

Memorization or Understanding: Are we teaching the right thing?

Teaching Excellence Lecture
University of Pittsburgh, Pittsburgh, PA 6 April 2004

Outline

- Problem

Outline

A photograph of a group of people sitting around a table in a meeting. A man in a blue shirt is on the left, gesturing with his hands. A woman in a white shirt is on the right, also gesturing. Other people are visible in the background.

- Problem

- Cause

Outline

- Problem

- Cause

- Remedy

We have a problem

340,000 students take
introductory physics
each year

AIP Report R-151.39 (2003)

We have a problem

about 1% of these get
a bachelor's degree
in physics

We have a problem

Of the 4,100 students with
a bachelor's degree
in physics...

We have a problem

about 28% go on to get a
Ph.D. in physics...

AIP Report R-151.39 (2003)

We have a problem

That's one out of every
300 students in our
introductory
courses!

We have a problem

What about the
other 299...?

AIP Report R-151.39 (2003)

We have a problem

What do we know
about these
students?

We have a problem

Some disturbing symptoms:

- **frustration**
- **lack of understanding**
- **lack of basic knowledge**

We have a problem

They know the jargon:

- circular motion
- barometric pressure
- light radius
- something to the power times ten to the something

We have a problem

They are aware of their lack of knowledge:

- I graduated from college, but I didn't study *astronomy*
- It's been a while since I've had physics

We have a problem

They are aware of their lack of knowledge:

- **I graduated from college, but I didn't study *astronomy***
- **It's been a while since I've had physics**

...and they don't care!

We have a problem

Should we worry?

We have a problem

We'd better!

We have a problem

"I took four years of science
and four years of math...

A waste of my time,
a waste of the teacher's time,
and a waste of space...

You know, I took *physics*.

For *what?*"

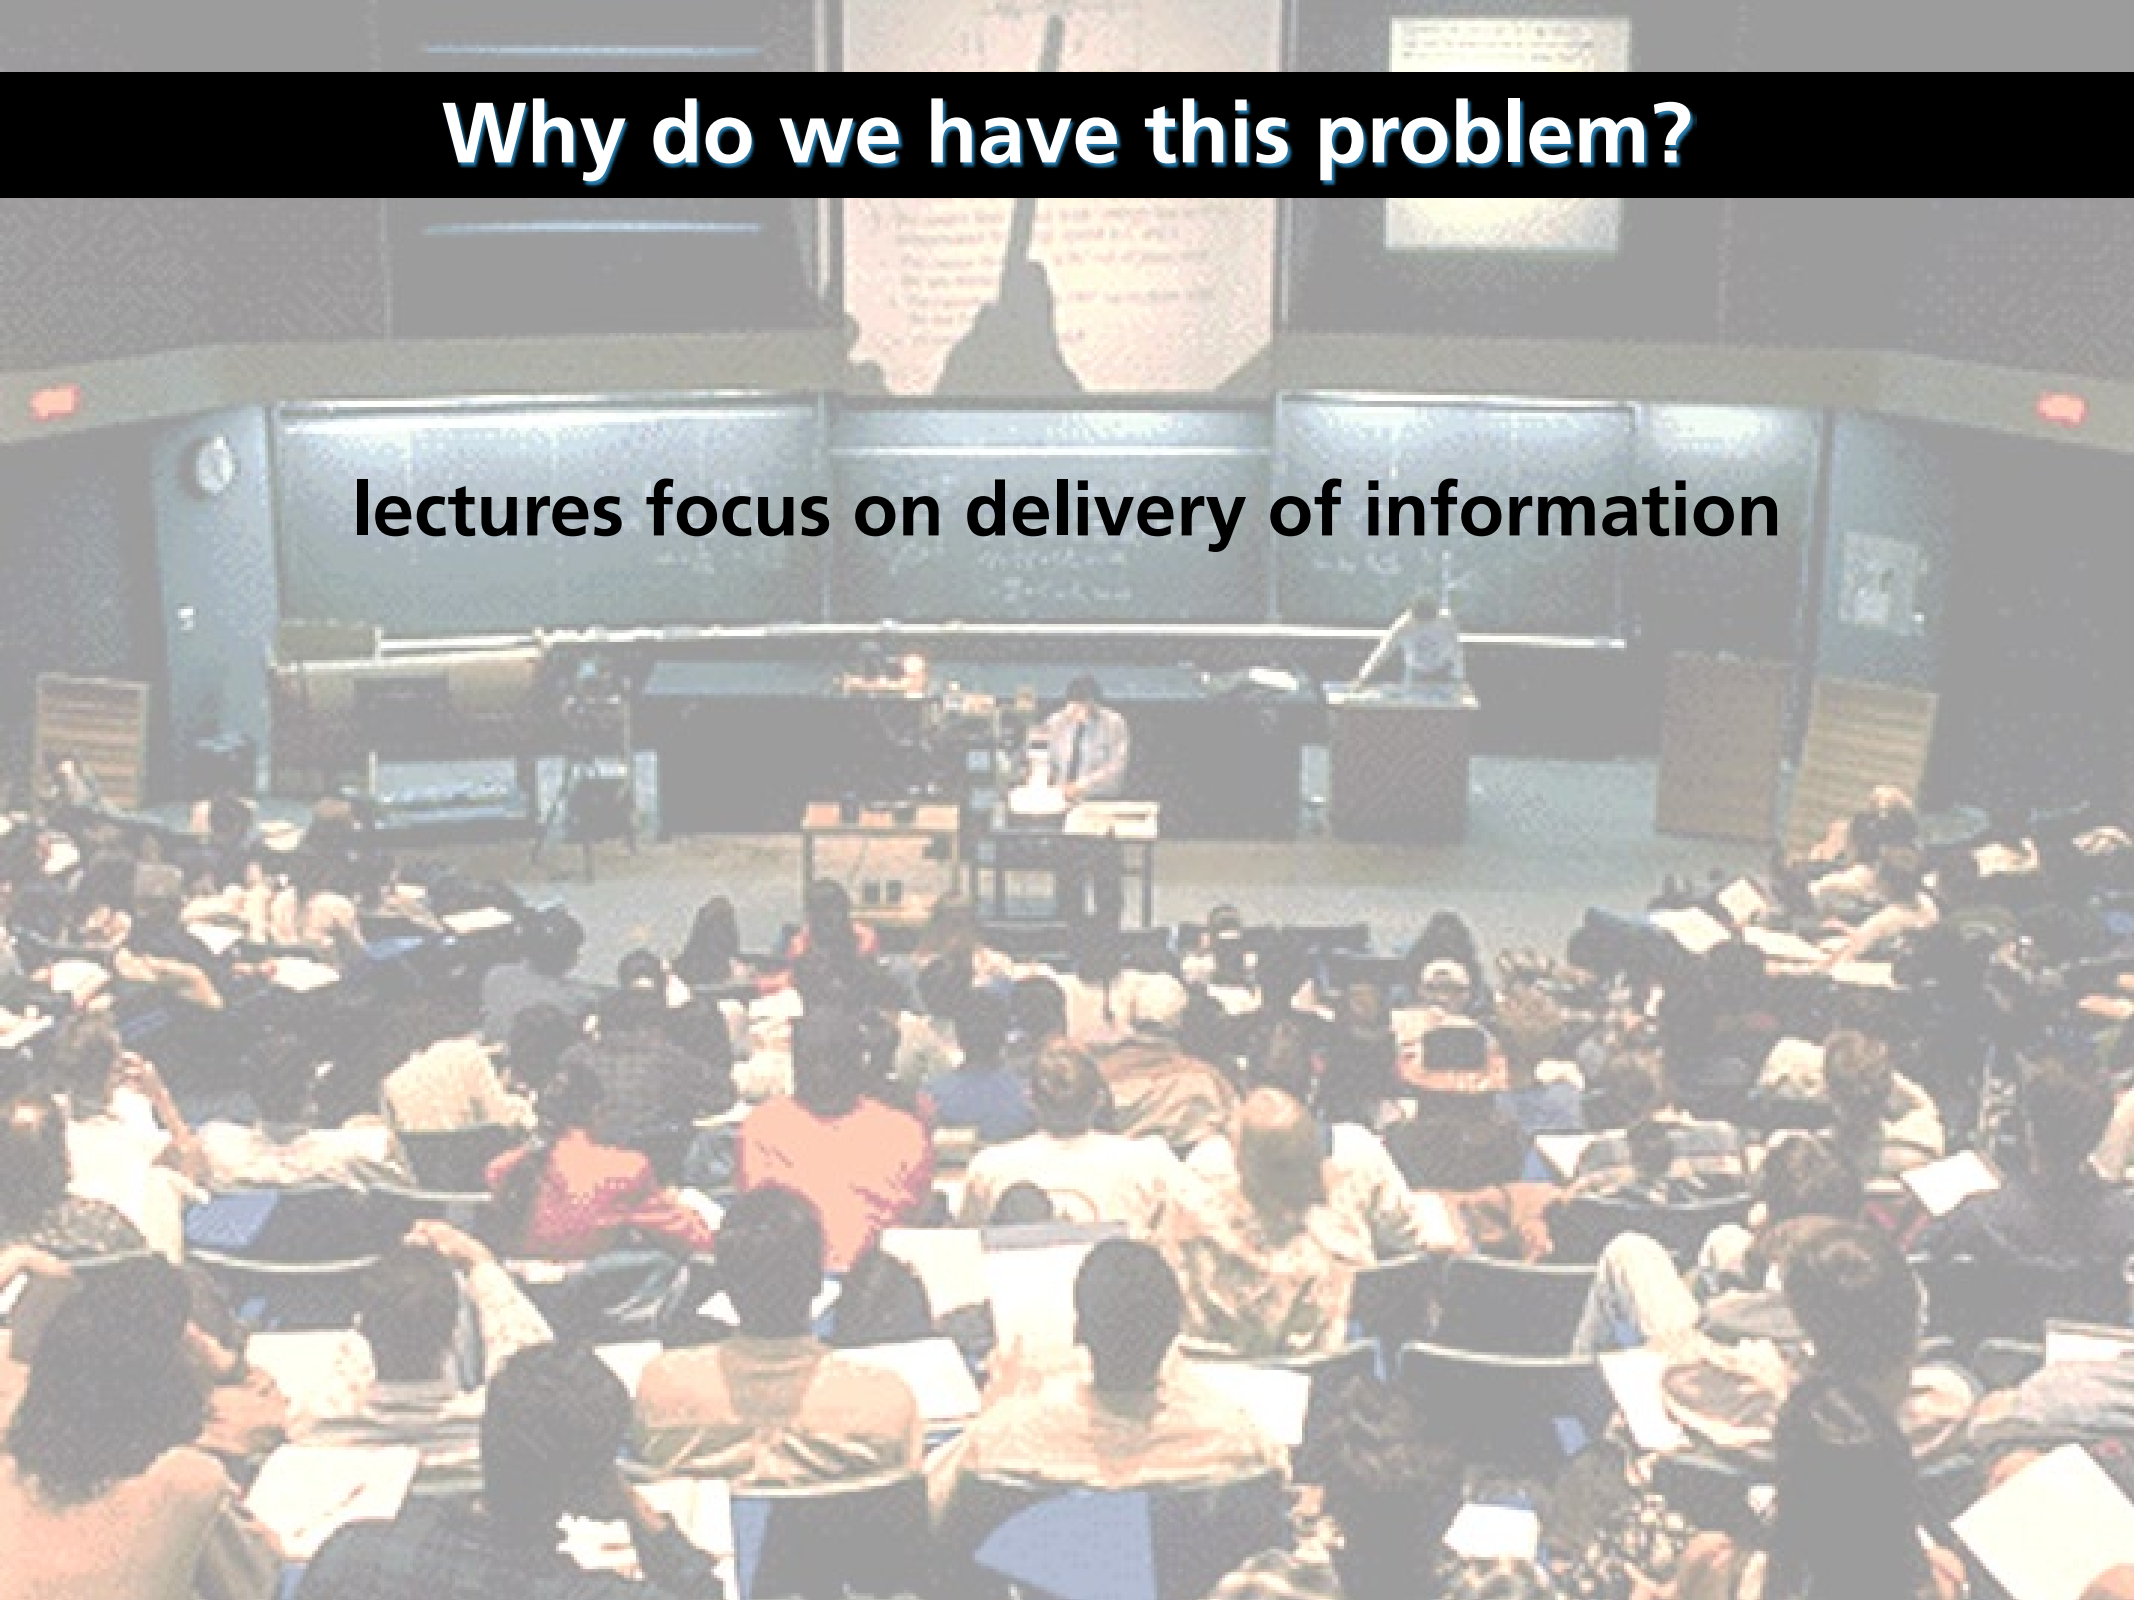

Why do we have this problem?

Why do we have this problem?

Why do we have this problem?

lectures focus on delivery of information

Why do we have this problem?

education is not just information transfer

Why do we have this problem?

education is not just information transfer

Why do we have this problem?

education is not just information transfer

Why do we have this problem?

Why do we have this problem?

Why do we have this problem?

Why do we have this problem?

R.R. Hake, *Am. J. Phys.* 66, 64 (1998)

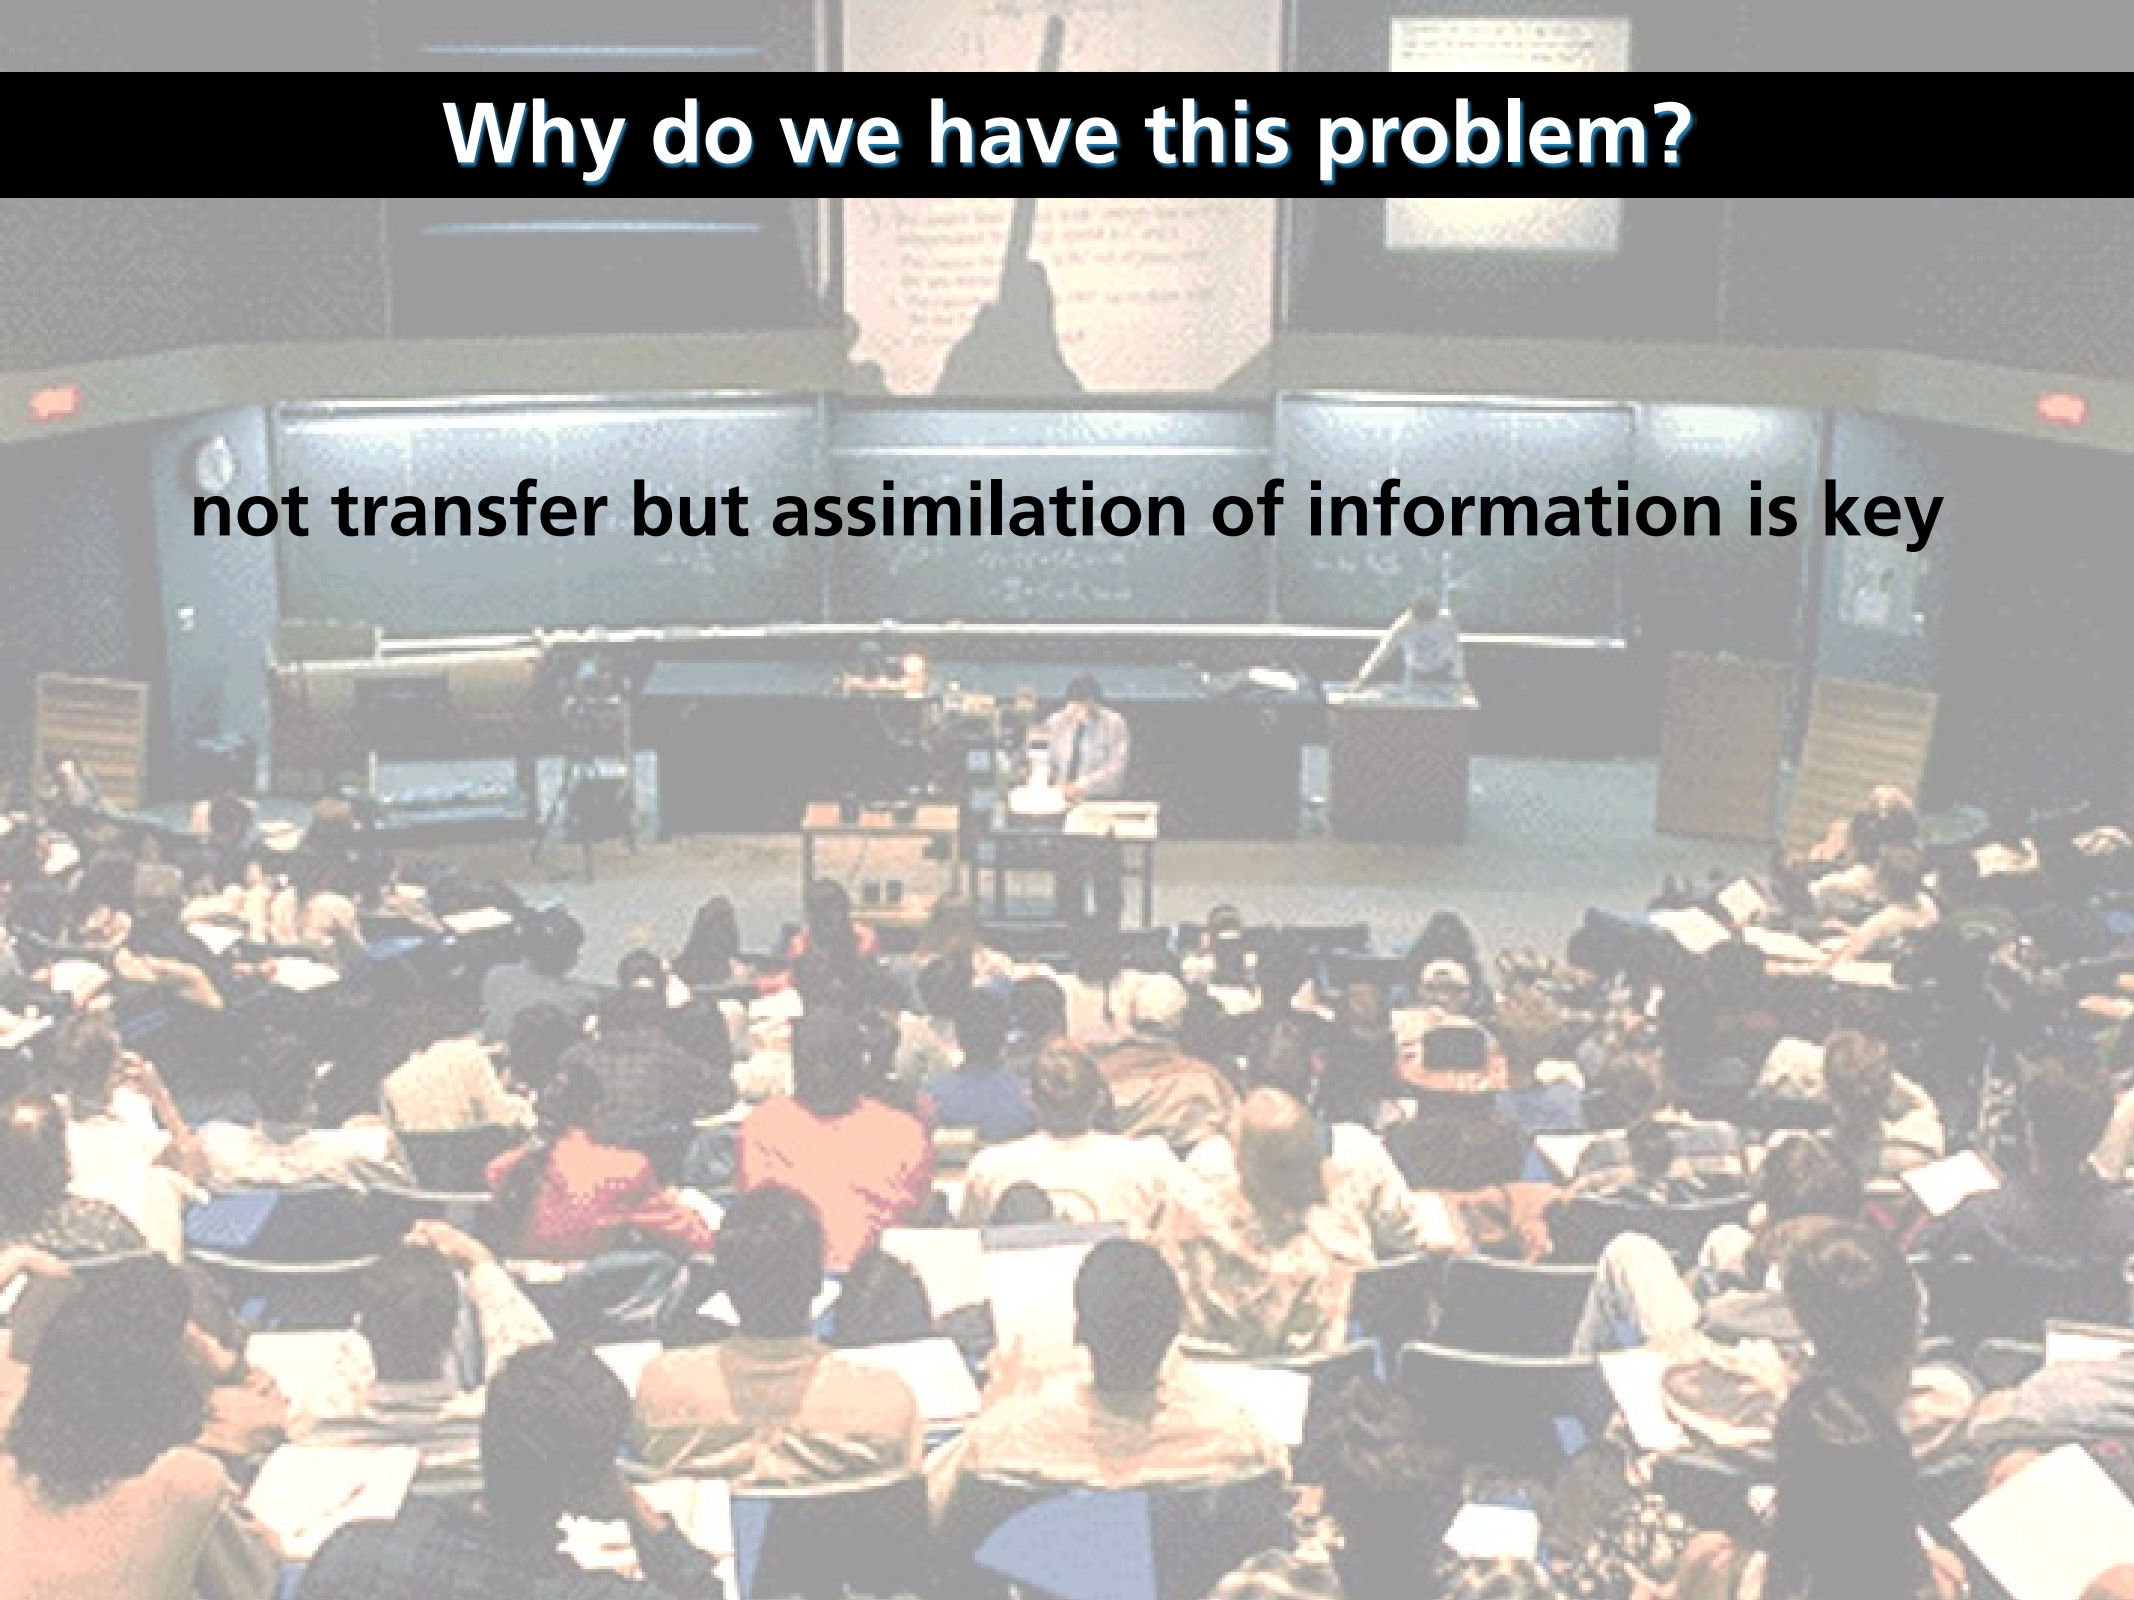

Why do we have this problem?

only one quarter of maximum gain realized

Why do we have this problem?

not transfer but assimilation of information is key

Why do we have this problem?

conventional problems reinforce bad study habits

Why do we have this problem?

conventional problems reinforce bad study habits

Calculate:

(a) current in $2\text{-}\Omega$ resistor

(b) potential difference

between P and Q

Why do we have this problem?

are the basic principles understood?

Why do we have this problem?

are the basic principles understood?

When S is closed, what happens to:

- (a) intensities of A and B ?
- (b) intensity of C ?
- (c) current through battery?
- (d) potential difference across
 A , B , and C ?
- (e) the total power dissipated?

Why do we have this problem?

conventional

conceptual

Why do we have this problem?

conventional

conceptual

Why do we have this problem?

Why do we have this problem?

So what should we do?

Peer Instruction

Give students more responsibility for gathering information...

Peer Instruction

**Give students more responsibility for gathering information...
so we can better help them assimilate it.**

Peer Instruction

Main features:

- pre-class reading
- in-class: depth, not 'coverage'
- ConcepTests

Peer Instruction

ConcepTest:

- 1. Question**
- 2. Thinking**
- 3. Individual answer**
- 4. Peer discussion**
- 5. Revised/Group answer**
- 6. Explanation**

Peer Instruction

is it any good?

Peer Instruction

first year of implementing PI

Peer Instruction

first year of implementing PI

Peer Instruction

first year of implementing PI

Peer Instruction

Peer Instruction

Peer Instruction

Peer Instruction

Peer Instruction

what about problem solving?

Peer Instruction

Peer Instruction

Peer Instruction

Peer Instruction

**So better understanding leads to better
problem solving!**

Peer Instruction

So better understanding leads to better problem solving!

(but “good” problem solving doesn’t always indicate understanding!)

Conclusion

Let's not forget the base
of the pyramid

Conclusion

Let's given them something
of value!
