

Confessions of a converted lecturer

The Zurich Physics Colloquium
ETH Zürich
Zürich, Switzerland 22 February 2012

My message

shift focus from “teaching” to helping students learn

Education

Education

lectures focus on delivery of information

Education

education is not just information transfer

Education

education is not just information transfer

Education

education is not just information transfer

Education

Education

Education

R.R. Hake, *Am. J. Phys.* 66, 64 (1998)

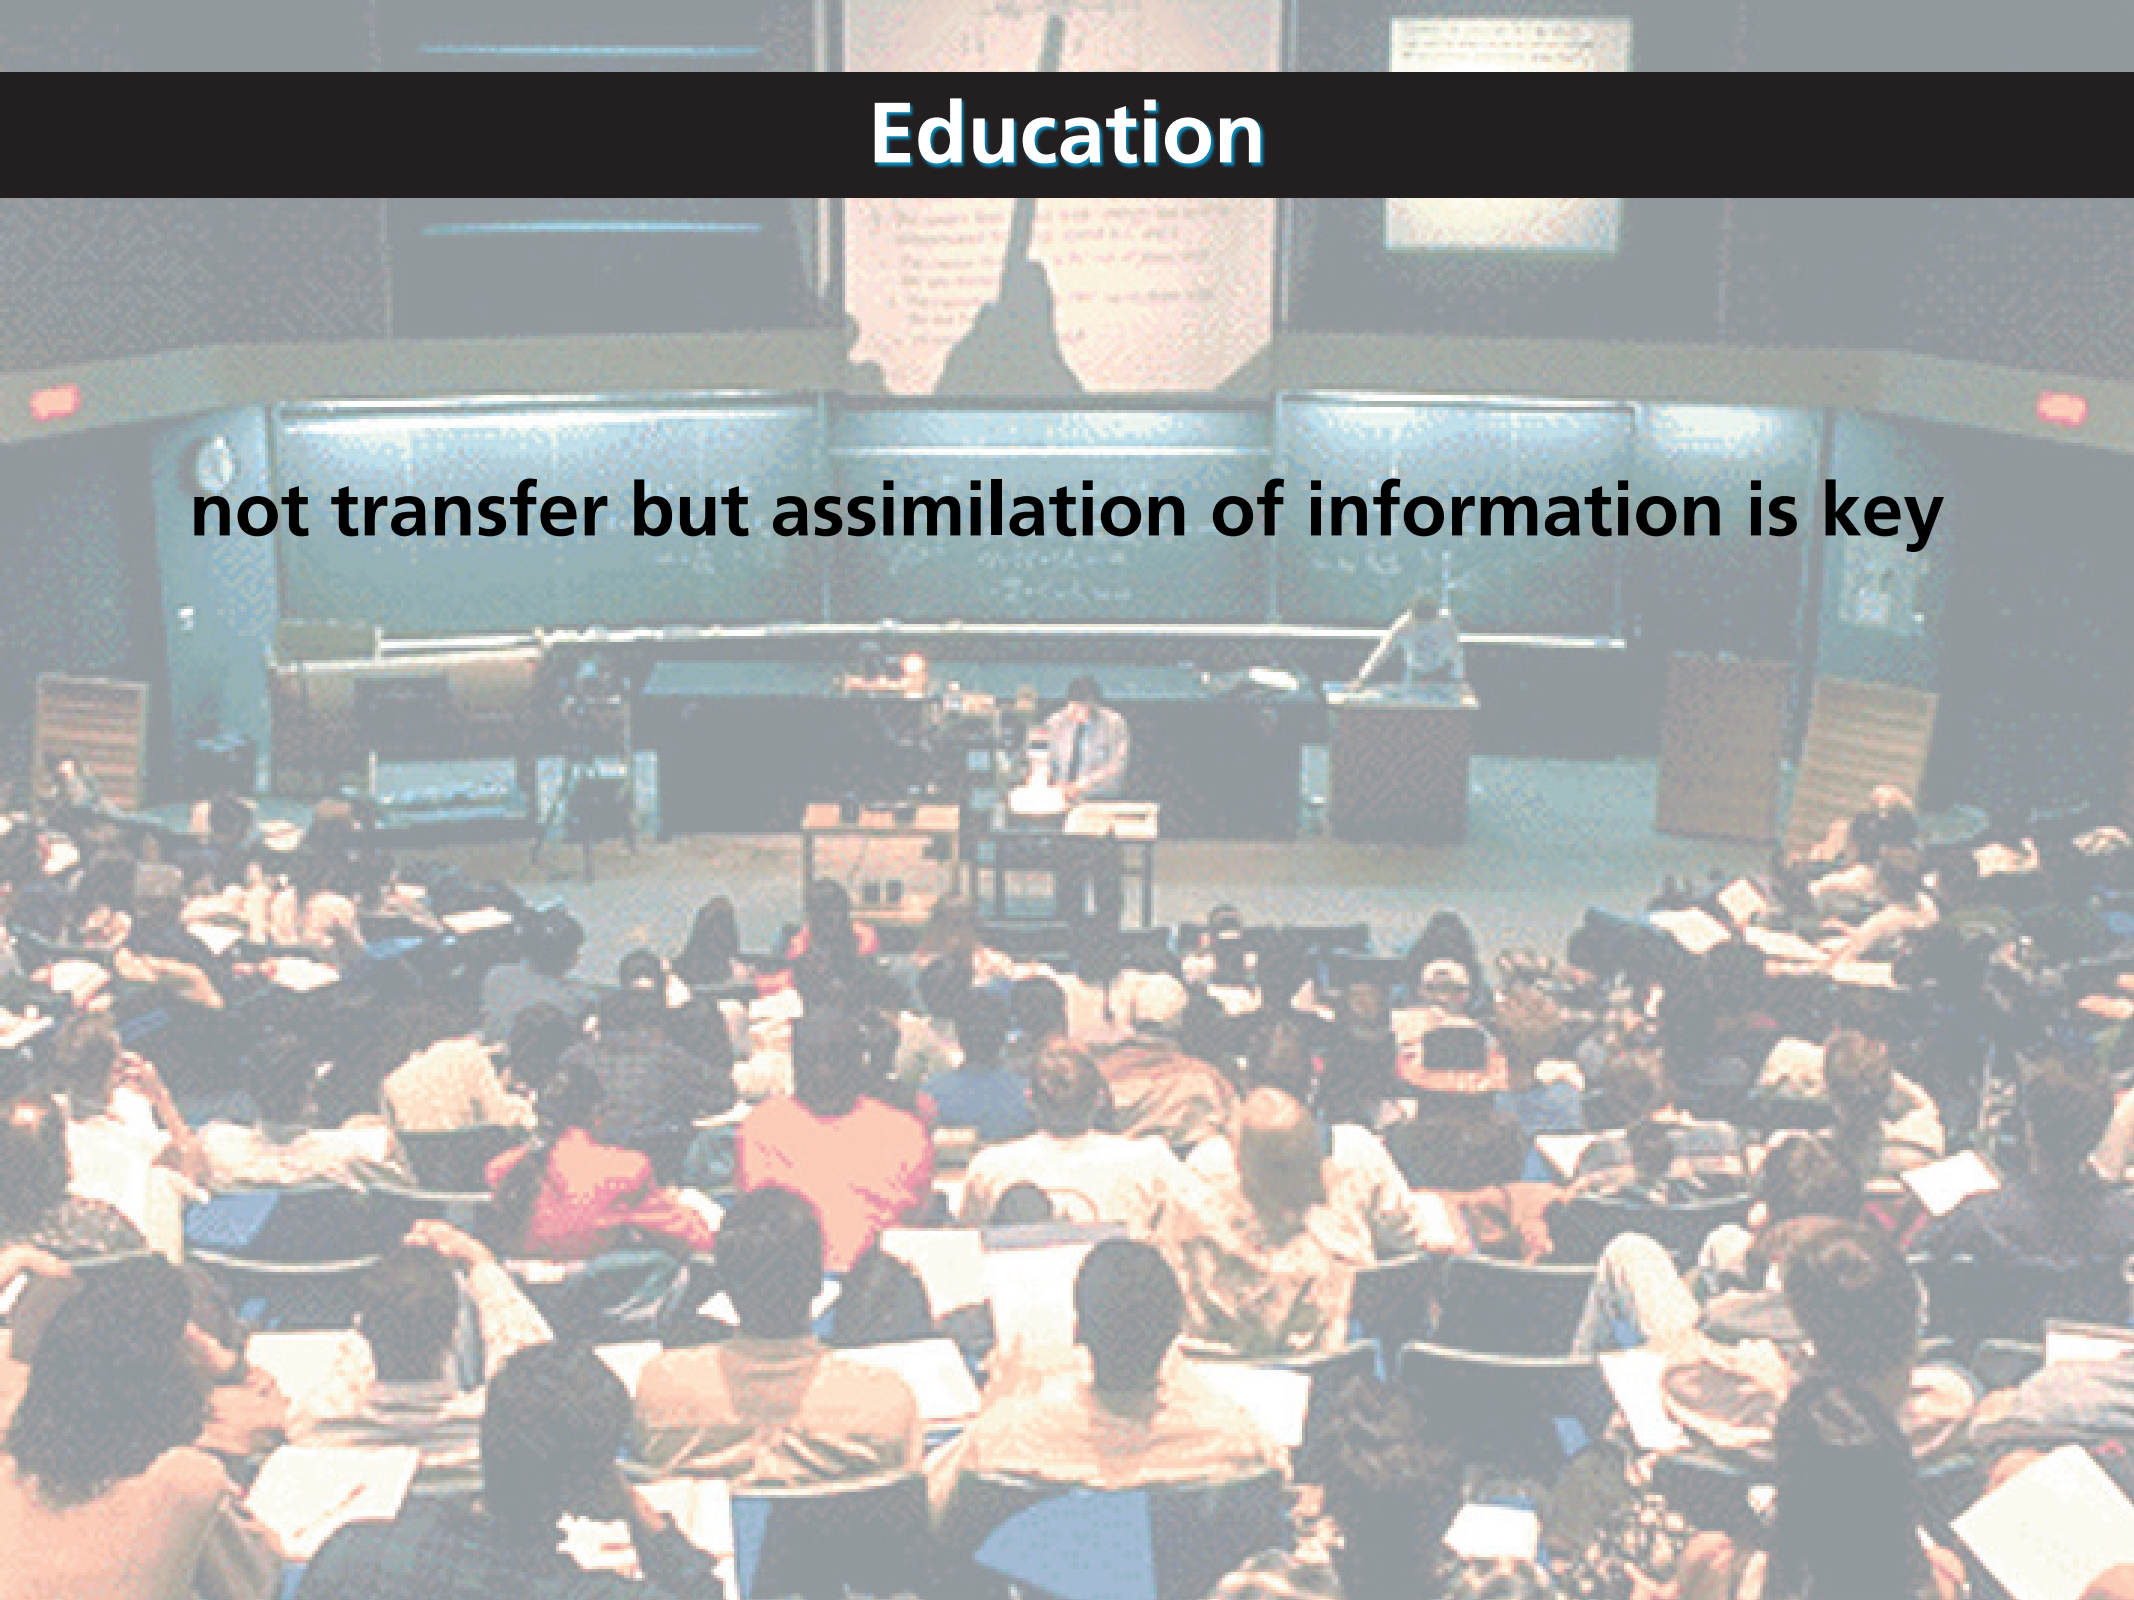

Education

only one quarter of maximum gain realized

Education

not transfer but assimilation of information is key

Education

conventional problems misleading

Education

conventional problems misleading

Calculate:

(a) current in $2\text{-}\Omega$ resistor

(b) potential difference
between P and Q

Education

are the basic principles understood?

Education

are the basic principles understood?

When S is closed, what happens to:

- (a) intensities of A and B ?
- (b) intensity of C ?
- (c) current through battery?
- (d) potential difference across
 A , B , and C ?
- (e) the total power dissipated?

Education

The image shows a large lecture hall from the perspective of the back of the room. Students are seated at long desks, facing a stage. A lecturer is standing at a podium on the stage, facing the audience. A large screen is visible on the stage, displaying text. The text on the screen is partially legible and appears to be a list of items. The text on the screen is as follows:

What are the following components of a system?

- 1. The system is a set of components that are interconnected by a network of communication links.
- 2. The system is a set of components that are interconnected by a network of communication links.
- 3. The system is a set of components that are interconnected by a network of communication links.
- 4. The system is a set of components that are interconnected by a network of communication links.
- 5. The system is a set of components that are interconnected by a network of communication links.

So what should we do?

Peer Instruction

Give students more responsibility for gathering information...

Peer Instruction

**Give students more responsibility for gathering information...
so we can better help them assimilate it.**

Peer Instruction

Main features:

- pre-class reading
- in-class: depth, not 'coverage'
- ConcepTests

Peer Instruction

ConcepTest:

- 1. Question**
- 2. Thinking**
- 3. Individual answer**
- 4. Peer discussion**
- 5. Revised/Group answer**
- 6. Explanation**

Results

is it any good?

Results

Summary

So better understanding leads to better problem solving!

Summary

So better understanding leads to better problem solving!

(but “good” problem solving doesn’t always indicate understanding!)

Summary

Traditional indicators of success misleading

Summary

Traditional indicators of success misleading

Education is no longer about information
