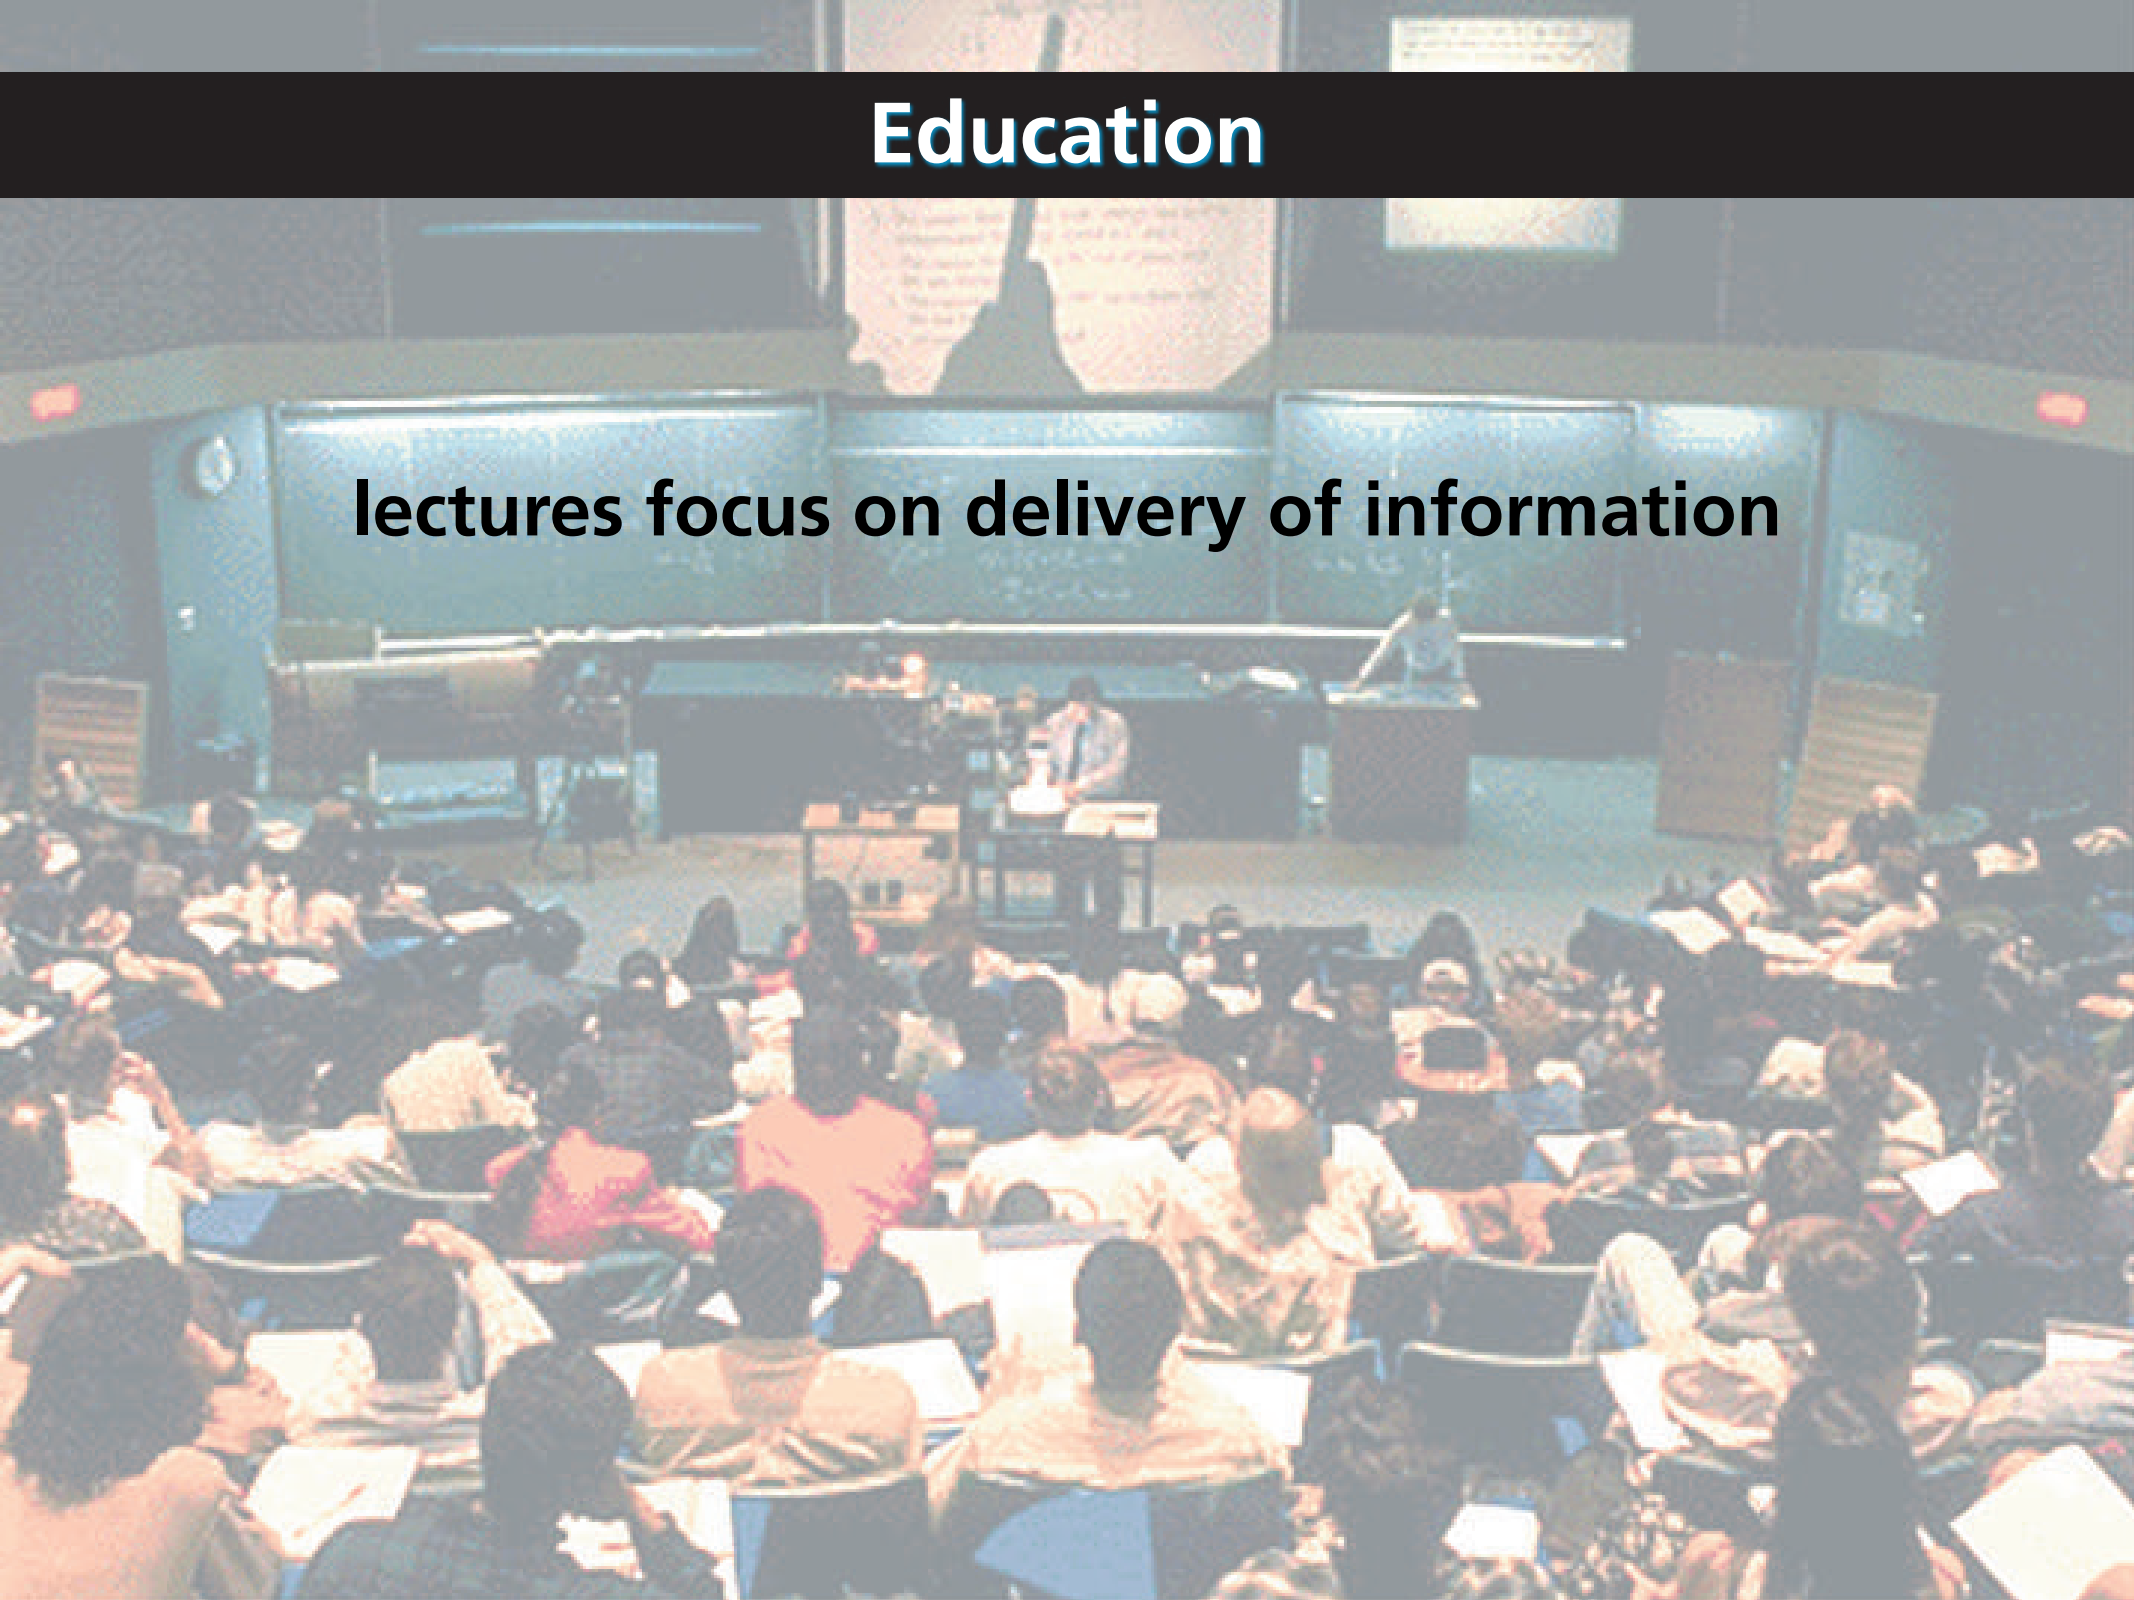

Education

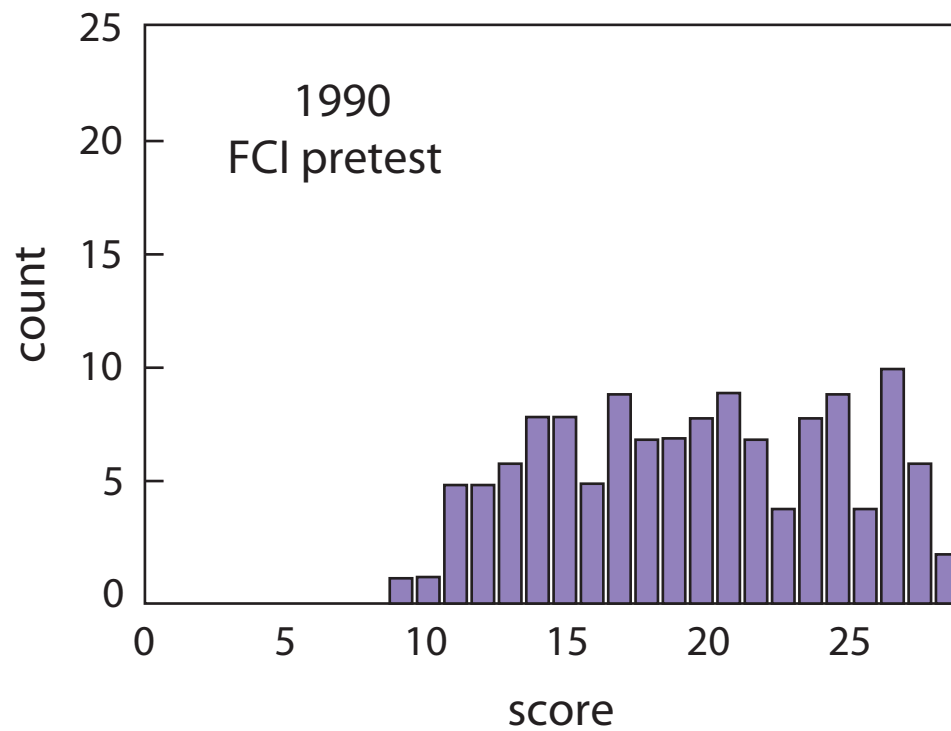

Education

lectures focus on delivery of information

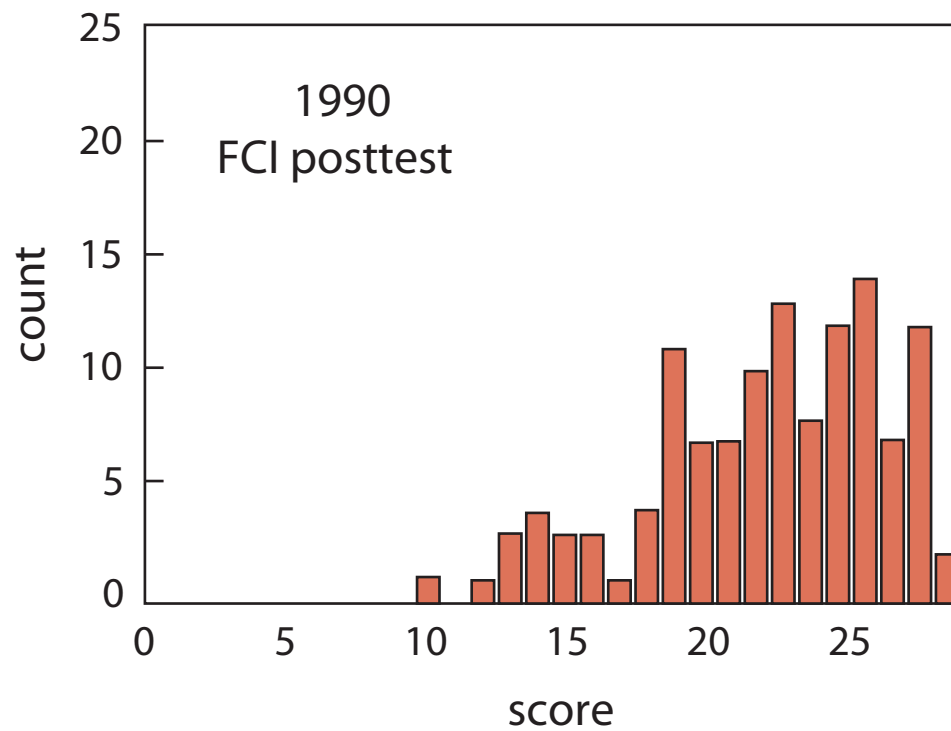

Education

education is not just information transfer

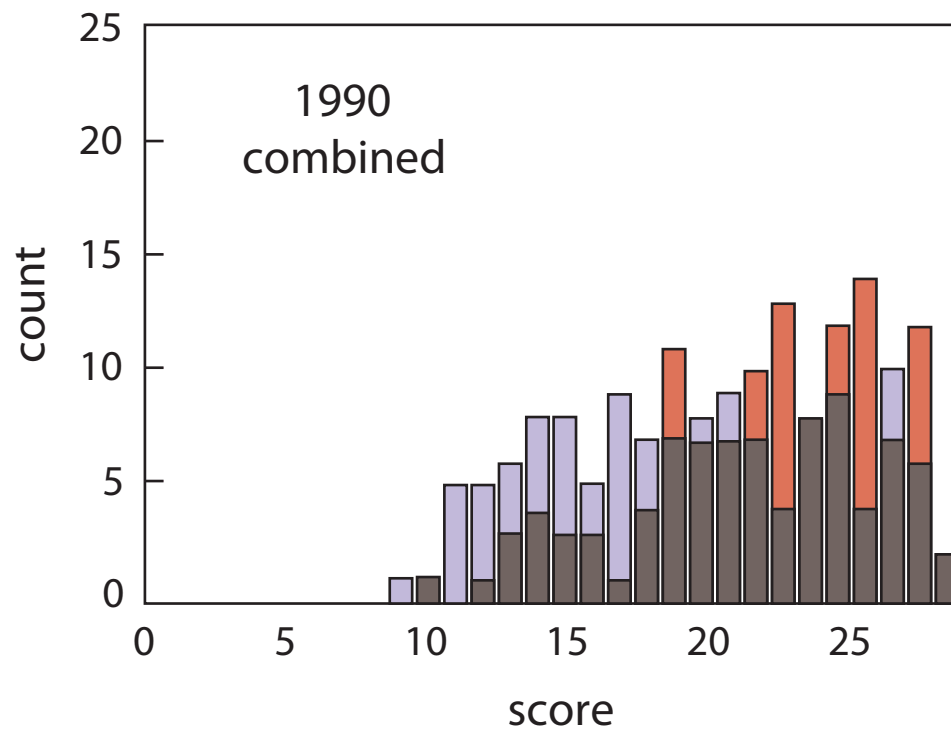

Education

education is not just information transfer

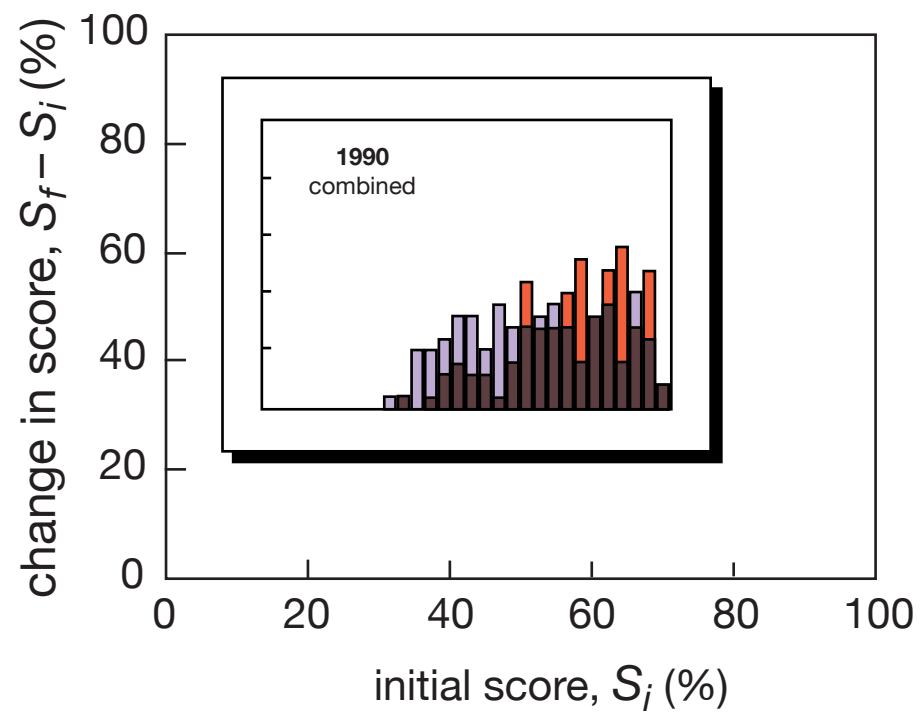

Education

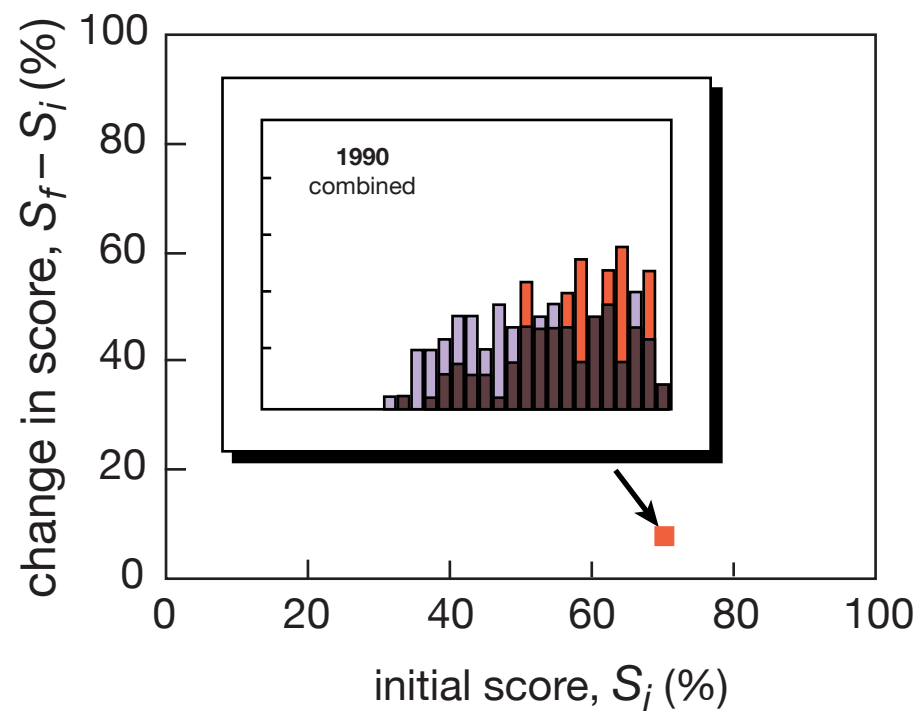

education is not just information transfer

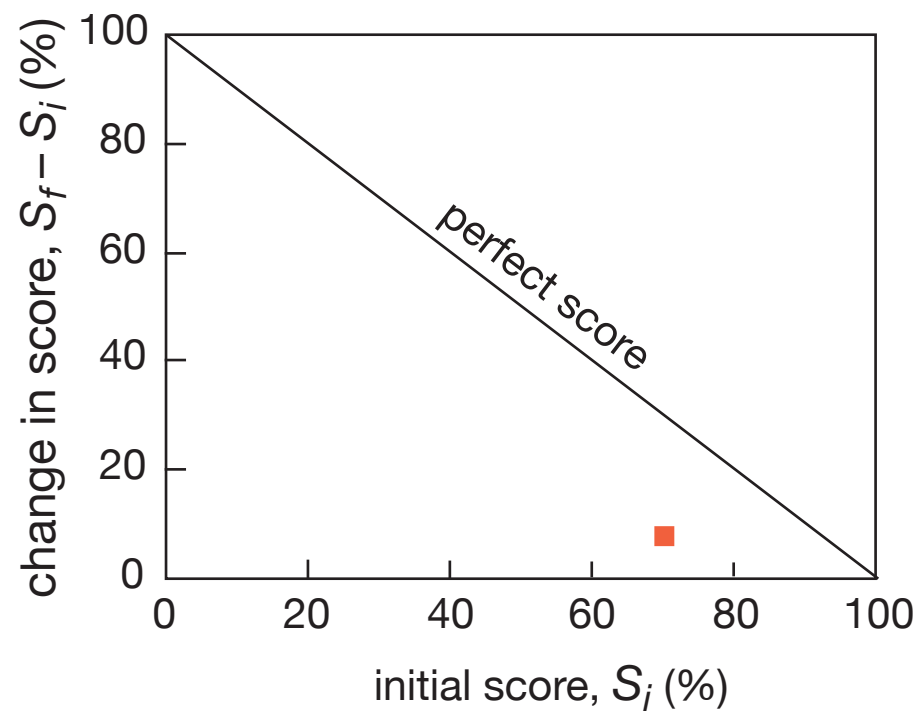

Education

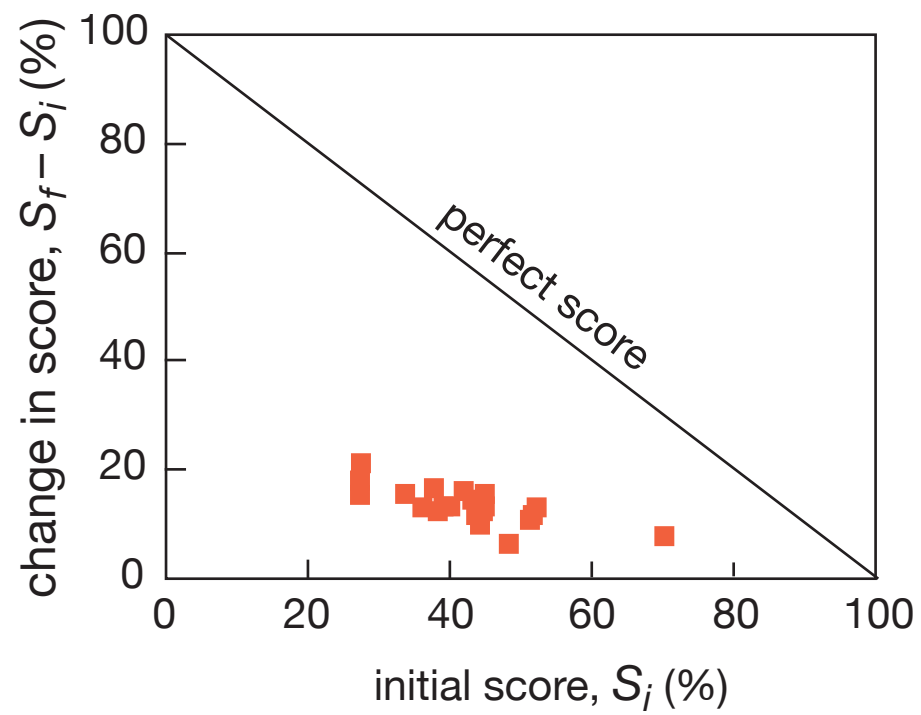

Education

Education

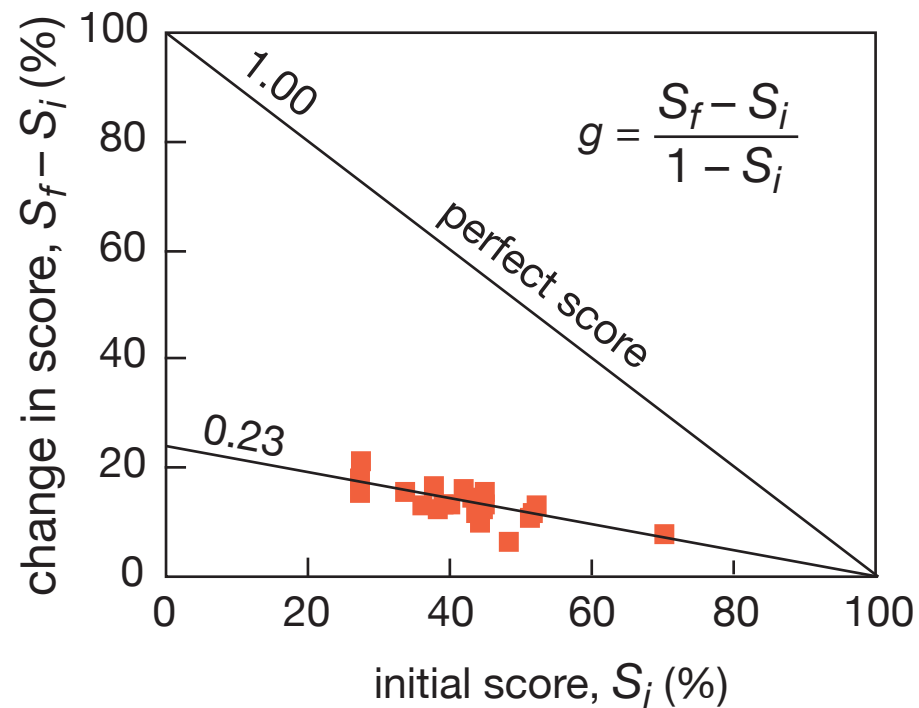

Education

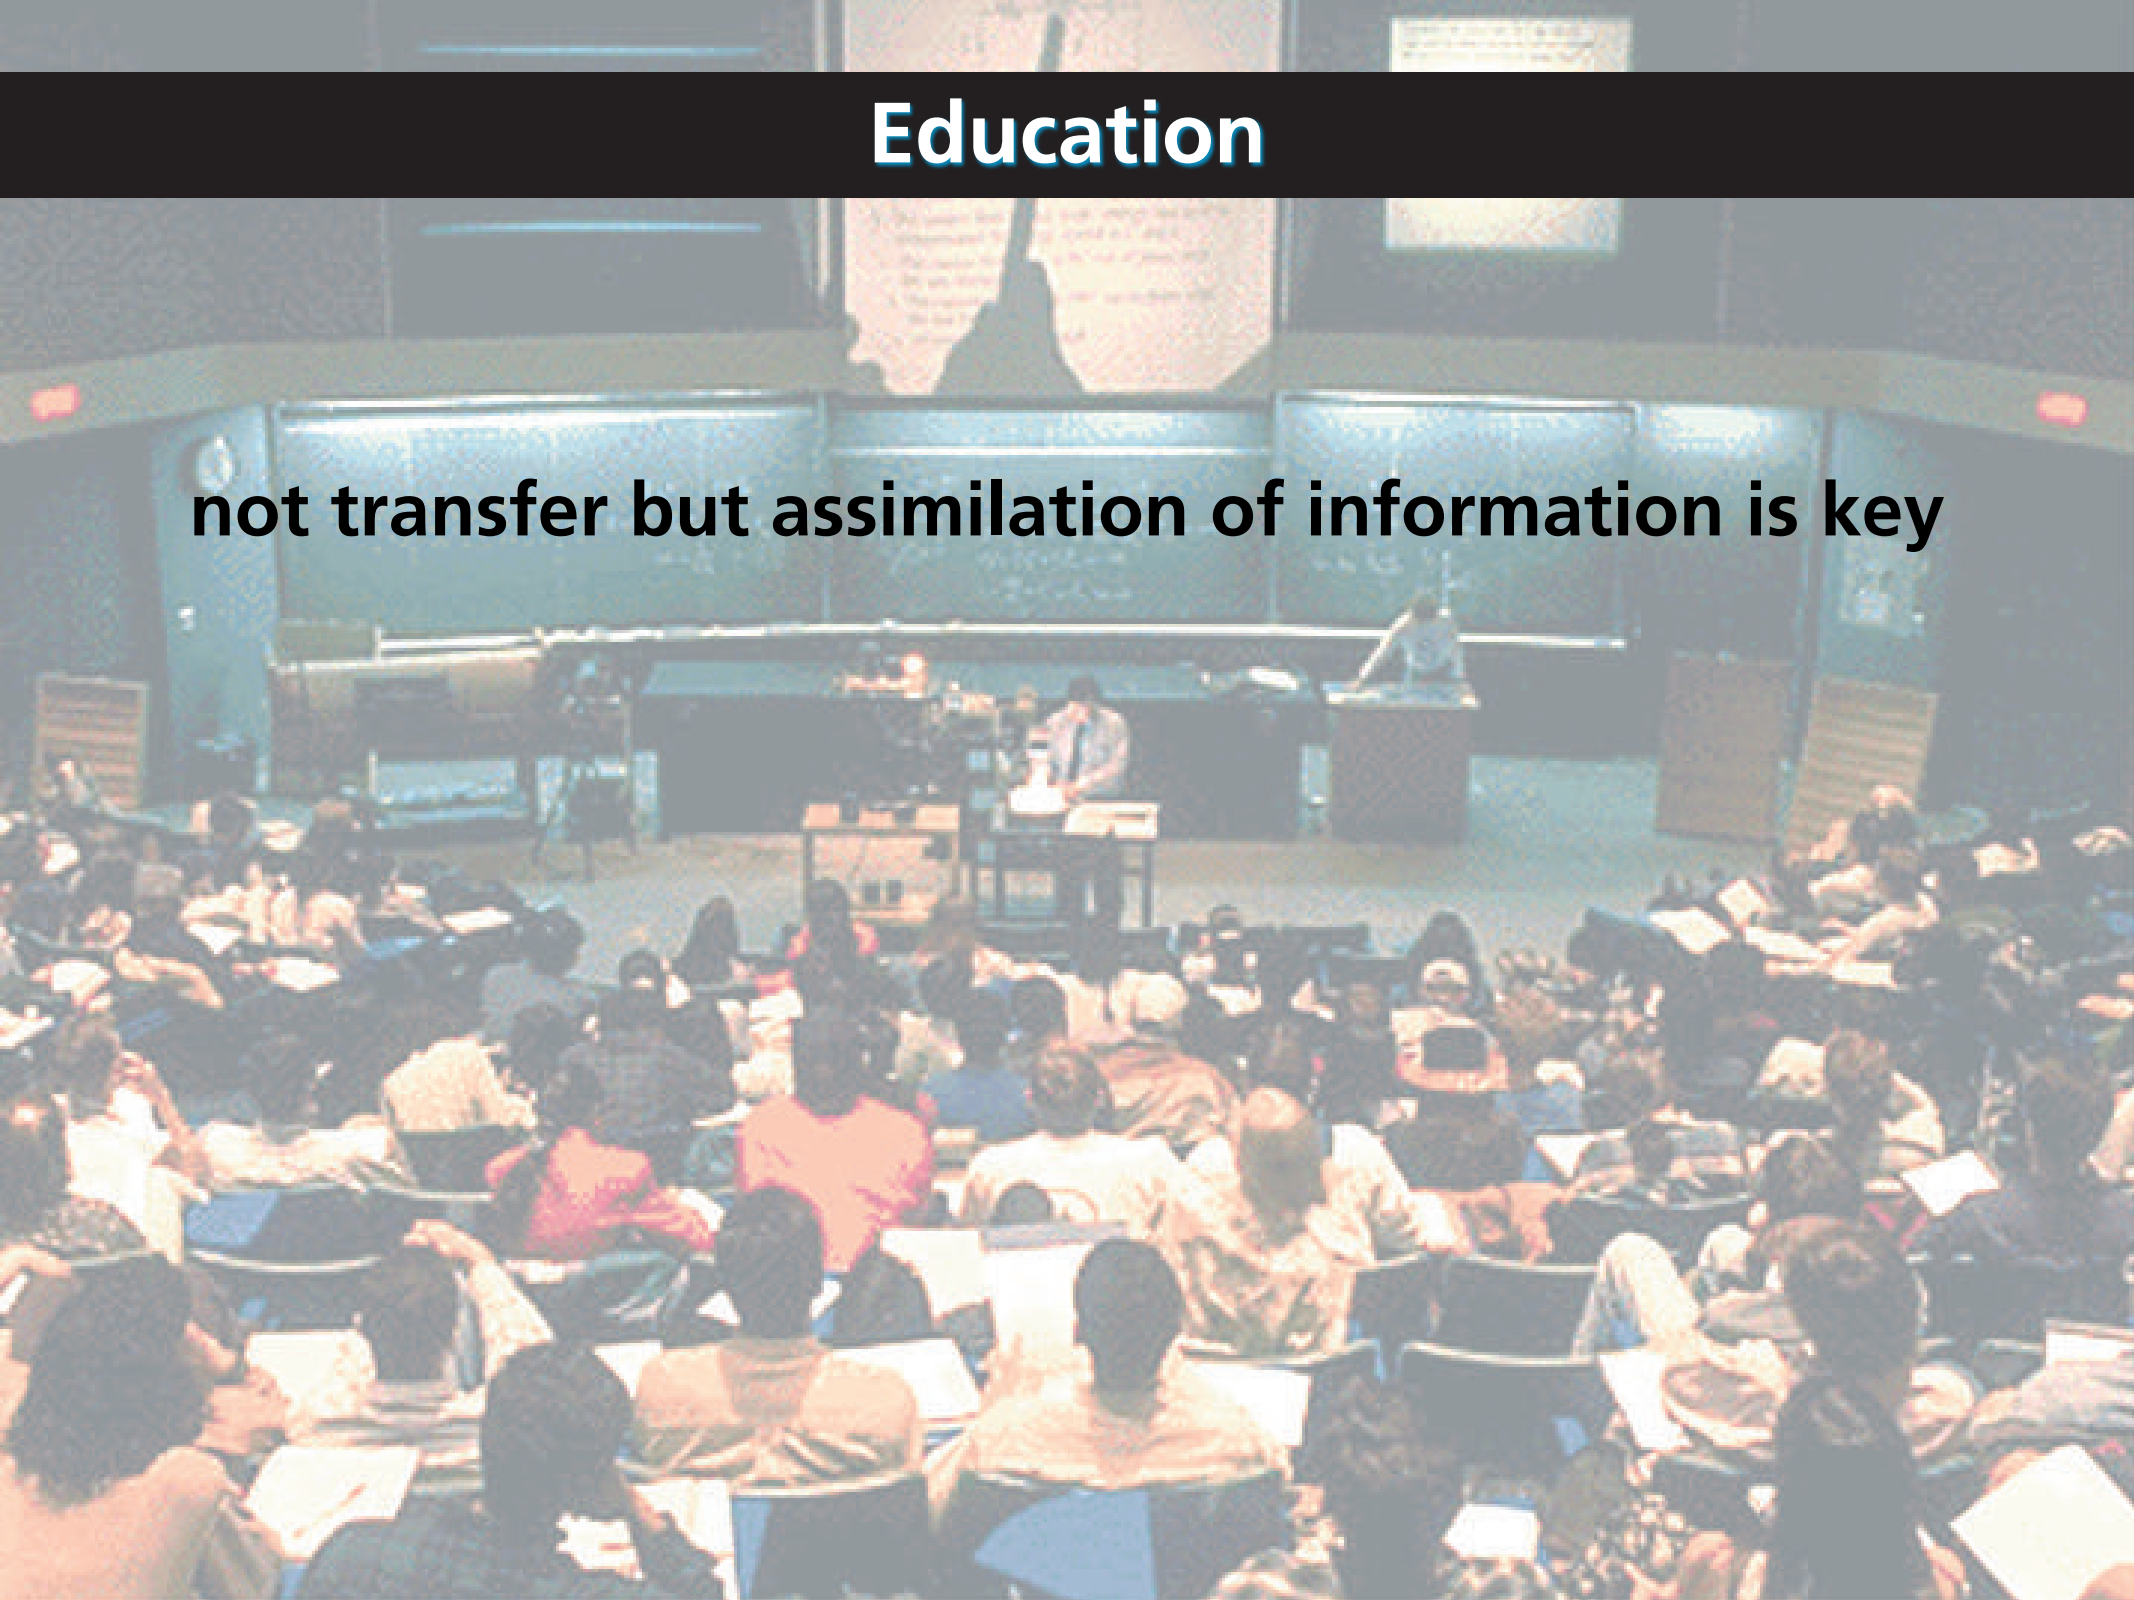

Education

only one quarter of maximum gain realized

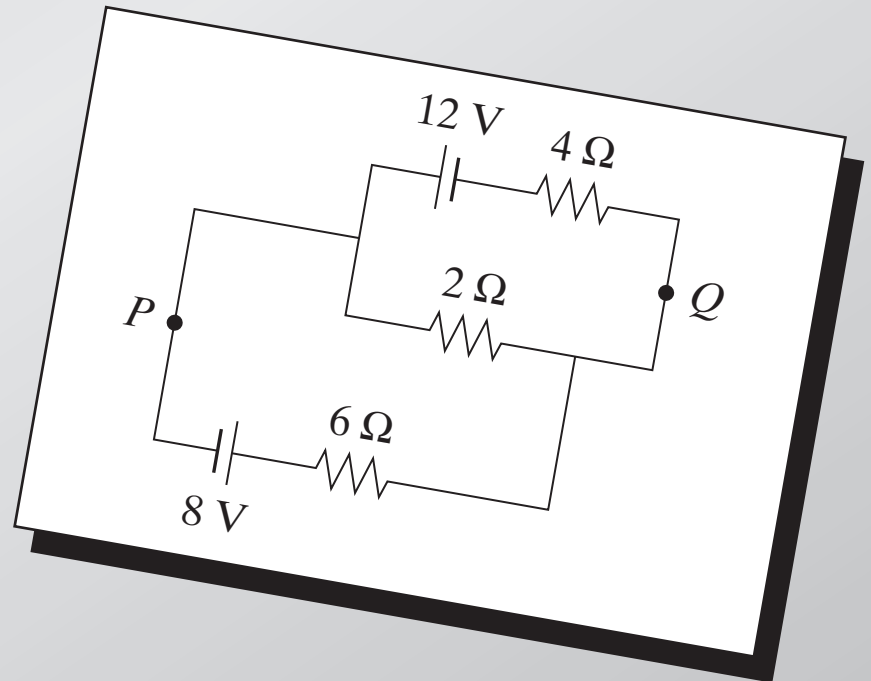

Education

not transfer but assimilation of information is key

Education

conventional problems misleading

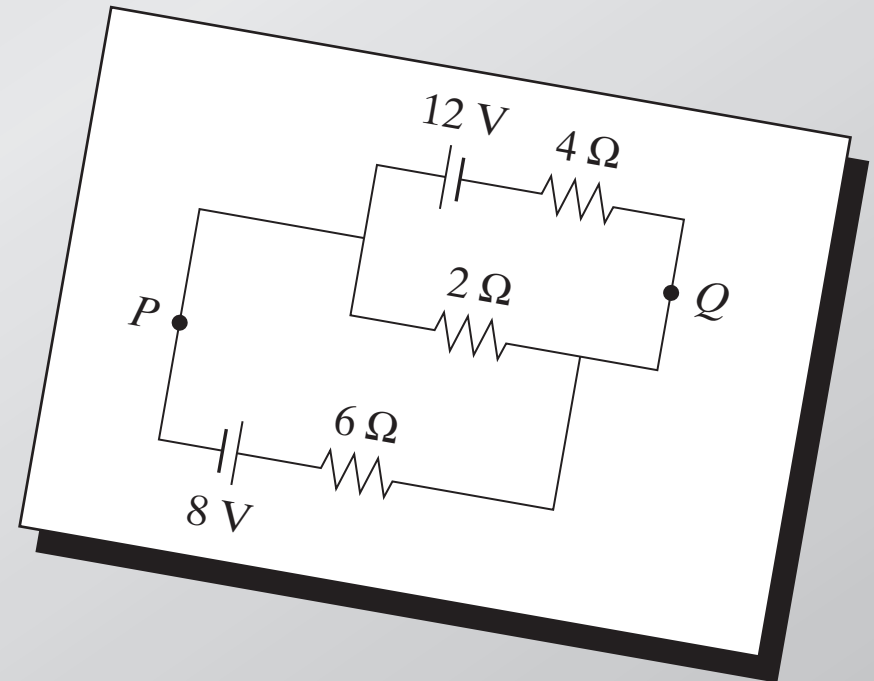

Education

conventional problems misleading

Calculate:

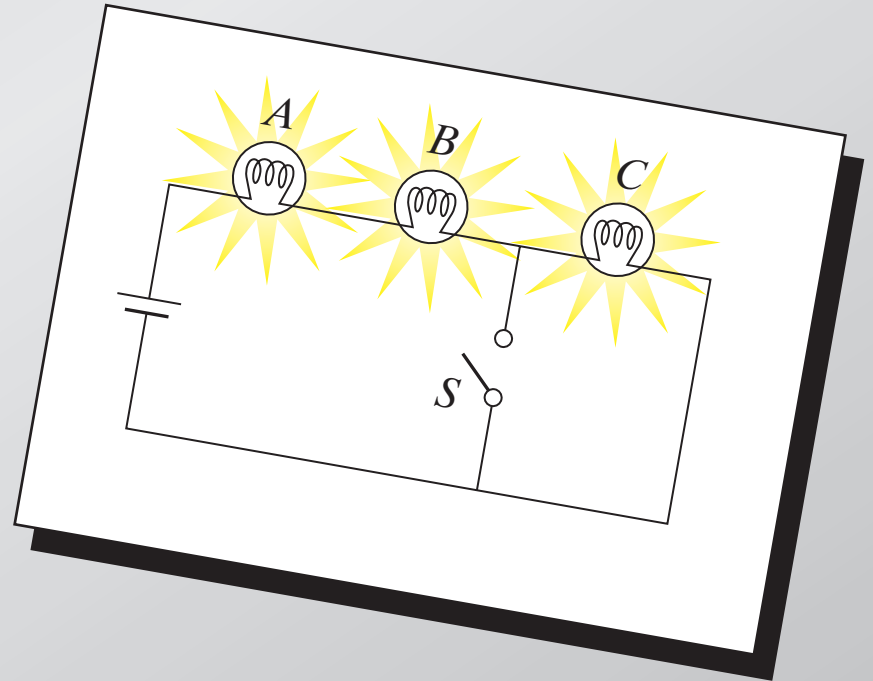

(a) current in 2- Ω resistor

(b) potential difference
between P and Q

Education

are the basic principles understood?

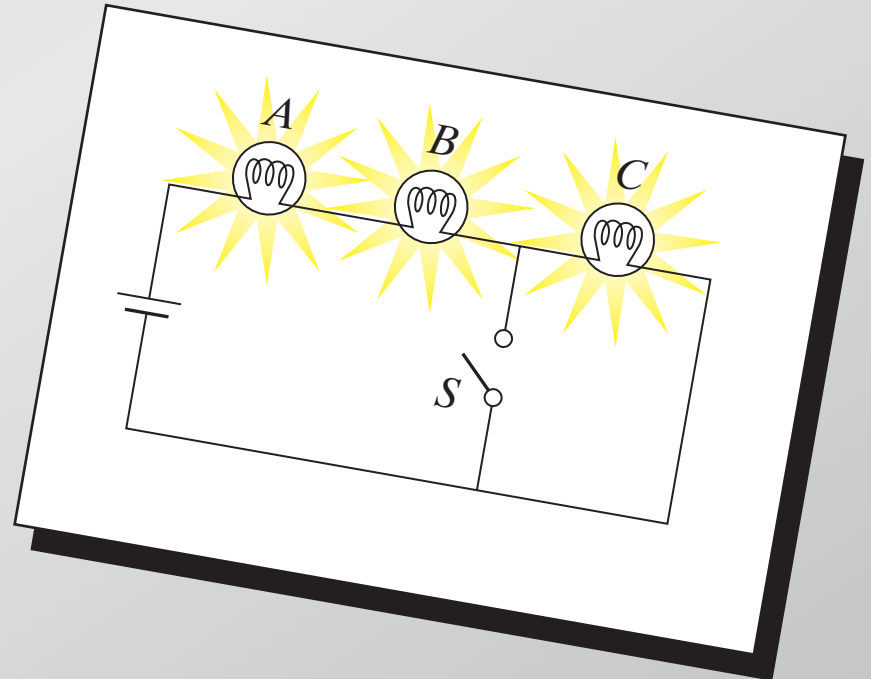

Education

are the basic principles understood?

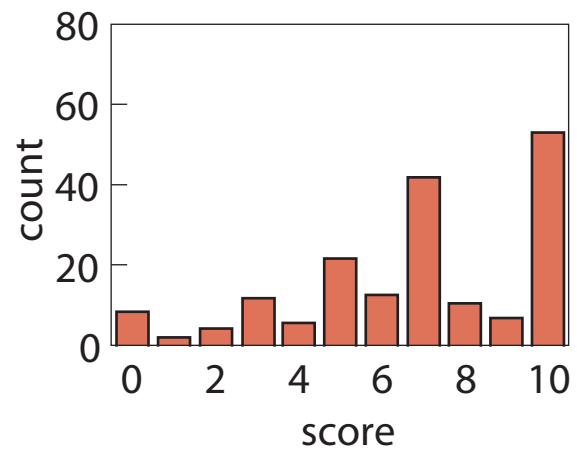

When S is closed, what happens to:

- (a) intensities of A and B ?
- (b) intensity of C ?
- (c) current through battery?
- (d) potential difference across
 A , B , and C ?
- (e) the total power dissipated?

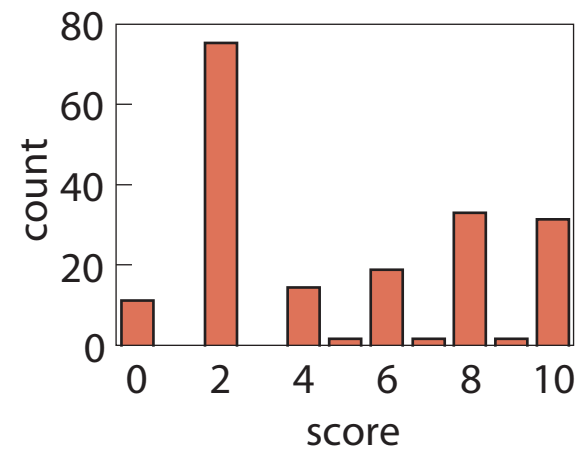

Education

conventional

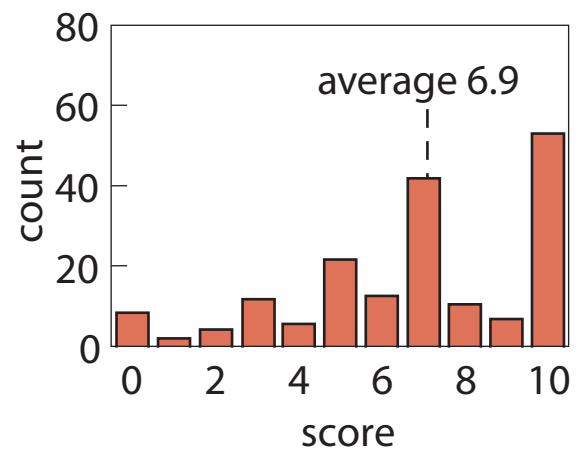

conceptual

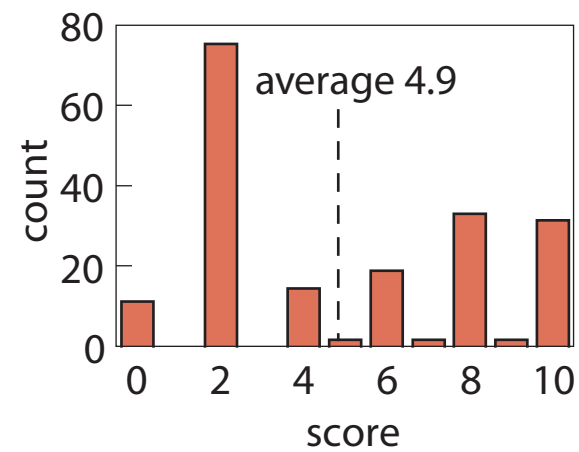

Education

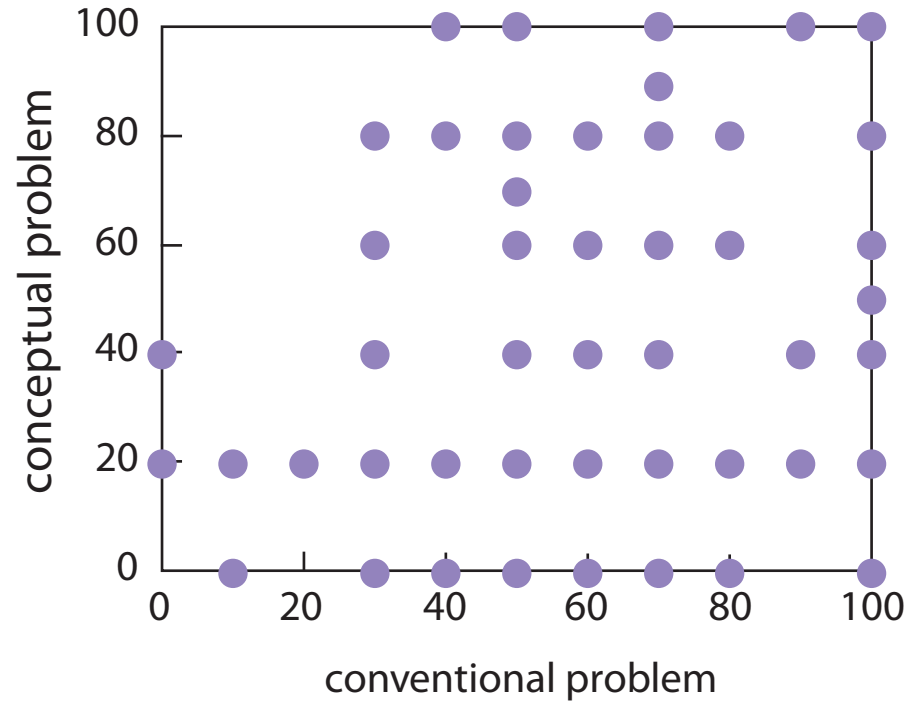

conventional

Education

Education

Summary

- **traditional indicators often misleading**
- **education more than transfer of information**

Summary

“The plural of anecdote is not data”

Lee Shulman
