1 purposes

2 problems

3 improvements

how many different purposes of assessment can you think of?

1. rate students
2. rate professor and course
3. motivate students to keep up with work
4. provide feedback on learning to students
5. provide feedback to instructor
6. provide instructional accountability
7. improve teaching and learning

On a Saturday afternoon, you pull into a parking lot with un-metered spaces near a shopping area. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces.

On a Saturday afternoon, you pull into a parking lot with un-metered spaces near a shopping area. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces.

How long do you have to wait before someone frees up a space?

On a Saturday afternoon, you pull into a parking lot with un-metered spaces near a shopping area. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces.

How long do you have to wait before someone frees up a space?

Requires:

Assumptions
Developing a model
Applying that model

On a Saturday afternoon, you pull into a parking lot with un-metered spaces near a shopping area. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces.

How long do you have to wait before someone frees up a space?

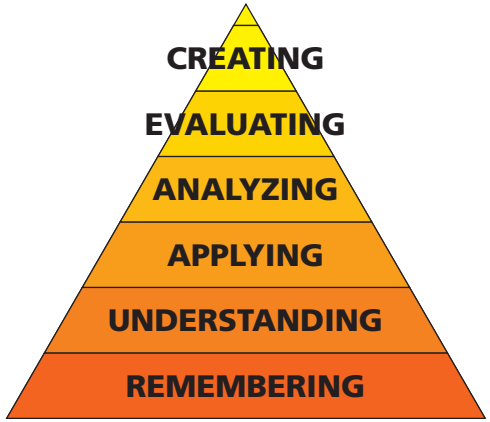
Developing a model
Applying that model

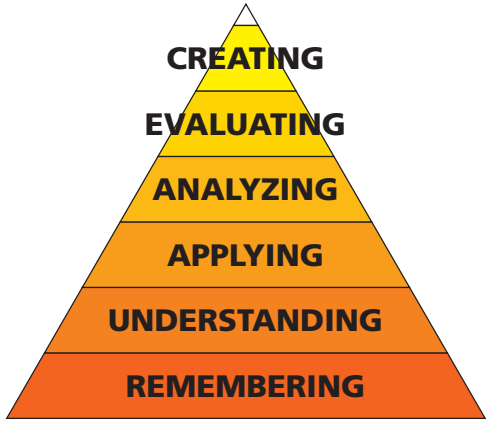


On a Saturday afternoon, you pull into a parking lot with un-metered spaces near a shopping area. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces.
On average people shop for 2 hours.

How long do you have to wait before someone frees up a space?

Requires:

Assumptions
Developing a model
Applying that model

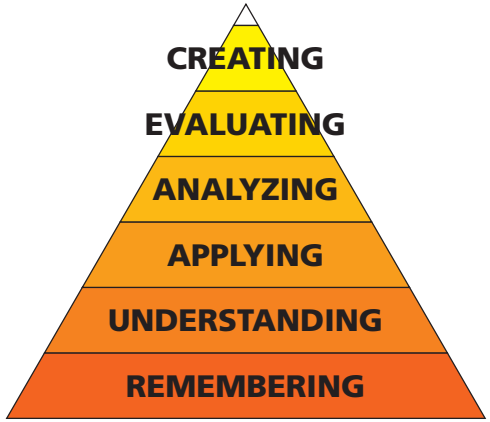


On a Saturday afternoon, you pull into a parking lot with un-metered spaces near a shopping area. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces. On average people shop for 2 hours.

Assuming people leave at regularly-spaced intervals, how long do you have to wait before someone frees up a space?

Requires:

Assumptions
Developing a model
Applying that model

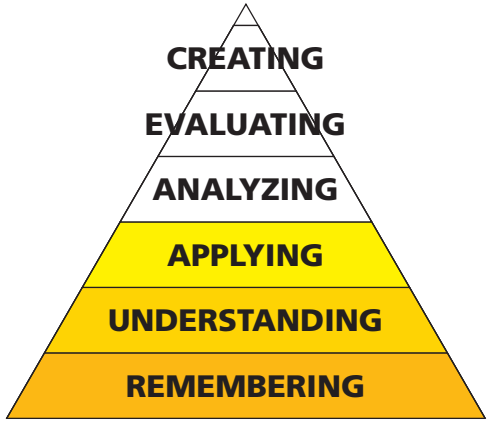


On a Saturday afternoon, you pull into a parking lot with un-metered spaces near a shopping area. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces. On average people shop for 2 hours.

Assuming people leave at regularly-spaced intervals, how long do you have to wait before someone frees up a space?

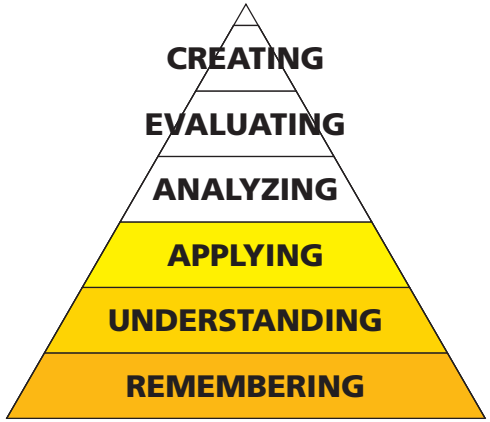
Requires:

Assumptions
Developing a model
Applying that model



On a Saturday afternoon, you pull into a parking lot with unmetered spaces near a shopping area, where people are known to shop, on average, for 2 hours. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces.

How long do you have to wait before someone frees up a space?



On a Saturday afternoon, you pull into a parking lot with unmetered spaces near a shopping area, where people are known to shop, on average, for 2 hours. You circle around, but there are no empty spots. You decide to wait at one end of the lot, where you can see (and command) about 20 spaces.

How long do you have to wait before someone frees up a space?

$$t_{wait} = \frac{T_{shop}}{N_{spaces}}$$

Math. 302-02, Final Exam

(4) We will use spherical coordinates:

$0 \le \rho \le 4$, $0 \le \theta \le 2\pi$, $0 \le \varphi \le \pi$. The integral is thus:

$$\int_{\rho=0}^{4}\int_{\theta=0}^{2\pi}\int_{\varphi=0}^{\pi}(\rho\cdot\rho)\left(\rho^2\sin\varphi\right)d\varphi\,d\theta\,d\rho$$

$$= \left\{\int_{\rho=0}^{4}\rho^3\,d\rho\right\}\left\{\int_{\theta=0}^{2\pi}d\theta\right\}\left\{\frac{1}{2}\int_{\varphi=0}^{\pi}\sin(2\varphi)\,d\varphi\right\} = \boxed{0}$$

WRITING RUBRIC

Rubric for Calibrated Peer Review

		1 = needs improvement does not meet expectations entirely	2 = satisfactory meets expectations **(what you should aim for)**	3 = admi… exceeds expectations (**rarely** selected)
Structure	Title	Wordy, long, unimaginative, or inappropriate title	Basic title	Catchy title drawing audience into article
	Opening	Missing a "hook" or a lead in the first paragraphs AND does not orient reader to subject	Hook or lead present OR first few paragraphs orient reader to subject	Compelling audience appropriate hook or lead present AND first few paragraphs orient lay reader to subject
	Paragraph length	Many paragraphs are long (6 or more sentences)	Some paragraphs are long (6 or more sentences), most are short (1-5 sentences)	All paragraphs are short (1-5 sentences)
	Organization	Lacks organization, no logical headings, no transitions between paragraphs	A few headings OR most paragraphs linked by transitions	Headings structure paper in organized, logical way AND paragraphs linked by transitions
	Closing	Does not end compellingly or with an important idea AND does not tie back to opening	Summary-like closing, but does not tie back to title or opening hook	Ends compellingly with an important idea or though provoking question AND ties back to title and opening hook
Content/Ideas	Scientific facts	Contains incorrect, misstated, irrelevant, or unnecessary facts	All facts are 100% correct, relevant, and necessary	Includes fact-checked expert and/or lay testimony (newspaper article only)
	Sources/evidence	Does not back up facts with proper, convincing, or interesting sources or evidence	Most, but not all, facts backed up with proper, convincing, or interesting sources or evidence	
		Mostly predictable based on available	Some originality apparent	Original presentation of material; uses the unexpected to capture attention
		…OR not aimed at …	Material appropriate and aimed at target audience AND mostly avoids scientific … contains no colloquialisms or …tly uses clearly	Material appropriate and aimed at target audience AND relates to practical/everyday concerns AND uses analogies or other techniques to relate unfamiliar content to familiar concepts; no jargon, colloquialisms, …or acronyms
