### So what happens after I sign up?

After joining Peer Instruction Network, you will receive a confirmation e-mail with a link to your personal profile page. After confirming, you can then connect, share, and learn with other network members across the globe. Simply use the member search tool to find other PI users in your field, area of study, university, or city and find them on e-mail, Twitter, or Facebook. And don't be surprised if you receive a nudge or an email from somebody looking to connect with you - that's what Peer Instruction Network is all about!

### What should the PI community know about me?

Physicist, educator, author, lecturer, Harvard professor, founder SiOnyx & Learning Catalytics, developer of Peer Instruction, early adopter of new technologies

### Other Information:

**I teach :** Introductory Undergraduates  
Intermediate Undergraduates  
Faculty (e.g. Workshops)  
Other Audiences

**Professional Role:** Primarily research, some instruction, some admin

**Class (or Audience) Size:** Small (1-25)  
Medium (26-75)  
Large (76-200)  
Extra-Large (201-500)  
Mega (500+)

The image shows a desktop browser window and a mobile phone displaying the 'learning catalytics' interface. The desktop browser window shows a course page for 'learning catalytics' by Brian Lukoff at Harvard University. The current session is 766079 with 69 students. The interface includes a navigation bar with links like 'Courses', 'Participate', 'Review', 'Classrooms', 'Account', and 'About'. The main content area displays a physics problem about light reflecting off two perpendicular mirrors. A 'Jump to' menu shows slides 1 through 15, with slide 4 selected. Below the problem, there are two rounds of student responses, each showing a diagram of light rays and statistics: Round 1 (57 responses, 58% correct) and Round 2 (51 responses, 73% correct). A 'feedback & support' button is at the bottom right. The mobile phone displays the same interface, showing the problem text and a diagram of light reflecting off two mirrors.

Julie Schell

*This week we have a guest Blog post from Peer Instruction Network Member, Dr. Cassandre Alvarado. [Turn to Your Neighbor](#) readers will recognize her name - we have been following Dr. Alvarado this semester, as she taught a graduate education class at The University of Texas at Austin using Peer Instruction for the first time. -JAS*

I am writing to make a confession: I'm a Peer Instruction (PI) Rookie.

What business do I have writing a blog post about PI? Not only have I never before written a blog post, I'm not a person who typically bares my soul to strangers, let alone on the Internet. Then again, [Turn to Your Neighbor](#) isn't your typical Blog, and PI isn't your typical teaching method.
