ZnO:non-toxic, wide bandgap semiconductor

A photograph of a petri dish containing a white, granular sample of Zinc Oxide (ZnO). The sample is irregularly shaped and appears to be a powder or small crystals. It is placed on a dark, textured surface, likely a laboratory bench. The petri dish itself is clear and shallow.

Points to keep in mind:

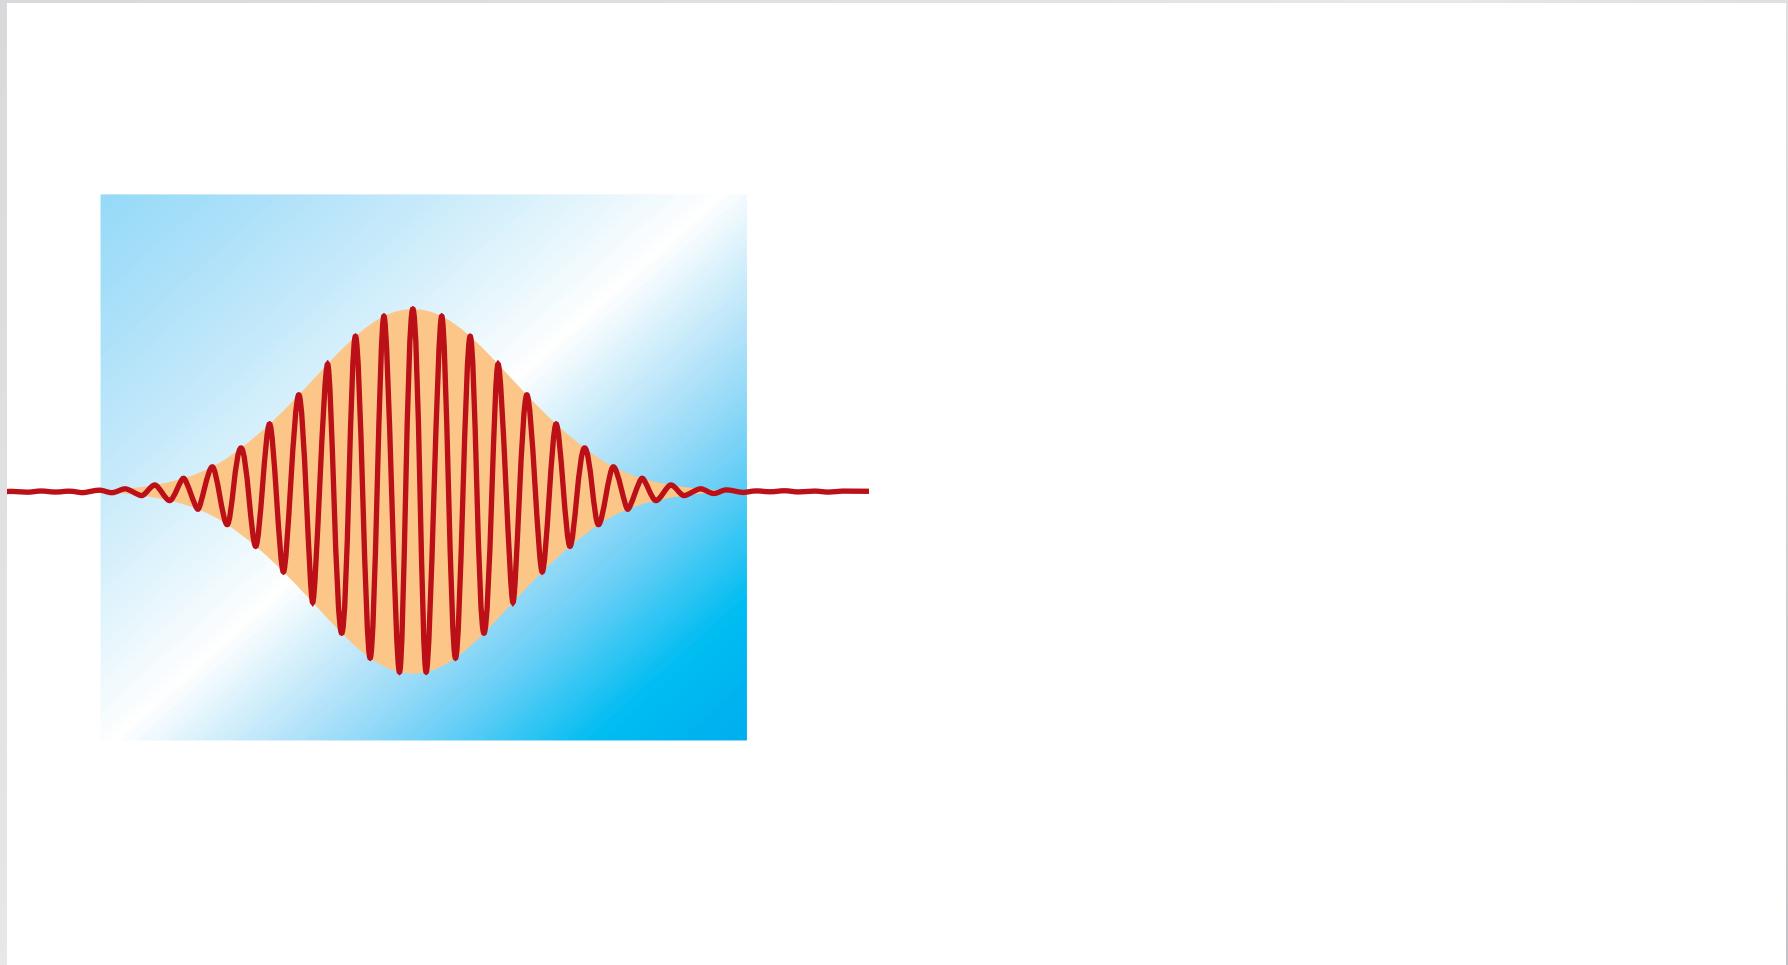

- low-loss guiding
- convenient evanescent coupling
- attached to ordinary fiber

Outline

- manipulating light at the nanoscale
- supercontinuum generation
- optical logic gates

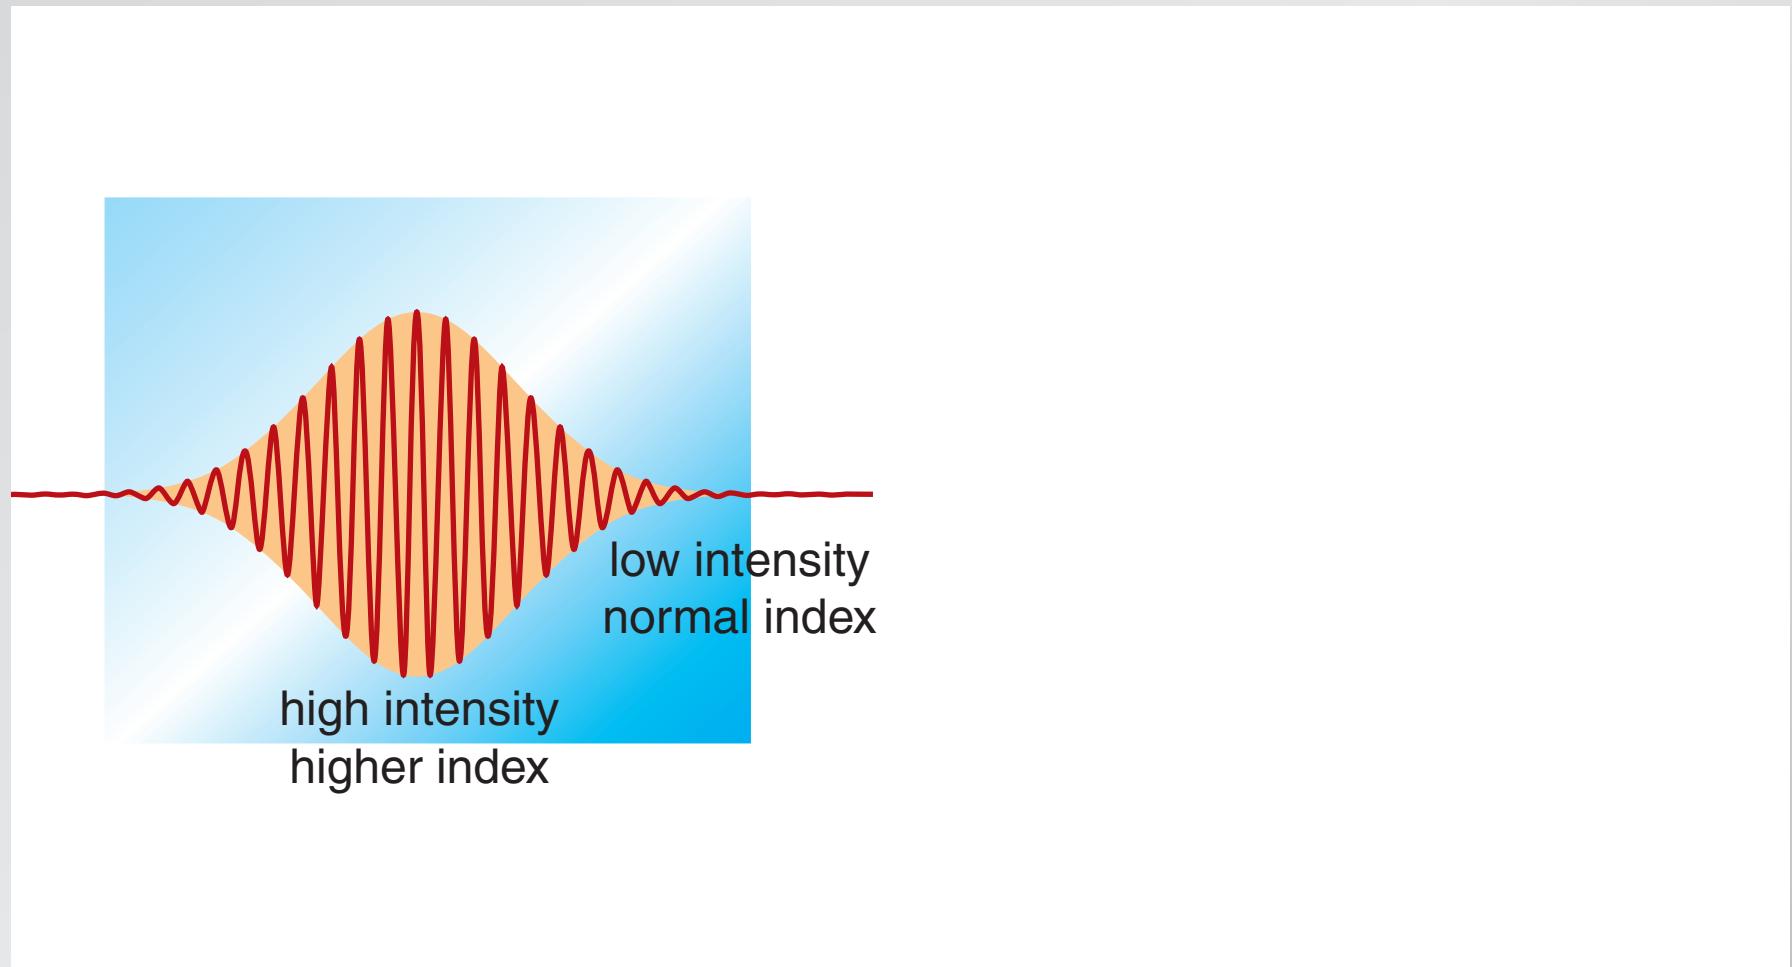

Supercontinuum generation
