How do we learn?

Think of something you are good at — something that you know you do well.

How do we learn?

Think of something you are good at — something that you know you do well.

How did you become good at this?

How do we learn?

Became good at it by:

1. trial and error
2. lectures
3. practicing
4. apprenticeship
5. other

How we teach...

Education

Education

Some people talk in their sleep.

A large lecture hall with a professor at a podium and students in the audience. The room is filled with students sitting at desks, many of whom appear to be asleep or resting. The professor is standing at a podium in the center of the stage, facing the audience. The room has a curved wall and a large screen at the front. The lighting is dim, and the overall atmosphere is one of a lecture in progress.

Education

A large lecture hall with a lecturer at the front and many students in the audience. The room is filled with people, and the lecturer is standing at a podium, addressing the class. The students are seated in rows, and many are looking towards the front. The room has a high ceiling and large windows.

Some people talk in their sleep.

Lecturers talk while other people are sleeping.

Albert Camus

Education

Education

lectures focus on information transfer...

Education

education is not just information transfer

Education

education is not just information transfer

Education

education is not just information transfer

Education

conventional problems misleading

Education

conventional problems misleading

Calculate:

(a) current in $2\text{-}\Omega$ resistor

(b) potential difference

between P and Q

Education

are the basic principles understood?

Education

are the basic principles understood?

When S is closed, what happens to:

- (a) intensities of A and B ?
- (b) intensity of C ?
- (c) current through battery?
- (d) potential difference across
 A , B , and C ?
- (e) the total power dissipated?

Education

Education

A large lecture hall with students seated at desks, facing a stage with a lecturer and a large screen displaying text. The text on the screen is partially legible and appears to be a list or a set of instructions. The room is dimly lit, with the stage area being the primary light source. The students are mostly seen from the back, looking towards the front of the room. The lecturer is standing at a podium on the stage, addressing the audience. The overall atmosphere is that of a formal academic setting.

So what should we do?

Peer Instruction

Give students more responsibility for gathering information...

Peer Instruction

**Give students more responsibility for gathering information...
so we can better help them assimilate it.**

Peer Instruction

Main features:

- pre-class reading
- in-class: depth, not 'coverage'
- ConcepTests

Peer Instruction

ConcepTest:

- 1. Question**
- 2. Thinking**
- 3. Individual answer**
- 4. Peer discussion**
- 5. Revised/Group answer**
- 6. Explanation**

Let's try it!

thermal expansion

Let's try it!

When metals heat up, they expand because all atoms get farther away from each other.

Let's try it!

When metals heat up, they expand because all atoms get farther away from each other.

Let's try it!

When metals heat up, they expand because all atoms get farther away from each other.

all of them

Let's try it!

Consider a rectangular metal plate with a circular hole in it.

Let's try it!

Consider a rectangular metal plate with a circular hole in it.

When the plate is uniformly heated, the diameter of the hole

1. increases.
2. stays the same.
3. decreases.

Let's try it!

Consider a rectangular metal plate with a circular hole in it.

When the plate is uniformly heated, the diameter of the hole

1. increases.
2. stays the same.
3. decreases.

you got all fired up!

Let's try it!

Consider a rectangular metal plate with a circular hole in it.

When the plate is uniformly heated, the diameter of the hole

1. increases.
2. stays the same.
3. decreases.

Let's try it!

Consider a rectangular metal plate with a circular hole in it.

When the plate is uniformly heated, the diameter of the hole

1. increases. ✓
2. stays the same.
3. decreases.

Let's try it!

consider the atoms at the rim of the hole

Let's try it!

consider the atoms at the rim of the hole

Let's try it!

consider the atoms at the rim of the hole

Let's try it!

consider the atoms at the rim of the hole

Let's try it!

consider the atoms at the rim of the hole

you won't forget this

Conclusion

So better understanding leads to better problem solving!

Conclusion

So better understanding leads to better problem solving!

(but “good” problem solving doesn’t always indicate understanding!)
