

Memorization or Understanding: are we teaching the right thing?

**Eric Mazur
Harvard University**

Fysiikan paivat 2003, Suomen Fyysikkoseura
Helsinki, 22 March 2003

Outline

▶ **Problem**

▶ **Problem**

▶ **Cause**

Outline

▶ **Problem**

▶ **Cause**

▶ **Remedy**

We have a problem

**380,000 students take
introductory physics
each year...**

AIP Report R-151.33 (1997)

We have a problem

**about 1% of these get
a bachelor's degree
in physics**

We have a problem

**Of the 4,300 students with
a bachelor's degree
in physics...**

AIP Report R-151.33 (1997)

We have a problem

**about 35% go on to get a
Ph.D. in physics...**

We have a problem

**That's one out of every
260 students in our
introductory
courses!**

We have a problem

**What about the
other 259...?**

We have a problem

**What do we know
about these
students?**

We have a problem

Some disturbing symptoms:

- ▶ **frustration**
- ▶ **lack of understanding**
- ▶ **lack of basic knowledge**

We have a problem

They know the jargon:

- ▶ **circular motion**
- ▶ **barometric pressure**
- ▶ **light radius**
- ▶ **something to the power times ten to the something**

We have a problem

They are aware of their lack of knowledge

- ▶ **I graduated from college but I didn't study *astronomy***
- ▶ **It's been a while since I've had physics**

We have a problem

They are aware of their lack of knowledge

- ▶ **I graduated from college but I didn't study *astronomy***
- ▶ **It's been a while since I've had physics**

...and they don't care!

We have a problem

Should we worry?

We have a problem

We'd better!

We have a problem

"I took four years of science and four years of math...

**A waste of my time,
a waste of the teacher's time,
and a waste of space...**

**You know,
I took *physics*.**

For *what?*"

A diverse group of young people, including men and women of various ethnicities, are shown from the chest up. They are all smiling and looking towards the left side of the frame. The background is slightly blurred, suggesting an indoor setting like a classroom or lecture hall. The overall mood is positive and engaged.

Why do we have this problem?

Why do we have this problem?

Lectures focus on transfer of information...

Why do we have this problem?

Conventional problems reinforce bad study habits

Why do we have this problem?

Conventional problems reinforce bad study habits

Why do we have this problem?

Conventional problems reinforce bad study habits

Calculate:

- (a) the current in the $2\text{-}\Omega$ resistor, and
- (b) the potential difference between points P and Q

Why do we have this problem?

Are basic principles understood?

Why do we have this problem?

Are basic principles understood?

When S is closed, what happens to the:

- (a) intensities of A and B ?
- (b) intensity of C ?
- (c) current through battery?
- (d) voltage drop across A , B , and C ?
- (e) total power dissipated?

Why do we have this problem?

Why do we have this problem?

So what should we do?

Peer Instruction

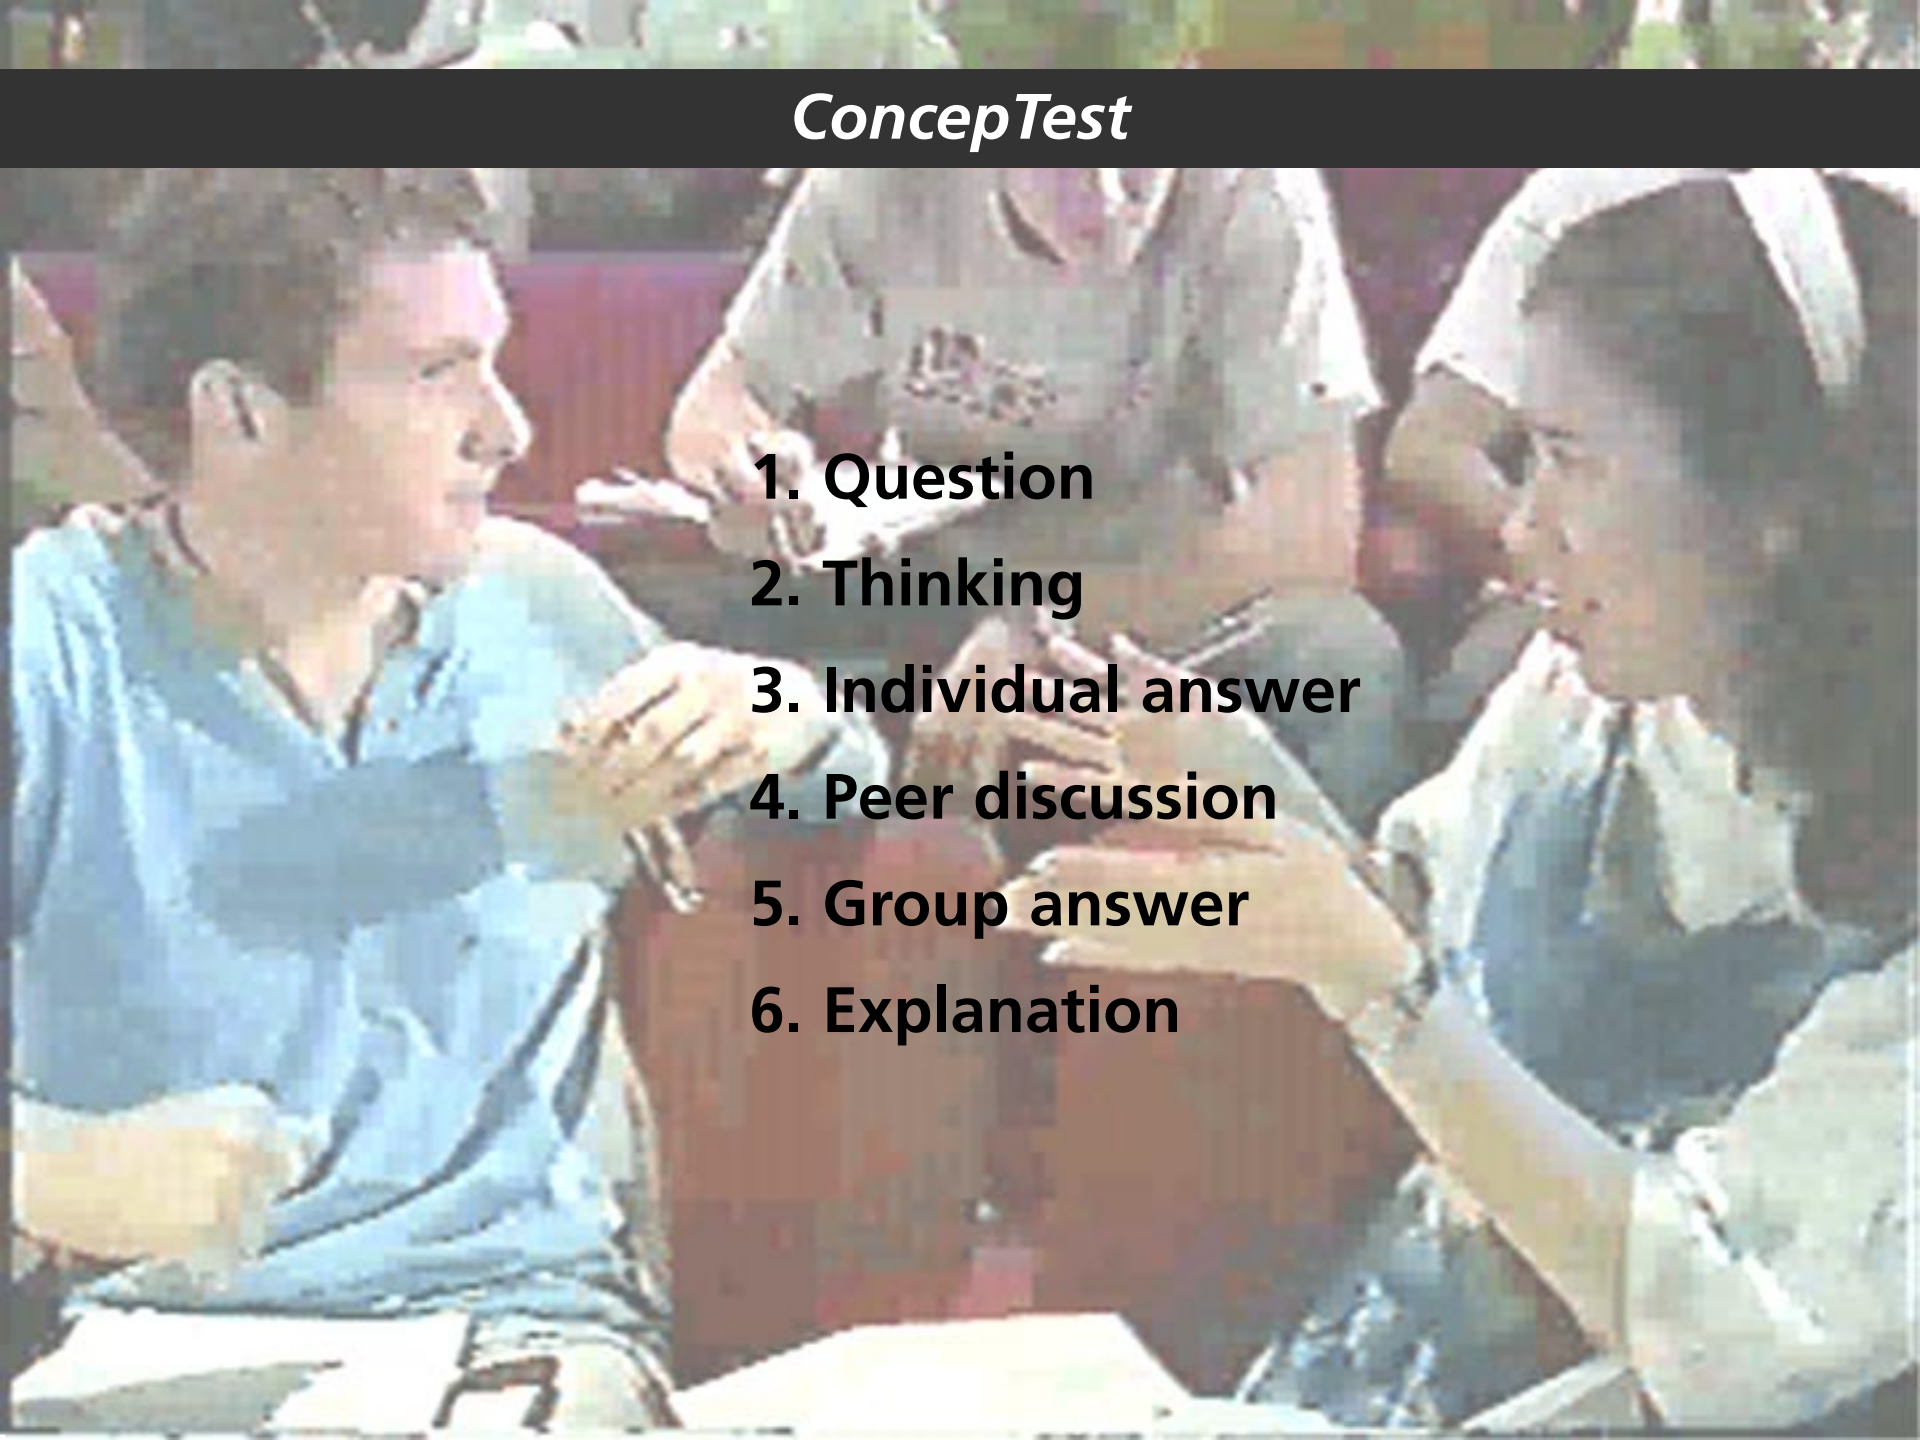

Help students take more responsibility for learning!

Peer Instruction

Main features:

- ▶ **Pre-class reading**
- ▶ **In class: depth, not coverage**
- ▶ **ConcepTests**

ConcepTest

1. Question
 2. Thinking
 3. Individual answer
 4. Peer discussion
 5. Group answer
 6. Explanation
- 
- A photograph of three students in a classroom setting. A male student on the left, wearing a blue shirt, is gesturing with his hands while speaking. A female student in the center, wearing a grey shirt, is looking at him. A female student on the right, wearing a white headscarf and a blue and white patterned shirt, is also gesturing with her hands as if in a discussion. They appear to be engaged in a collaborative learning activity.

Is it any good?

Results

What about problem solving...?

Results

Results

Results

Results

**So better understanding leads to better
problem solving!**

Results

So better understanding leads to better problem solving!

(but “good” problem solving doesn’t always indicate understanding!)

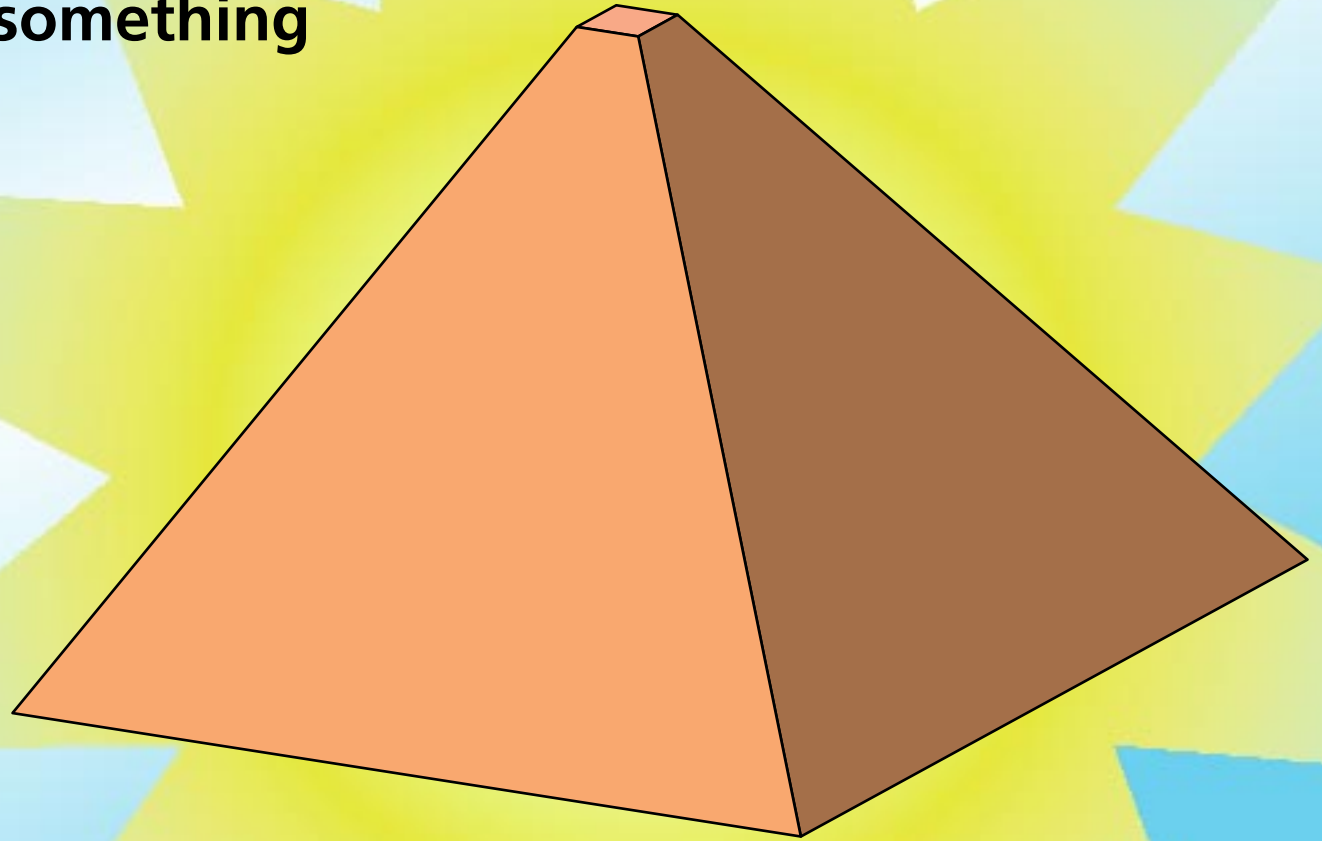

Conclusion

**Let's not forget the base
of the pyramid!**

Conclusion

**Let's give them something
of value!**
