

# Confessions of a converted lecturer

Science Education Lunch Seminar  
Yale University  
New Haven, CT, 24 April 2008

# My message

shift focus from "teaching" to helping students learn

# Outline

- Education

- Peer Instruction
- Results

# Education

# Education

lectures focus on delivery of information

A large lecture hall with students seated at desks, facing a stage where a lecturer is speaking. The room has blue walls and a large screen at the front. The text "Education" is overlaid at the top, and "lectures focus on delivery of information" is overlaid in the center.

# Education

education is not just information transfer

# Education

education is not just information transfer

# Education

education is not just information transfer

# Education

# Education

# Education

# Education

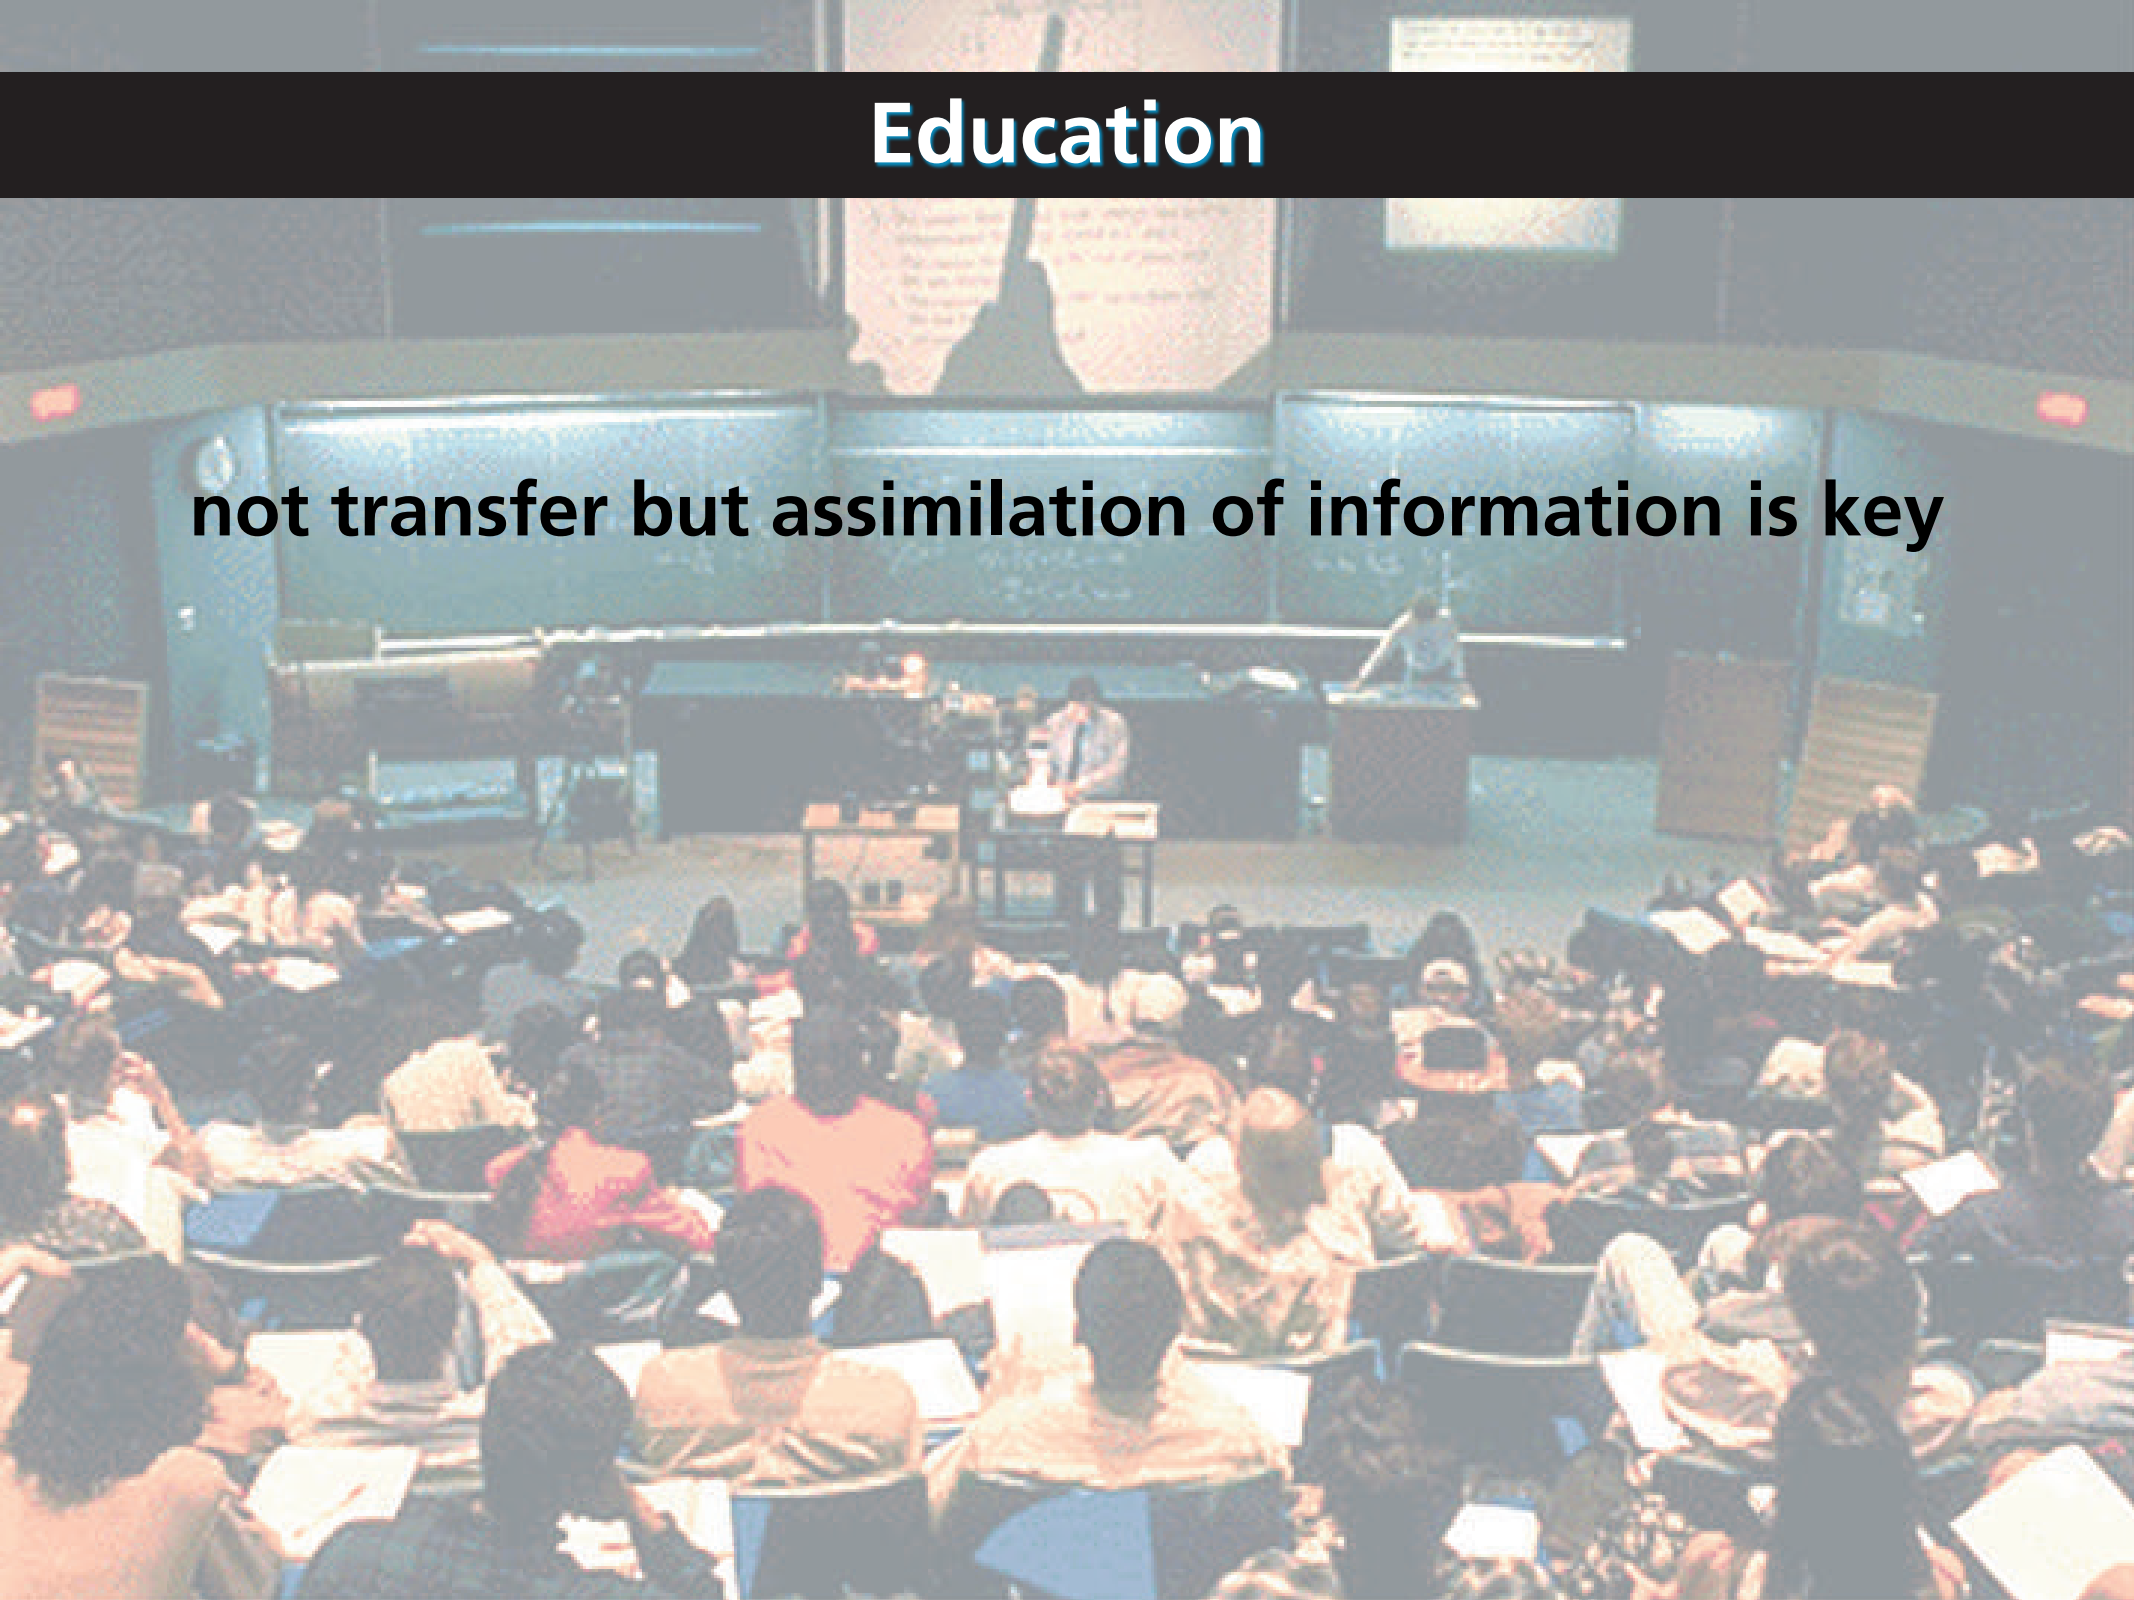

# Education

only one quarter of maximum gain realized

# Education

**not transfer but assimilation of information is key**

# Education

conventional problems misleading

# Education

conventional problems misleading

Calculate:

(a) current in 2- $\Omega$  resistor

(b) potential difference

between  $P$  and  $Q$

# Education

are the basic principles understood?

# Education

are the basic principles understood?

When  $S$  is closed, what happens to:

- (a) intensities of  $A$  and  $B$ ?
- (b) intensity of  $C$ ?
- (c) current through battery?
- (d) potential difference across  
 $A$ ,  $B$ , and  $C$ ?
- (e) the total power dissipated?

# Education

A large lecture hall with students seated at desks, facing a stage with a lecturer and a large screen displaying text. The text on the screen is partially legible and appears to be a list or a set of instructions. The room is dimly lit, with the stage area being the primary light source. The students are mostly seen from behind, looking towards the front of the room. The lecturer is standing at a podium on the stage, addressing the audience. The overall atmosphere is that of a formal academic setting.

So what should we do?

# Peer Instruction

**Give students more responsibility for gathering information...**

# Peer Instruction

**Give students more responsibility for gathering information...  
so we can better help them assimilate it.**

# Peer Instruction

## Main features:

- pre-class reading
- in-class: depth, not 'coverage'
- ConcepTests

# Peer Instruction

**ConcepTest:**

- 1. Question**
- 2. Thinking**
- 3. Individual answer**
- 4. Peer discussion**
- 5. Revised/Group answer**
- 6. Explanation**

# Results

is it any good?

# Results

## first year of implementing PI

# Results

**what about problem solving?**

# Results

# Results

# Results

# Summary

**So better understanding leads to better  
problem solving!**

# Summary

**So better understanding leads to better problem solving!**

**(but “good” problem solving doesn’t always indicate understanding!)**
