

Confessions of a converted lecturer

Teaching Innovation Program Lecture
University of Mary Washington
Newark, DE, 13 March 2008

My message

shift focus from "teaching" to helping students learn

Education

Education

lectures focus on delivery of information

A wide-angle photograph of a large lecture hall. The room is filled with students seated at long desks, all facing towards the front. At the front of the room, a lecturer is standing at a podium, addressing the class. The walls are a deep blue color, and there are several large screens or posters displayed on the wall behind the lecturer. The lighting is somewhat dim, typical of a lecture hall.

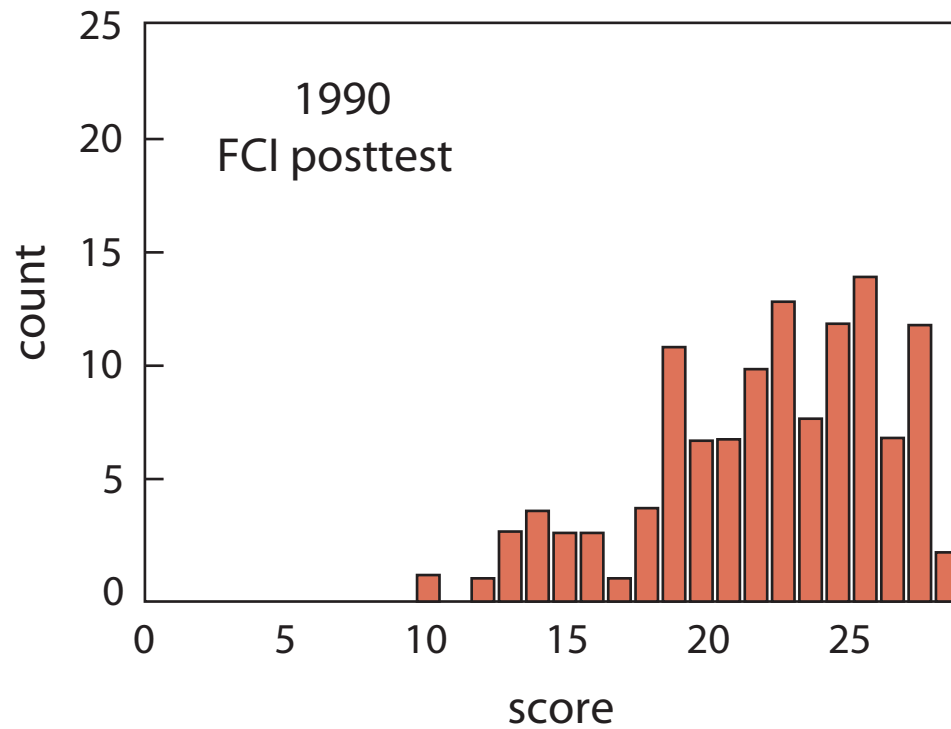

Education

education is not just information transfer

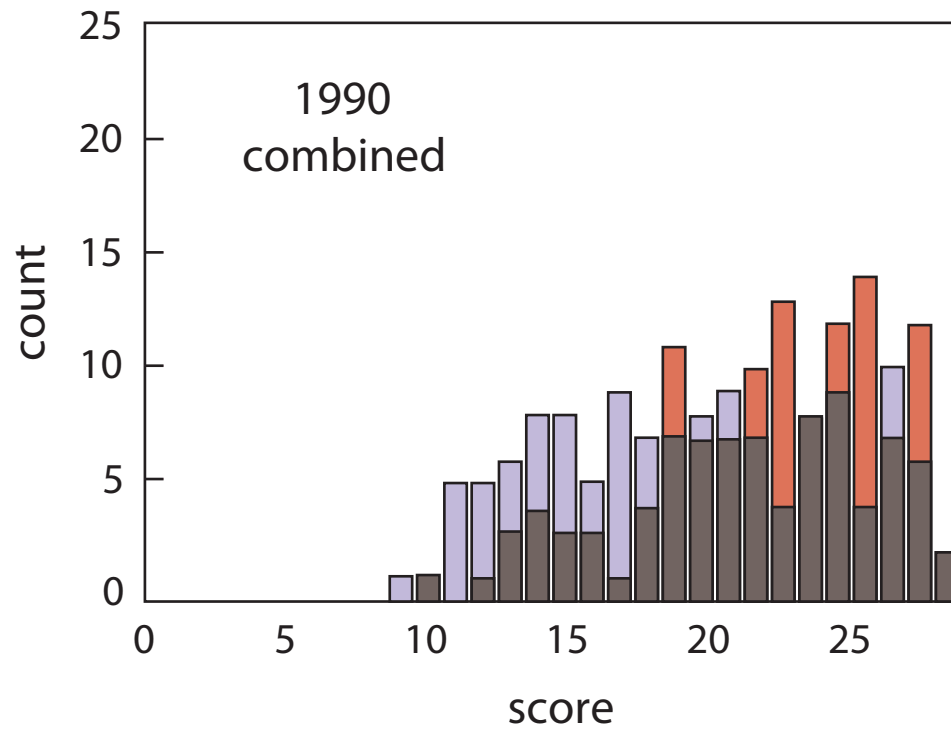

Education

education is not just information transfer

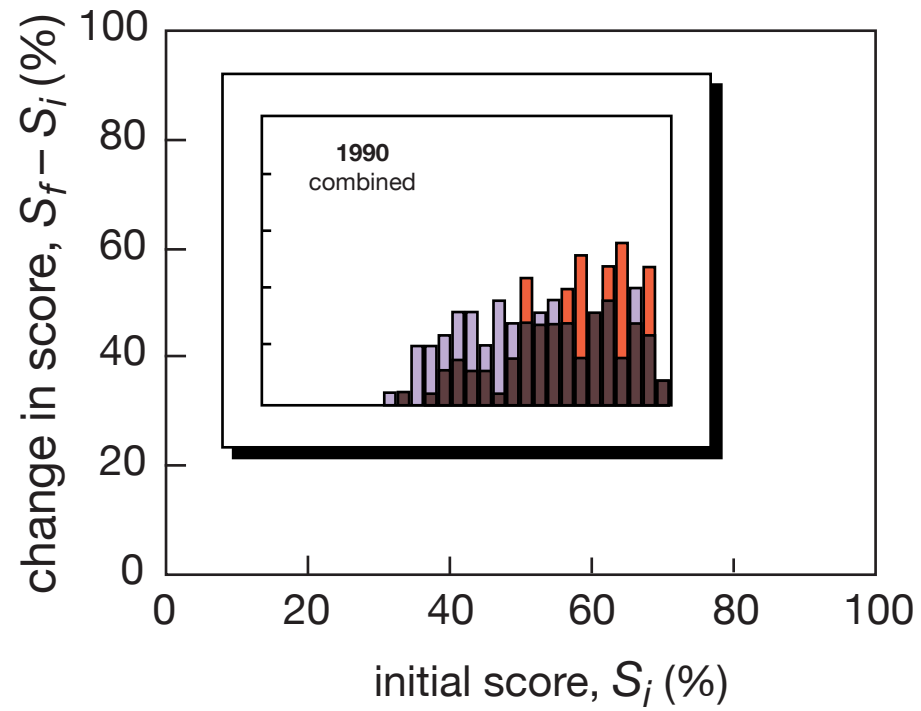

Education

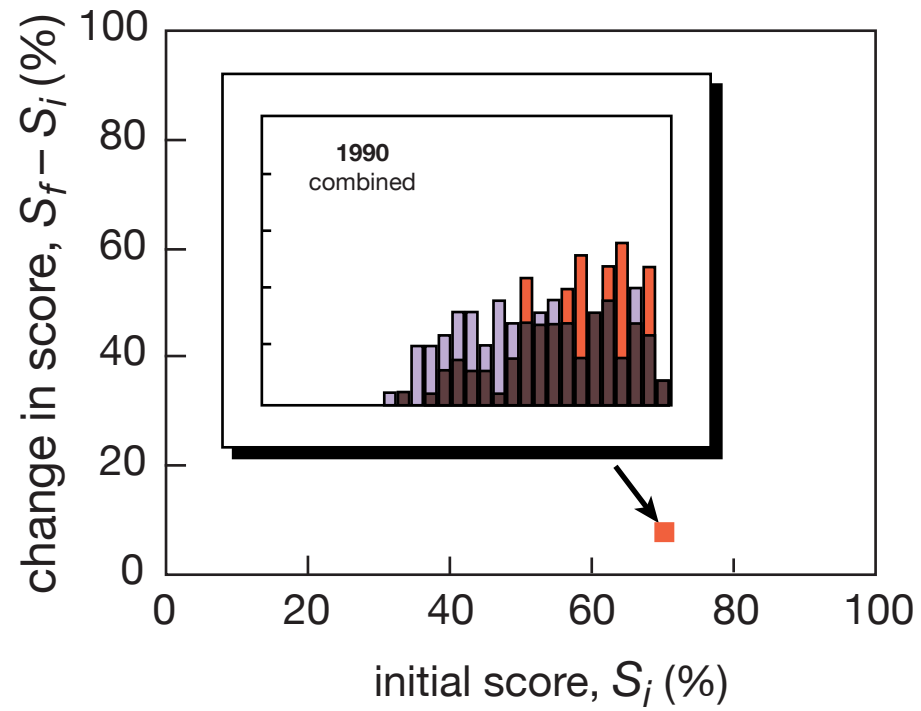

education is not just information transfer

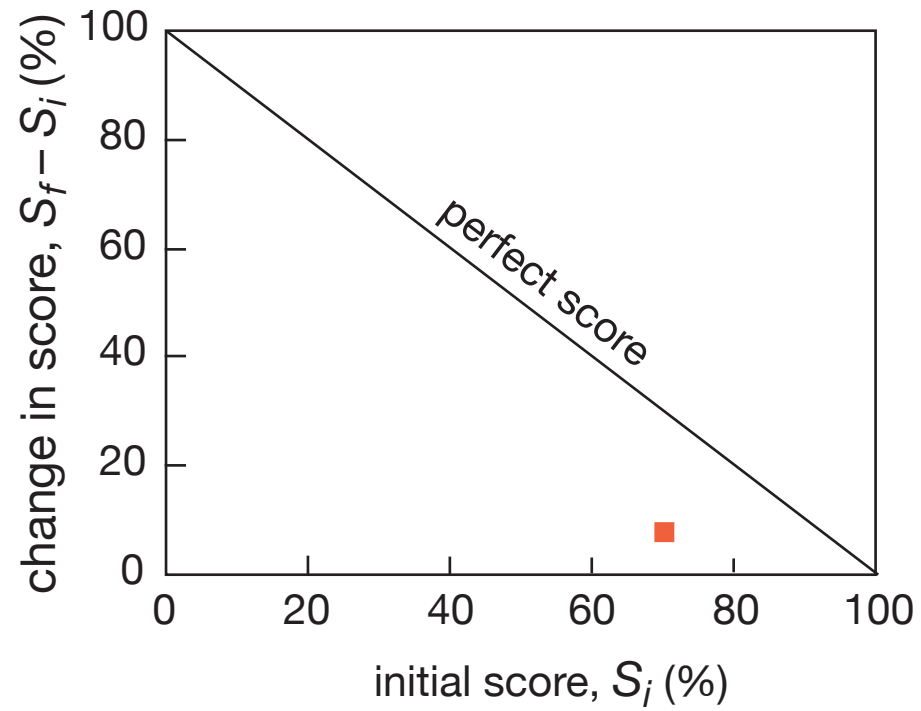

Education

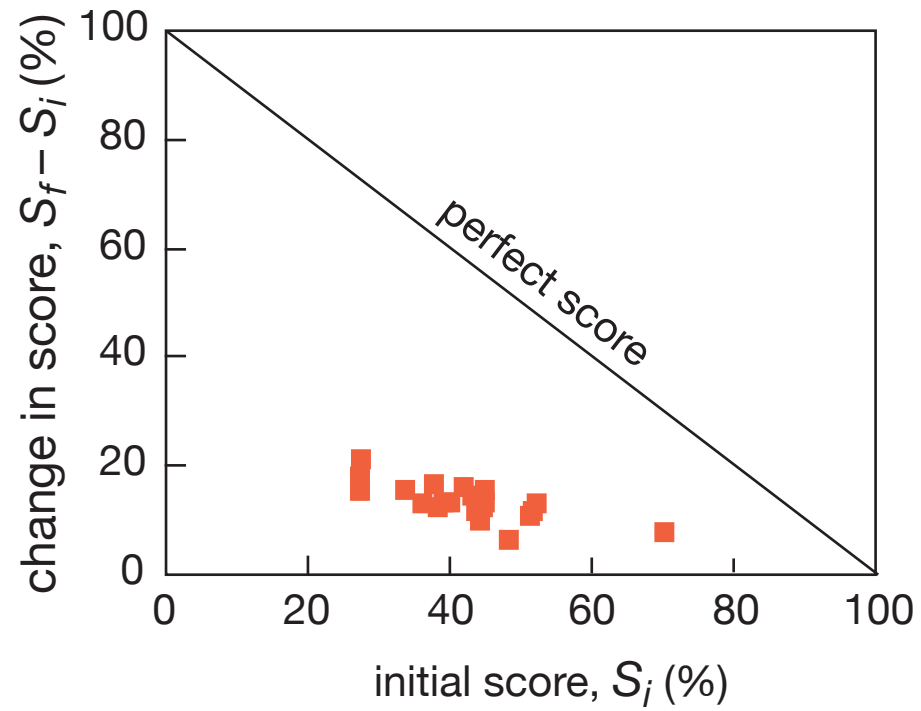

Education

Education

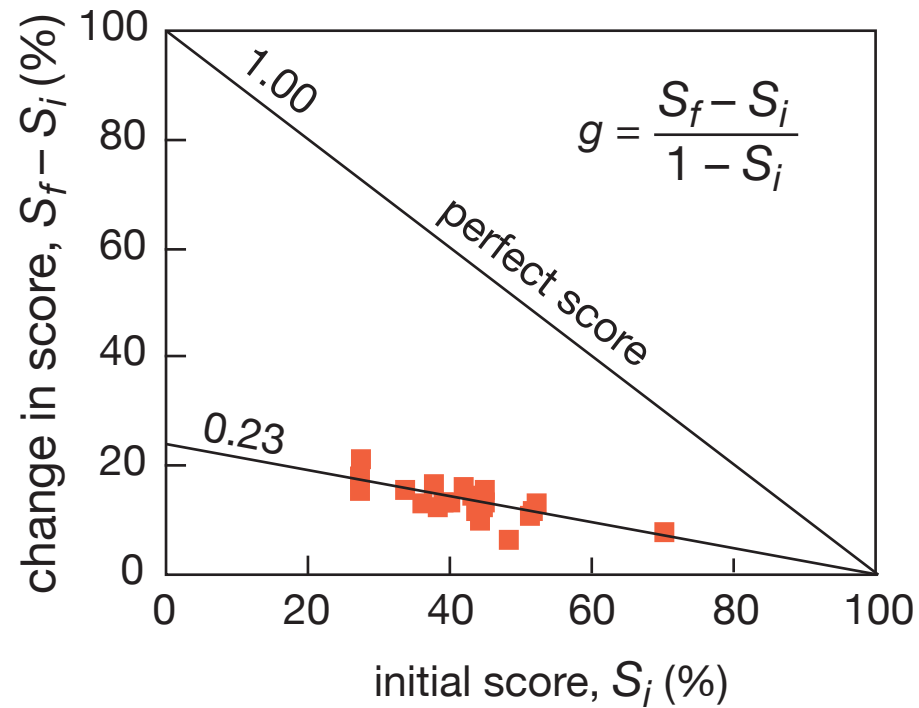

Education

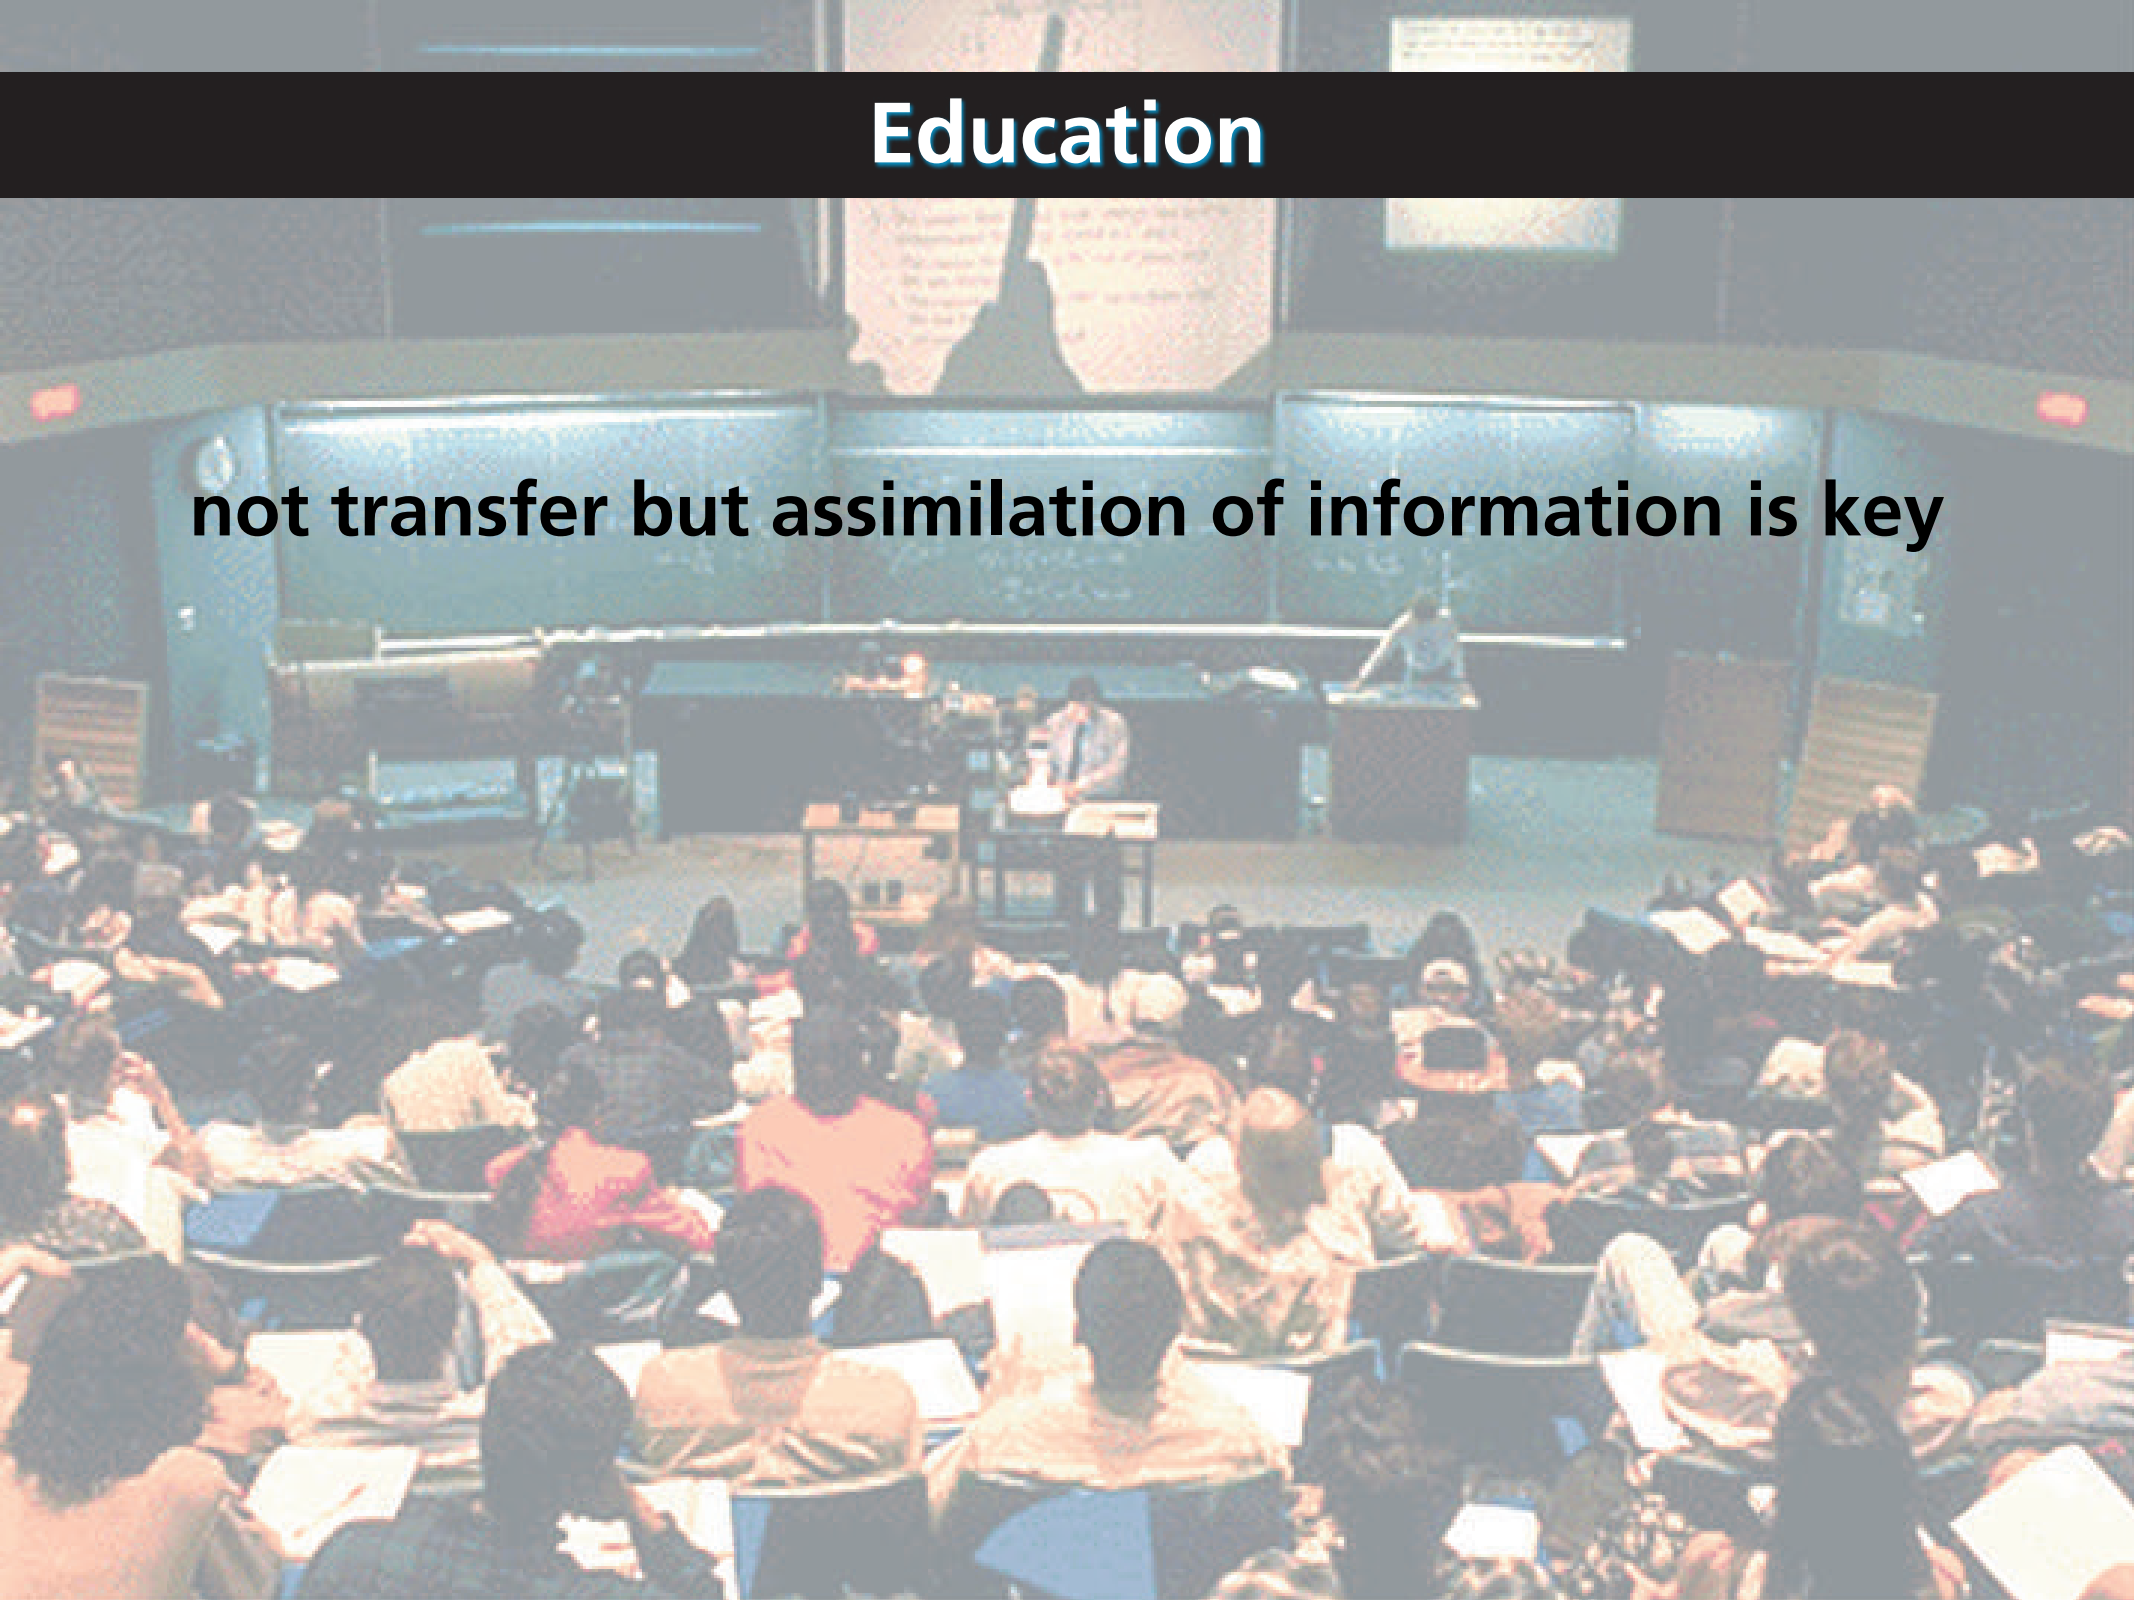

Education

only one quarter of maximum gain realized

Education

not transfer but assimilation of information is key

Education

conventional problems misleading

Education

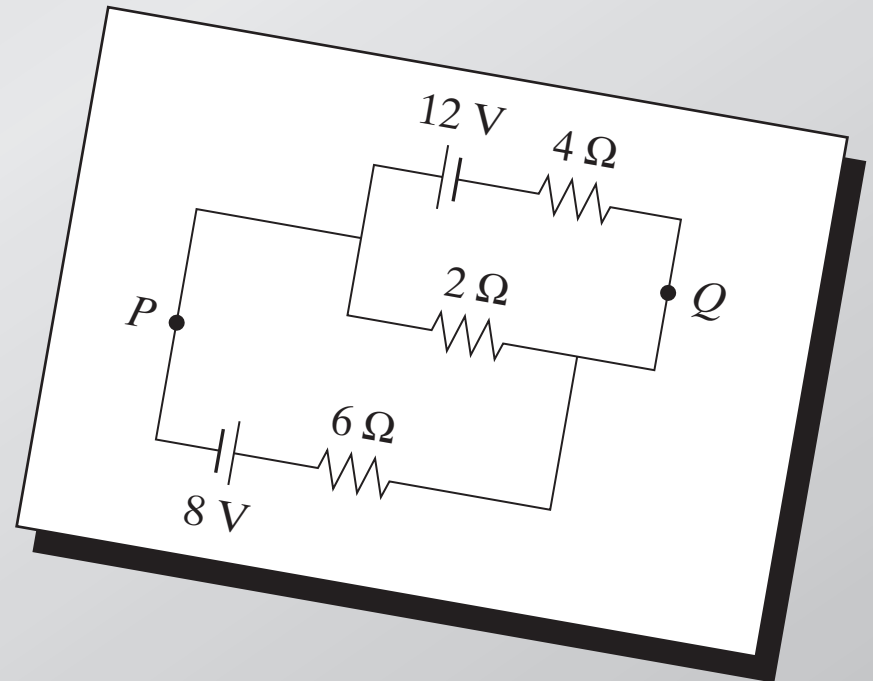

conventional problems misleading

Calculate:

(a) current in 2- Ω resistor

(b) potential difference

between P and Q

Education

are the basic principles understood?

Education

are the basic principles understood?

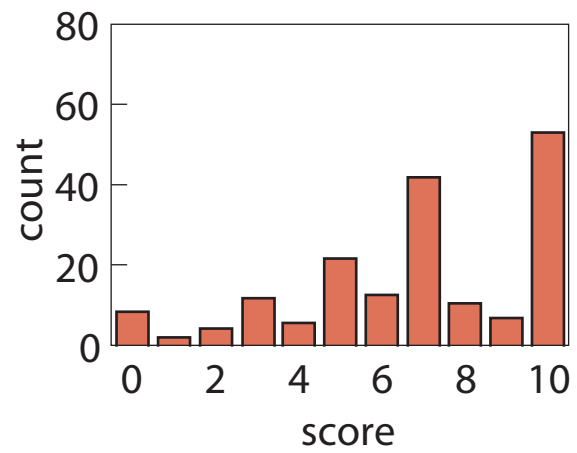

When S is closed, what happens to:

- (a) intensities of A and B ?
- (b) intensity of C ?
- (c) current through battery?
- (d) potential difference across
 A , B , and C ?
- (e) the total power dissipated?

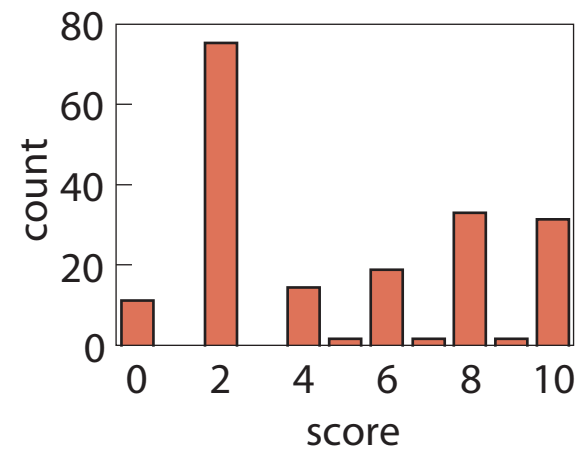

Education

Education

A large lecture hall with students seated at desks, facing a stage with a lecturer and a large screen displaying text. The text on the screen is partially legible and appears to be a list or a set of instructions. The room is dimly lit, with the stage area being the primary light source. The students are mostly seen from behind, looking towards the front of the room. The lecturer is standing at a podium on the stage, addressing the audience. The overall atmosphere is that of a formal academic setting.

So what should we do?

Peer Instruction

Give students more responsibility for gathering information...

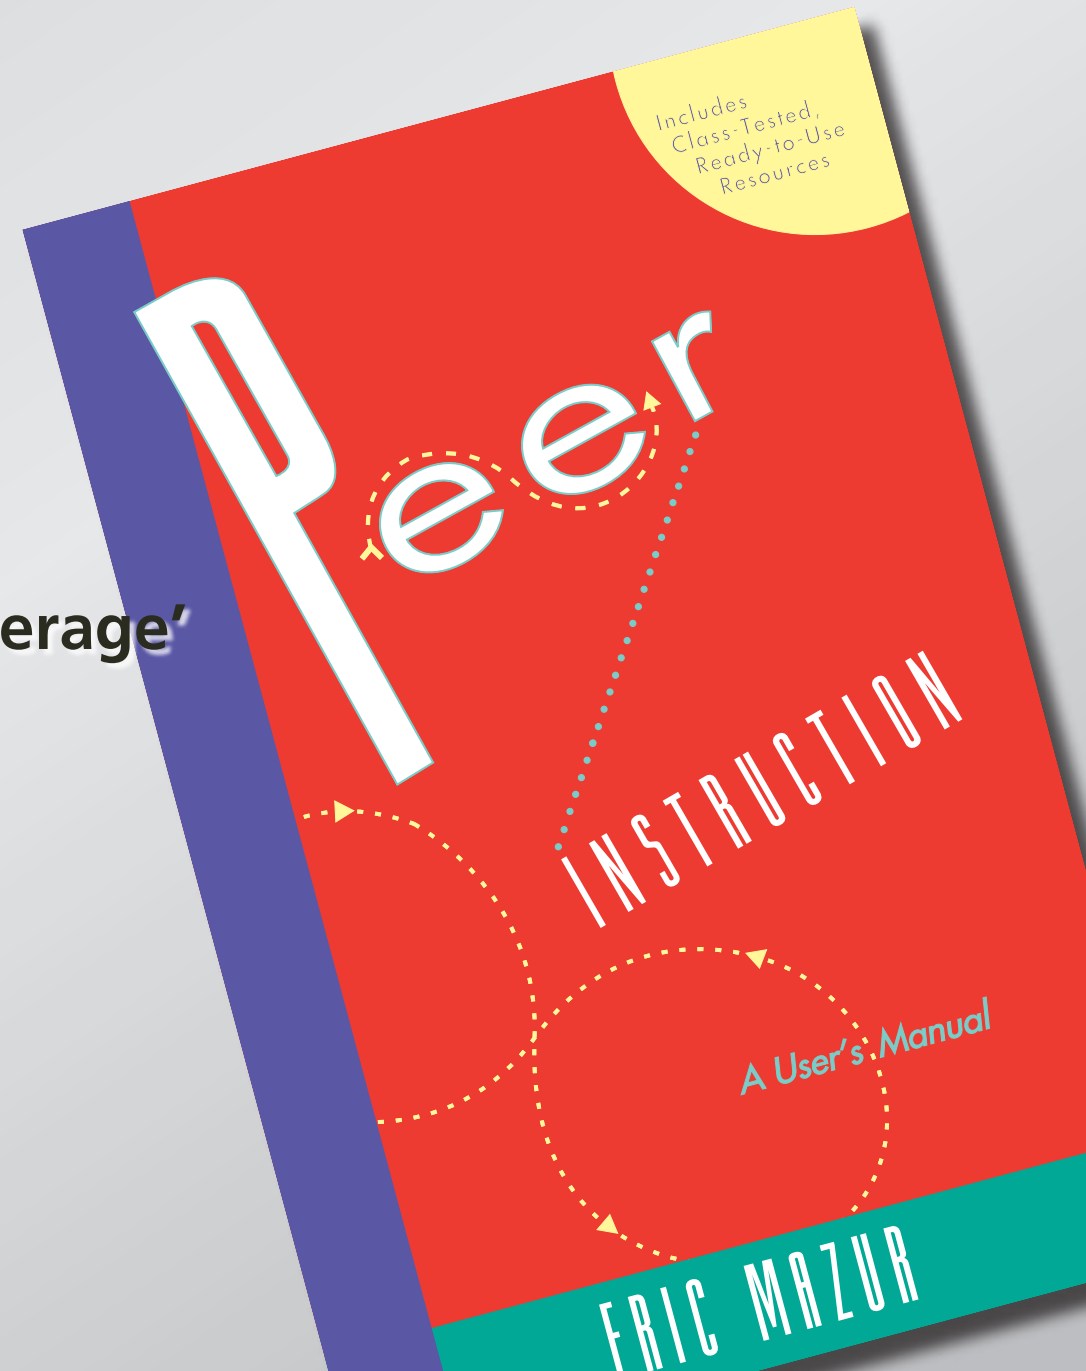

Peer Instruction

**Give students more responsibility for gathering information...
so we can better help them assimilate it.**

Peer Instruction

Main features:

- pre-class reading
- in-class: depth, not 'coverage'
- ConcepTests

Peer Instruction

ConcepTest:

- 1. Question**
- 2. Thinking**
- 3. Individual answer**
- 4. Peer discussion**
- 5. Revised/Group answer**
- 6. Explanation**

Results

is it any good?

Summary

**So better understanding leads to better
problem solving!**

Summary

So better understanding leads to better problem solving!

(but “good” problem solving doesn’t always indicate understanding!)
