

TEACHING: TRANSFERRING INFORMATION OR ENGAGING THE MIND?

**Eric Mazur
Harvard University**

**Hong Kong University
22 October 1999**

Executive Summary

Education must adapt to a changing world

Executive Summary

The goals of education remain the same:

Executive Summary

**The goals of education remain the same:
transfer knowledge and develop skills...**

Executive Summary

...but the modern workplace requires new skills

Executive Summary

- ▶ **thinking skills**
- ▶ **complex problem solving skills**
- ▶ **lifelong learning skills**
- ▶ **interpersonal and teamwork skills**

We have a problem

**380,000 students take
introductory physics
each year...**

We have a problem

**about 1% of these get
a bachelor's degree
in physics**

We have a problem

**Of the 4,300 students with
a bachelor's degree
in physics...**

AIP Report R-151.33 (1997)

We have a problem

**about 35% go on to get a
Ph.D. in physics...**

We have a problem

**That's one out of every
260 students in our
introductory
courses!**

We have a problem

**What about the
other 259...?**

We have a problem

**What do we know
about these
students?**

We have a problem

Some disturbing symptoms:

- ▶ **frustration**
- ▶ **lack of understanding**
- ▶ **lack of basic knowledge**

We have a problem

They know the jargon:

- ▶ **circular motion**
- ▶ **barometric pressure**
- ▶ **light radius**
- ▶ **something to the power times ten to the something**

We have a problem

They are aware of their lack of knowledge

- ▶ **I graduated from college but I didn't study *astronomy***
- ▶ **It's been a while since I've had physics**

We have a problem

They are aware of their lack of knowledge

- ▶ **I graduated from college but I didn't study *astronomy***
- ▶ **It's been a while since I've had physics**

...and they don't care!

We have a problem

Should we worry?

We have a problem

We'd better!

We have a problem

"I took four years of science and four years of math...

**A waste of my time,
a waste of the teacher's time,
and a waste of space...**

**You know,
I took *physics*.**

For *what?*"

A diverse group of young people, including men and women of various ethnicities, are shown from the chest up. They are all smiling and looking towards the left side of the frame. The background is slightly blurred, suggesting an indoor setting like a lecture hall or a classroom. The overall mood is positive and engaged.

Why do we have this problem?

Why do we have this problem?

Lectures focus on transfer of information...

Why do we have this problem?

Conventional problems reinforce bad study habits

Why do we have this problem?

Conventional problems reinforce bad study habits

Why do we have this problem?

Conventional problems reinforce bad study habits

Calculate:

- (a) the current in the $2\text{-}\Omega$ resistor, and
- (b) the potential difference between points P and Q

Why do we have this problem?

Are basic principles understood?

Why do we have this problem?

Are basic principles understood?

When S is closed, what happens to the:

- (a) intensities of A and B ?
- (b) intensity of C ?
- (c) current through battery?
- (d) voltage drop across A , B , and C ?
- (e) total power dissipated?

Why do we have this problem?

Why do we have this problem?

Why do we have this problem?

A wide-angle photograph of a large lecture hall. The room is filled with students seated at desks, facing a stage. On the stage, a lecturer is standing at a podium, and another person is visible to the right. A large projection screen at the front of the room displays text and a diagram. The text on the screen includes the heading "What are the following..." followed by several bullet points. The room has a curved wall and a dark ceiling. The overall atmosphere is that of a formal academic setting.

So what should we do?

Peer Instruction

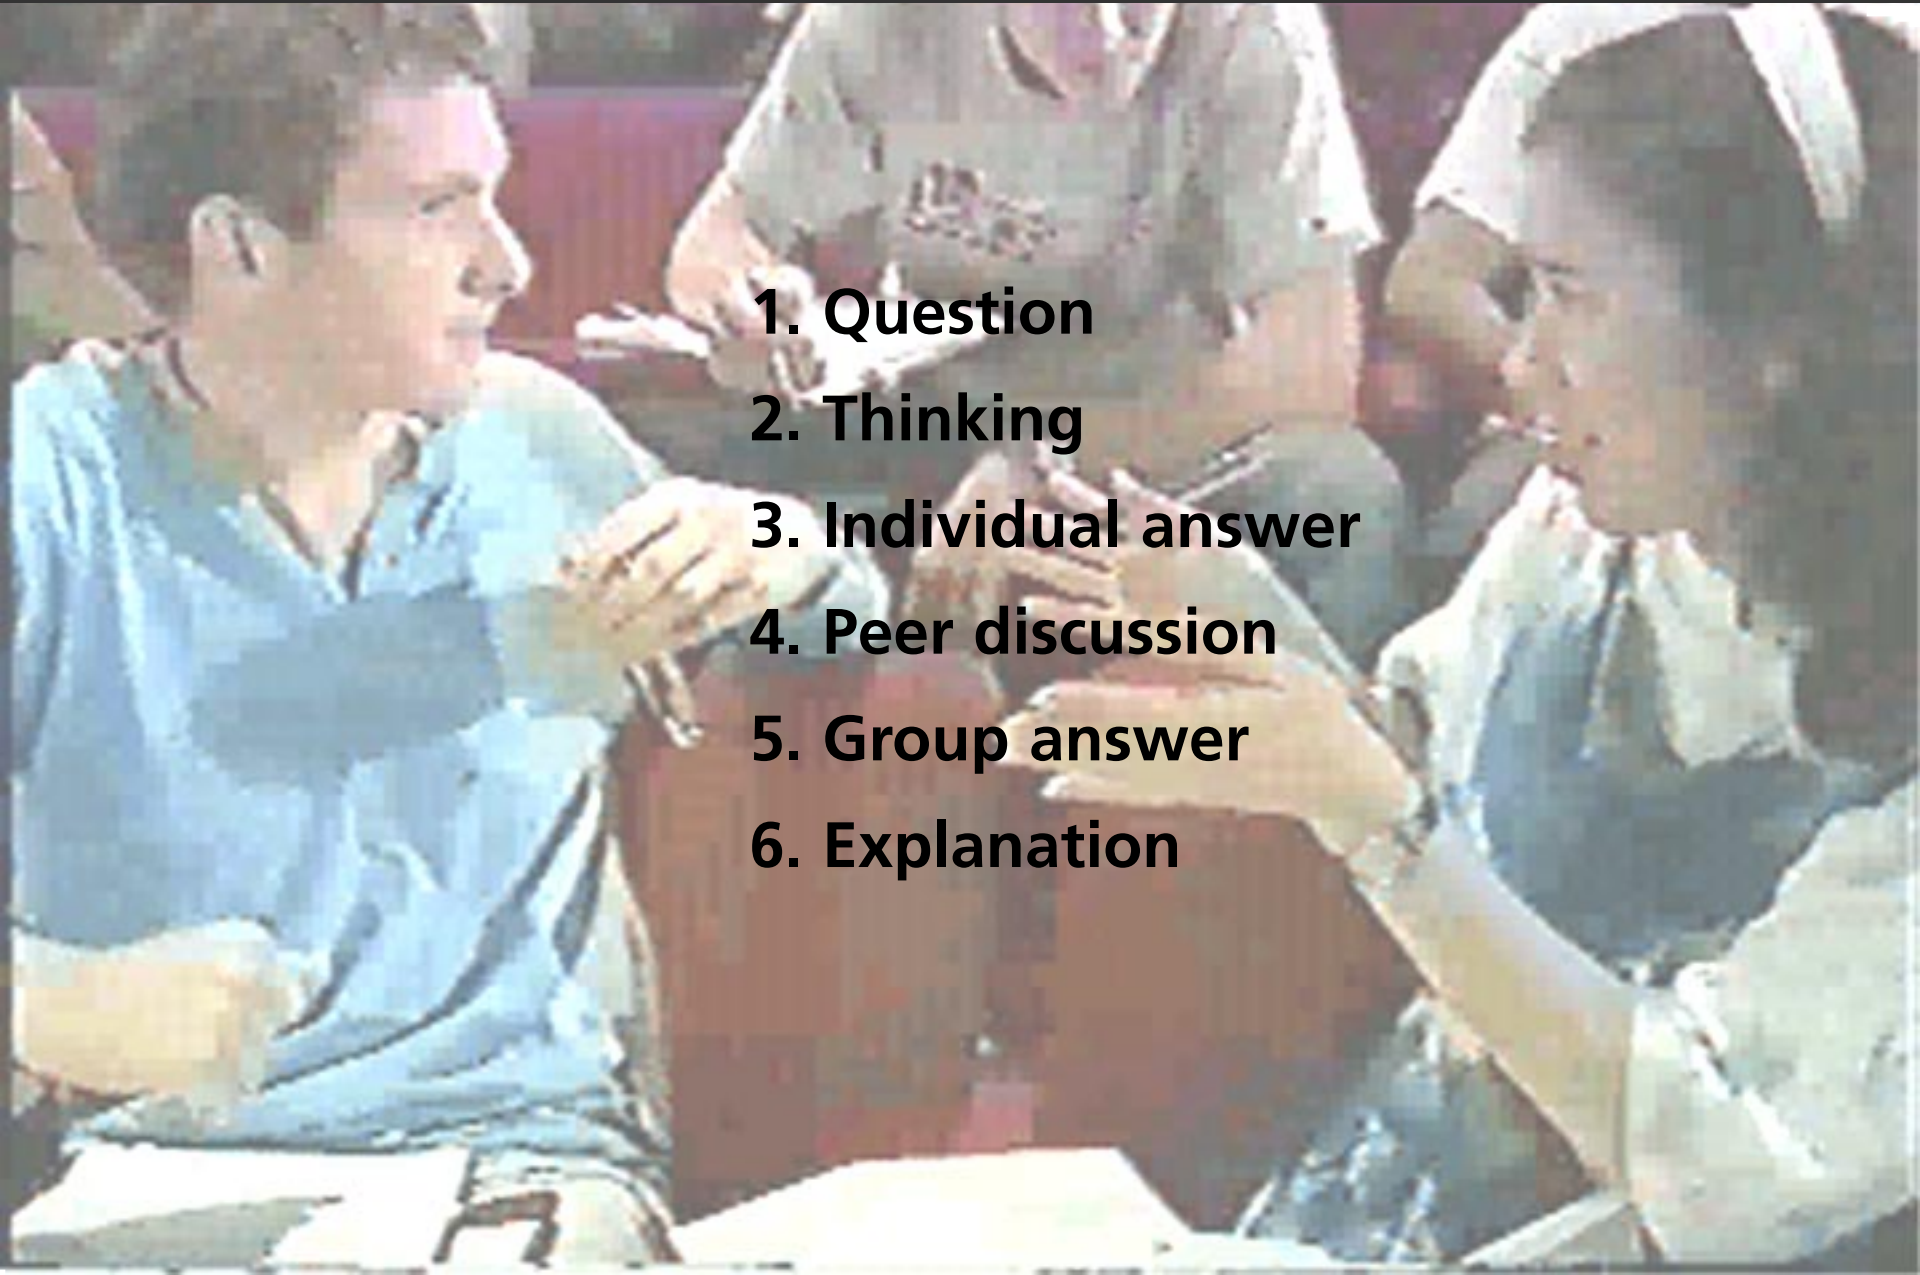

Help students take more responsibility for learning!

Peer Instruction

Main features:

- ▶ **Pre-class reading**
- ▶ **In class: depth, not coverage**
- ▶ **ConcepTests**

ConcepTest

1. Question
 2. Thinking
 3. Individual answer
 4. Peer discussion
 5. Group answer
 6. Explanation
- 

Results

What about problem solving...?

Results

Results

Results

Results

**So better understanding leads to better
problem solving!**

Results

So better understanding leads to better problem solving!

(but “good” problem solving doesn’t always indicate understanding!)

Conclusion

**Let's not forget the base
of the pyramid!**

Conclusion

**Let's give them something
of value!**

Conclusion

Challenges:

- ▶ **internal skepticism**
- ▶ **growing pains**
- ▶ **limited circle of influence**

Conclusion

Rewards:

- ▶ **engagement**
- ▶ **improved understanding**
- ▶ **class is fun!**

Funding

National Science Foundation
