

Confessions of a converted lecturer

Active Learning in Engineering Education 2011 Meeting
Universidad de Chile
Santiago, Chile, 11 January 2011

My message

shift focus from “teaching” to helping students learn

Outline

Education

Education

lectures focus on delivery of information

Education

education is not just information transfer

Education

education is not just information transfer

Education

education is not just information transfer

Education

Education

Education

Education

R.R. Hake, *Am. J. Phys.* 66, 64 (1998)

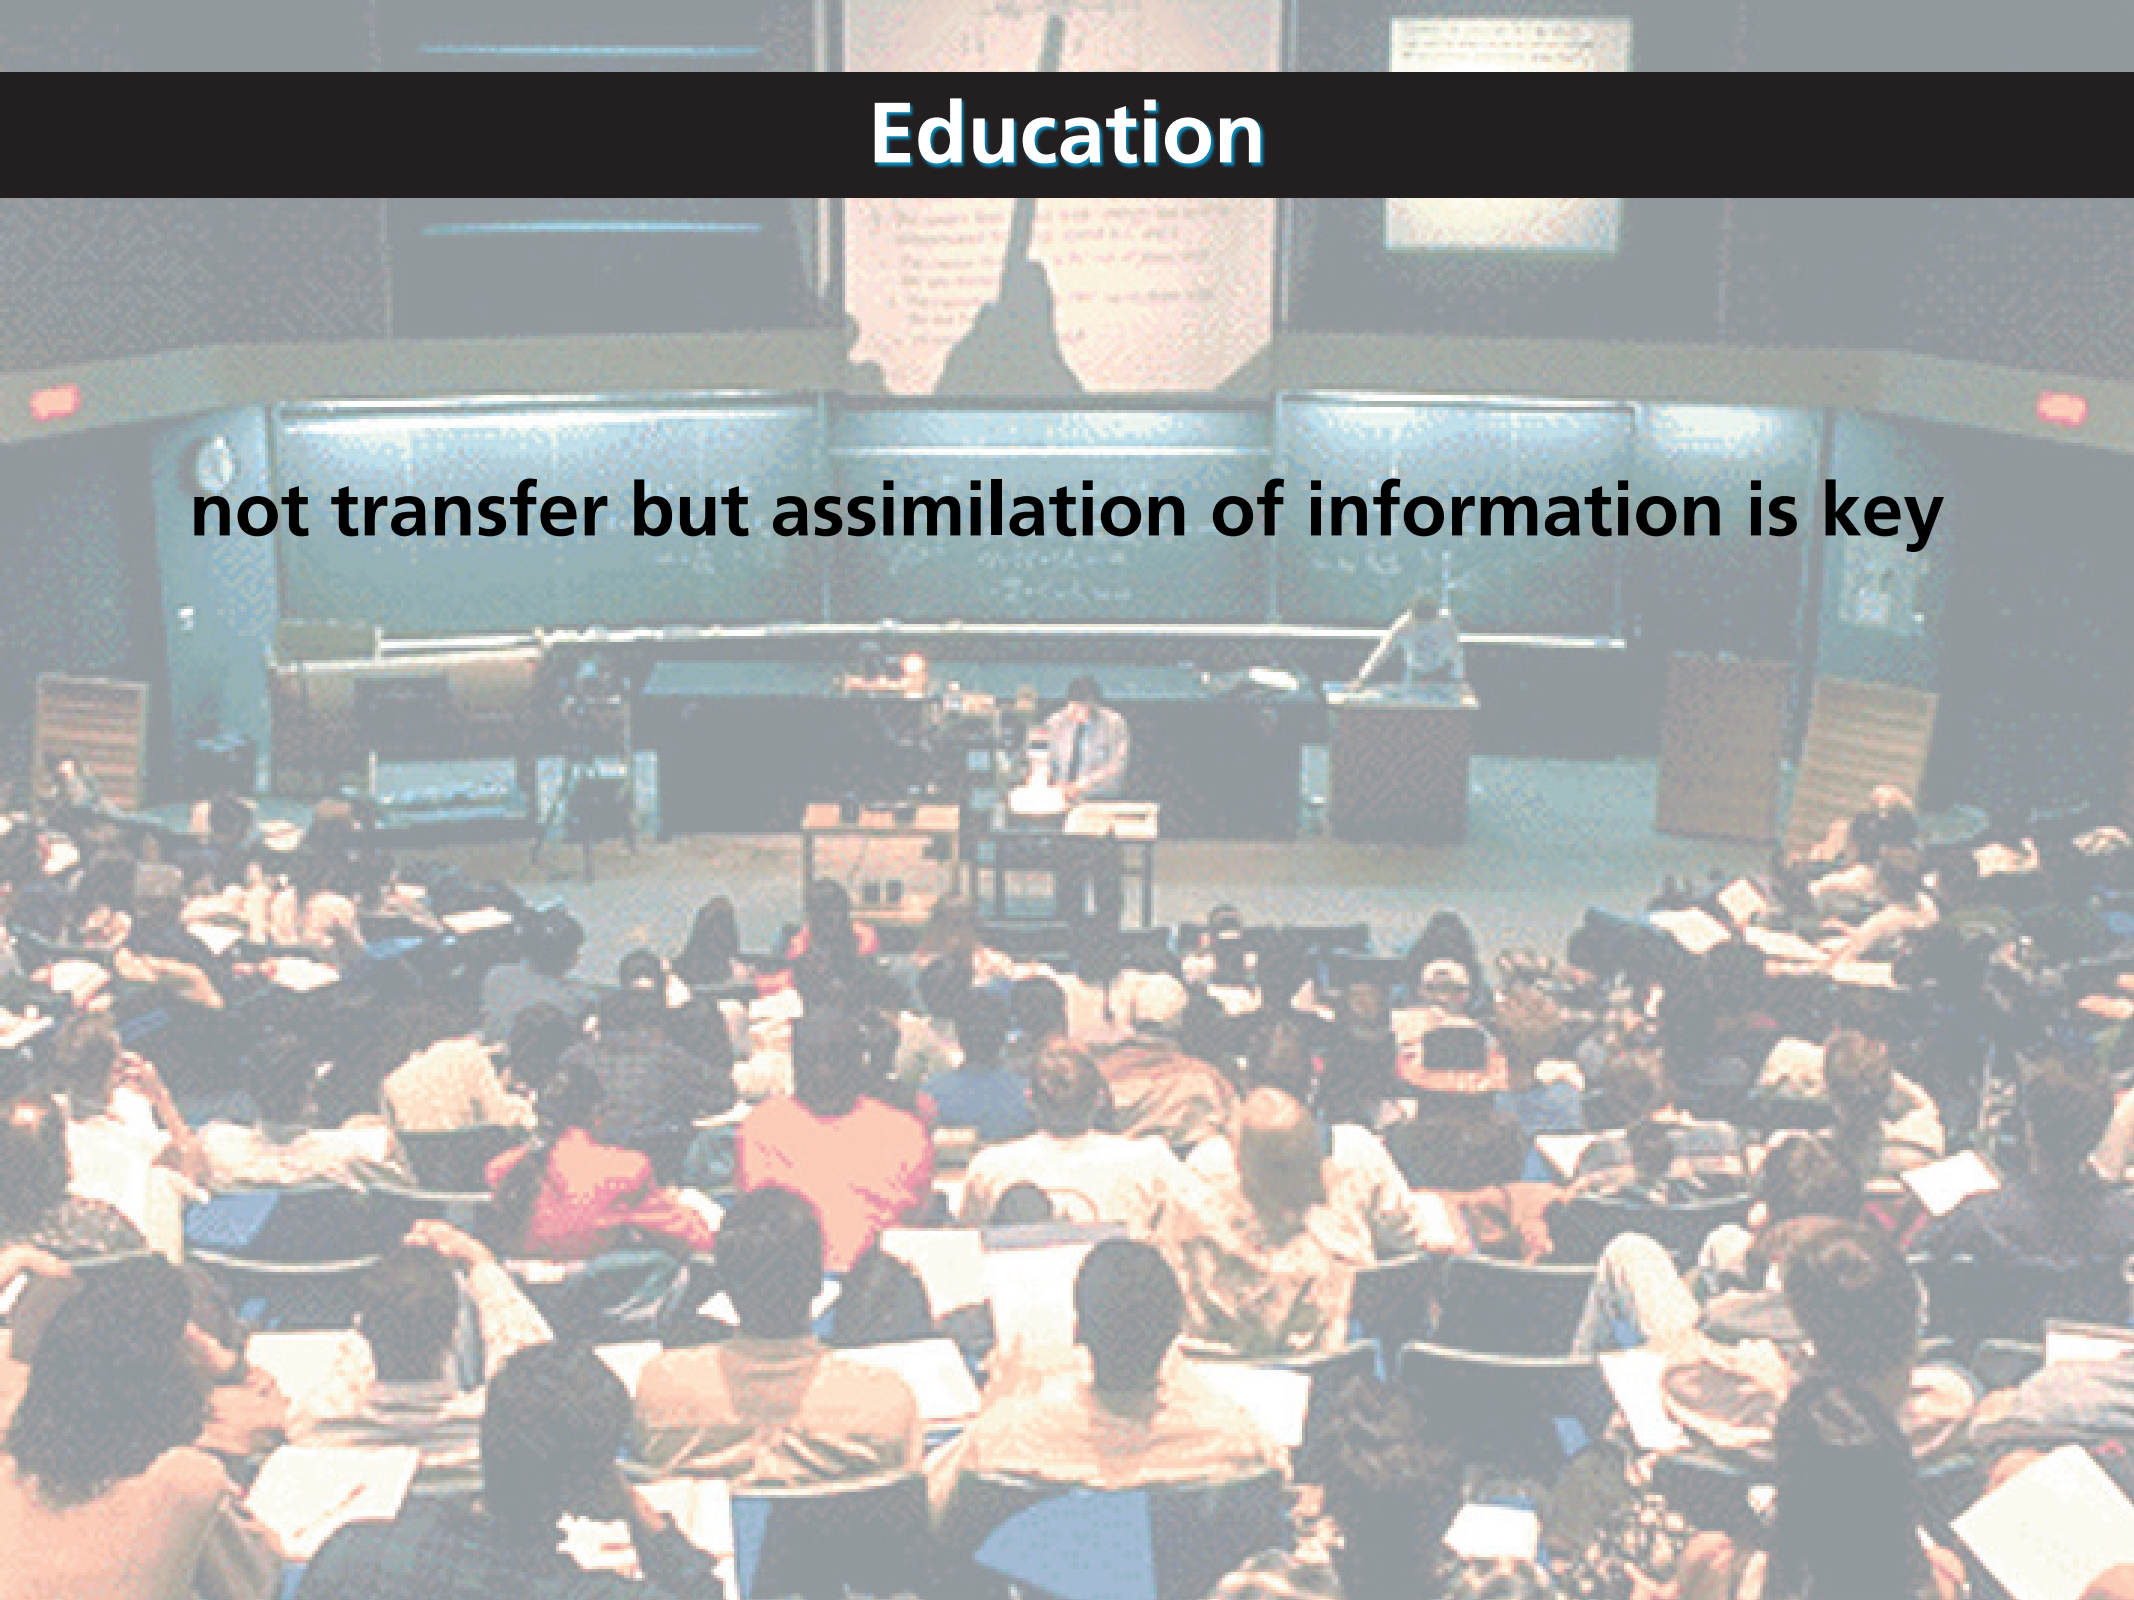

Education

only one quarter of maximum gain realized

Education

not transfer but assimilation of information is key

Education

conventional problems misleading

Education

conventional problems misleading

Calculate:

(a) current in $2\text{-}\Omega$ resistor

(b) potential difference
between P and Q

Education

are the basic principles understood?

Education

are the basic principles understood?

When S is closed, what happens to:

- (a) intensities of A and B ?
- (b) intensity of C ?
- (c) current through battery?
- (d) potential difference across
 A , B , and C ?
- (e) the total power dissipated?

Education

The image shows a large lecture hall from the perspective of the back of the room. Students are seated at long desks, facing a stage. A lecturer is standing at a podium on the stage, facing the audience. A large screen is visible on the stage, displaying text. The text on the screen is partially legible and appears to be a list of items. The text on the screen is as follows:

What are the following components of a system?

- 1. The system is a set of components that are interconnected by a network of communication links.
- 2. The system is a set of components that are interconnected by a network of communication links.
- 3. The system is a set of components that are interconnected by a network of communication links.
- 4. The system is a set of components that are interconnected by a network of communication links.
- 5. The system is a set of components that are interconnected by a network of communication links.

So what should we do?

Peer Instruction

Give students more responsibility for gathering information...

Peer Instruction

**Give students more responsibility for gathering information...
so we can better help them assimilate it.**

Peer Instruction

Main features:

- pre-class reading
- in-class: depth, not 'coverage'
- ConcepTests

Peer Instruction

ConcepTest:

- 1. Question**
- 2. Thinking**
- 3. Individual answer**
- 4. Peer discussion**
- 5. Revised/Group answer**
- 6. Explanation**

Peer Instruction: a primer

Let's try it!

When metals heat up, they expand because all atoms get farther away from each other.

Let's try it!

When metals heat up, they expand because all atoms get farther away from each other.

Let's try it!

Consider a rectangular metal plate with a circular hole in it.

Let's try it!

Consider a rectangular metal plate with a circular hole in it.

When the plate is uniformly heated, the diameter of the hole

1. increases.
2. stays the same.
3. decreases.

Let's try it!

It's easy to fire up the audience!

Let's try it!

Consider a rectangular metal plate with a circular hole in it.

When the plate is uniformly heated, the diameter of the hole

1. increases.
2. stays the same.
3. decreases.

Let's try it!

Consider a rectangular metal plate with a circular hole in it.

When the plate is uniformly heated, the diameter of the hole

1. increases. ✓
2. stays the same.
3. decreases.

Let's try it!

remember: all atoms must get farther away from each other!

Let's try it!

remember: all atoms must get farther away from each other!

Let's try it!

consider the atoms at the rim of the hole

Let's try it!

consider the atoms at the rim of the hole

Let's try it!

consider the atoms at the rim of the hole

Let's try it!

consider the atoms at the rim of the hole

Setting the stage

What constitutes a good problem?

Let's try it!

Imagine a rope that fits snugly along the equator.

Let's try it!

Imagine a rope that fits snugly along the equator.

Suppose the rope is cut and 1 m of rope is inserted between the cut ends. If the rope were to maintain a circular shape, how far off the surface of the Earth would it float?

1. the width of a few atoms
2. the width of a few hairs
3. the height of a curb
4. exactly 1 m
5. more than 1 m

Let's try it!

Imagine a rope that fits snugly along the equator.

Suppose the rope is cut and 1 m of rope is inserted between the cut ends. If the rope were to maintain a circular shape, how far off the surface of the Earth would it float?

1. the width of a few atoms
2. the width of a few hairs
3. the height of a curb ✓
4. exactly 1 m
5. more than 1 m

Let's try it!

circumference at equator:

$$2\pi R_E$$

Let's try it!

circumference at equator:

$$2\pi R_E$$

new circumference:

$$2\pi R_E + 1 \text{ m}$$

Let's try it!

circumference at equator:

$$2\pi R_E$$

new circumference:

$$2\pi R_E + 1 \text{ m}$$

radius of circle with new circumference:

$$2\pi R = 2\pi R_E + 1 \text{ m}, \quad \text{and so} \quad R = R_E + \frac{1 \text{ m}}{2\pi}.$$

Let's try it

Which of the following airlines tries to save fuel by suggesting that its passengers use the bathroom before boarding?

- 1. Delta Airlines**
- 2. Lufthansa**
- 3. All Nippon Airways**
- 4. British Midland Airways**
- 5. Air France**
- 6. JAL**
- 7. Aboriginal Air Services**
- 8. Aeroflot**
- 9. Are you kidding me? None of the above.**

Let's try it!

Which of the following airlines tries to save fuel by suggesting that its passengers use the bathroom before boarding?

1. Delta Airlines
2. Lufthansa
3. **All Nippon Airways** ✓
4. British Midland Airways
5. Air France
6. JAL
7. Aboriginal Air Services
8. Aeroflot
9. Are you kidding me? None of the above.
